Song Of The Clyde A History Of Clyde Shipbuilding:

Song of the Clyde Fred M. Walker,1985 **Song of the Clyde** Fred M. Walker,1984 **Greek Maritime History**,2022-05-02 This volume presents Greek Maritime History and unravels the historical trajectory of a maritime nation par excellence in the Eastern Mediterranean At the core of the book lies the rise of the Greek merchant fleet and its transformation from a peripheral to an international carrier Following the evolution of Greek shipping for more than three centuries 17th 20th century the book traces a maritime nation in its making and provides proof of a different yet successful pattern of maritime development compared to other European maritime nations The chapters adopt a multidimensional and interdisciplinary approach spanning from shipping fishing and trade to piracy technology human resources and entrepreneurship and reflect the main directions of Greek maritime historiography over the last thirty years Contributors are Apostolos Delis Dimitris Dimitropoulos Zisis Fotakis Katerina Galani Gelina Harlaftis Evdokia Olympitou Gerassimos D Pagratis Alexandra Papadopoulou Socrates Petmezas Evrydiki Sifneos Anna Sydorenko Ioannis Theotokas and Katerina Vourkatioti **Crossing the Bar** Anthony Slaven,Hugh Murphy,2017-10-18 This book is a collection of sixty interviews with key figures in British shipbuilding ship repair and marine engine building industries across the United Kingdom plus government and civil service members in the sector from the 1960s to the 1980s The aim of the project is to understand the economic social and political environment of the shipping industry from the perspective of those who worked in it The interviews place the twentieth century decline of British shipbuilding into a firm context The topics covered include international competition a recurring pertinent theme labour difficulties industry modernisation the attitude of shipowners the strong belief in traditional methods which kept many of those in the industry from recognising the cheaper faster and better quality work taking place overseas and leaving Britain behind ship production and production control the postwar boom shipyard overcrowding the decline of the domestic industry in favour of the international marketing weaknesses trade disputes and trade unions and nationalisation and privatisation concerns Opinions and viewpoints often conflict particularly between the perspectives of those working within the industry and the civil servants working outside of it but the interviews are presented as a unit and the reader is encouraged to draw their own conclusion The result is a unique historical archive that offers a multitude of firsthand perspectives on the British shipping decline open to interpretation by historians and future researchers It includes a preface introduction and select bibliography The interviews are grouped together by location and role **Scott Lithgow** Lewis Johnman,Hugh Murphy,2017-10-18 This work studies the history of two major Scottish shipbuilding firms based on the River Clyde Scotts Shipbuilding and Engineering Company and Lithgows Limited It traces each firm s origin success decline and collapse and places the events into the historical context of maritime Britain The aim is to enhance the academic understanding of the cause and effect of the decline of the British shipbuilding industry delving beyond the factors of poor industrial relations international market conditions and entrepreneurial failure in search of further

answers As a private company Lithgows Limited provides useful insights into company management outside of state control The authors base their analysis on the catalogued volumes of Scotts and Lithgows records though due to the large number of gaps in the data they also conducted interviews with major players in each company from the post war period Public business and banking records also provide supplementary material The book is separated into eight chapters plus a concluding ninth an appendix listing ships built by Scott Lithgow Limited between 1970 1987 and a select bibliography Shipbuilding in the United Kingdom Hugh Murphy,2020-12-28 Shipbuilding in the United Kingdom provides a systematic historical account of the British Shipbuilders Corporation first looking at this major industry under private enterprise then under state control and finally back in private hands The chapters trace the evolution of public policy regarding shipbuilding ship repair and large marine engine building through the tenures of radically different Labour and Conservative governments and through the response of the board of the British Shipbuilders Corporation trade unions and local management also The book benefits from comprehensive archival research and interviews from the 1990s with leading players in the industry as well as politicians shipbuilders trade union leaders and senior civil servants This authoritative monograph is a valuable resource for advanced students and researchers across the fields of business history economic history industrial history labour history maritime history and British history Ships for the Seven Seas Thomas Heinrich,2020-03-24 Thomas R Heinrich explores American shipbuilding from the workshop level to subcontracting networks spanning the Delaware Valley Winner of the North American Society for Oceanic History s John Lyman Book Award Originally published in 1996 Sustained by a skilled work force and the Pennsylvania iron and steel industry Philadelphia shipbuilders negotiated the transition from wooden to iron hull construction earlier and far more easily than most other builders Between the Civil War and World War I Philadelphia emerged as the vital center of American shipbuilding constructing a wide variety of vessel types such as passenger liners freighters battleships and cruisers In Ships for the Seven Seas Thomas R Heinrich explores this complex industry from the workshop level to subcontracting networks spanning the Delaware Valley He describes entrepreneurial strategies and industrial change that facilitated the rise of major shipbuilding firms how naval architecture marine engineering and craft skills evolved as iron and steel overtook wood as the basic construction material and how changes in domestic and international trade and the rise of the American steel navy helped generate vessel contracts for local builders Heinrich also examines the formation of the military industrial complex in the context of naval contracting Contributing to current debates in business history Ships for the Seven Seas explains how proprietary ownership and batch production strategies enabled late nineteenth century builders to supply volatile markets with custom built steamships But large scale naval construction in the 1920s eroded production flexibility Heinrich argues and since then ill conceived merchant marine policies and naval contracting procedures have brought about a structural crisis in American shipbuilding and the demise of the venerable Philadelphia shipyards **Iron Shipbuilding on the Thames, 1832-1915** A.J. Arnold,2017-11-22 This title

was first published in 2000 Little better documented than King Arthur or Robin Hood complained one historian in 1998 describing the lack of information on Thames shipbuilding This study of iron shipbuilding on the capital s river fills this noticeable gap A J Arnold examines the initial domination of the iron shipbuilding trade by Thames firms from the launch of the first iron vessel on the river in 1832 to the end of serious Thames side shipbuilding in 1915 For the first time the factors that caused the industry s demise are explored fully together with an analysis of the effect it had on its locality Extending existing series of data the book includes information on annual shipbuilding tonnage and the number of vessels constructed and further looks at tonnage built for foreign citizens companies and navies and for the British Admiralty This broader and deeper statistical survey is supplemented with less systematic documentation such as memorabilia and business records to arrive at the most complete picture yet of a once pre eminent British industry A J Arnold is Professor of Accounting and Business History at the University of Essex

Navies and Shipbuilding Industries Michael Lindberg,Daniel Todd,1996-08-23 The central theme running through this book is the mutual dependence of navies and shipbuilding industries Historically naval ambitions and the ambitions of industrialists converge and a symbiosis is born The technical competence of industry emerges as a key player in determining the effectiveness of navies That industrial capability for its part rests increasingly on the navy as chief customer because progressive specialization renders it more and more unsuited for any other use These trends are universal afflicting the relations of all major navies and their industrial suppliers since the dawn of the modern age They continue to complicate the running of navies today The book enlarges on this fundamental fact explaining why the symbiosis emerged

and how it is manifested in the contemporary world
