Modernity and the Architecture of Mexico Edward R. Burian, 2010-06-28 Since the mid 1970s there has been an extraordinary renewal of interest in early modern architecture both as a way of gaining insight into contemporary architectural culture and as a reaction to neoconservative postmodernism This book undertakes a critical reappraisal of the notion of modernity in Mexican architecture and its influence on a generation of Mexican architects whose works spanned the 1920s through the 1960s Nine essays by noted architects and architectural historians cover a range of topics from broad based critical commentaries to discussions of individual architects and buildings Among the latter are the architects Enrique del Moral Juan O Gorman Carlos Obreg n Santacilia Juan Segura Mario Pani and the campus and stadium of the Ciudad Universitaria in Mexico City Relatively little has been published in English regarding this era in Mexican architecture Thus *Modernity and the Architecture of Mexico* will play a groundbreaking role in making the underlying assumptions ideological and political constructs and specific architect s agendas known to a wide audience in the humanities Likewise it should inspire greater appreciation for this undervalued body of works as an important contribution to the modern movement

The Making of Mexican Modernist Architecture Celia Esther Arredondo Zambrano, 2023-05-03 This book presents the making of Mexican Modernist architecture through five power structures academic social status economic political gender and postcolonial and by interviews and analysis of 13 key Mexican architects These include Luis Barrag n Jos Villagr n Garc a Juan O Gorman Pedro Ram rez V zquez Agust n Hern ndez Abraham Zabludovsky Carlos Mijares Ricardo Legorreta Juan Jos D az Infante Enrique Norten Alberto Kalach Javier Sordo Madaleno and Clara de Buen Although the five power structures framed what was built the testimony of these Mexican architects helps us to recognize and discover subtleties and nuances Their views thereby shed light on what contributed to making Mexican Modernist architecture so distinctive globally Even if these architects were not always aware of the power structures their projects nonetheless supported discrimination marginalization and subjugation In that sense the book also reveals the extent to which these power structures are still

present today The Making of Mexican Modernist Architecture s uniqueness lies in uncovering the remarkable buildings that arose amid the five power structures while at the same time questioning their validity It also voices the urgent need today for a new kind of architecture outside these boundaries The book is essential reading for anyone studying Mexican and Latin American architecture **The Architecture and Cities of Northern Mexico from Independence to the Present**

Constructing Identity in Contemporary Architecture Peter Herrle,Stephanus Schmitz,2009 The global spread of uniform modes of production and cultural values has been accompanied by a dissemination of stereotypes of modern architecture styles almost everywhere around the globe Paradoxically the reverse process has also emerged In some countries the elites feel the necessity to counterbalance the loss of identity and defend their own cultures against the intruding forces of globalization What started as a defensive notion has developed into a more progressive attempt to re create what has allegedly been lost This trend is being strongly expressed in discourses about architecture in countries of the South Who are the actors feeling compelled to construct new identities How are these new identities in architecture created in various parts of the world And which are the ingredients borrowed from various historical and ethnic traditions and other sources These and other questions are discussed in five case studies from different parts of the world written by renowned scholars from Brazil Mexico Egypt India and Singapore

Radical Functionalism Luis E. Carranza,2021-12-27 Radical Functionalism A Social Architecture

for Mexico provides a complex and nuanced understanding of the functionalist architecture developed in Mexico during the 1930s. It carefully re-reads the central texts and projects of its main advocates to show how their theories responded to the socially and culturally charged Mexican context. These such as architects Juan Legarreta, Juan O'Gorman, the Union of Socialist Architects, and Manuel Amabilis were part of broader explorations to develop a modern national architecture intended to address the needs of the Mexican working classes. Through their refunctioning of functionalism, these radical thinkers showed how architecture could stand at the precipice of Mexico's impending modernization and respond to its impending changes. The book examines their engagement and negotiation with foreign influences, issues of gender and class, and the separation between art and architecture. Functionalist practices are presented as contradictory and experimental, as challenging the role of architecture in the transformation of society and as intimately linked to art and local culture in the development of new forms of architecture for Mexico, including the vernacularization of functionalism itself. Uniquely including translations of two manifesto-like texts by O'Gorman expressing the polemical nature of their investigations, *Radical Functionalism: A Social Architecture for Mexico* will be a useful reference for scholars, researchers, and students interested in the history of architectural movements.
