Santos,2011-10-24 An exploration of the concept of utopia in Latin America from the earliest accounts of the New World to current cultural production the carefully selected essays in this volume represent the latest research on the topic by some of the most important Latin Americanists working in North American academia today      Curatorial Challenges Malene Vest Hansen,Anne Folke Henningsen,Anne Gregersen,2019-03-04 Curatorial Challenges investigates the challenges faced by curators in contemporary society and explores which practices ways of thinking and types of knowledge production curating exhibitions could challenge Bringing together international curators and researchers from the fields of art and cultural history the book provides new research and perspectives on the curatorial process and aims to bridge the traditional gap between theoretical and academic museum studies and museum practices The book focuses on exhibitions as a primary site of cultural exchange and argues that as highly visible showcases producers of knowledge and historically embedded events exhibitions establish and organize meanings of art and cultural heritage Temporary exhibitions continue to increase in cultural significance and yet the traditional role of the museum as a Bildung institution has changed As exhibitions gain in significance so too do curatorial strategies Arguing that new research is needed to help understand these changes the book presents original research that explores how curatorial strategies inform both art and cultural history museums in contemporary society The book also investigates what sort of critical transformative and perhaps even conservative potential can be traced in exhibition cultures Curatorial Challenges fosters innovative interdisciplinary exchange and brings new insights to the field of curatorial studies As such it should be of great interest to academics researchers and postgraduate students engaged in the study of curatorial practice museum studies the making of exhibitions museum communication and art history      A History of the World in 12 Maps Jerry Brotton,2014-10-28 A New York Times Bestseller Maps allow the armchair traveler to roam the world the diplomat to argue his points the ruler to administer his country the warrior to plan his campaigns and the propagandist to boost his cause rich and beautiful Wall Street Journal Throughout history maps have been fundamental in shaping our view of the world and our place in it But far from being purely scientific objects maps of the world are unavoidably ideological and subjective intimately bound up with the systems of power and authority of particular times and places Mapmakers do not simply represent the world they construct it out of the ideas of their age In this scintillating book Jerry Brotton examines the significance of 12 maps from the almost mystical representations of ancient history to the satellite derived imagery of today He vividly recreates the environments and circumstances in which each of the maps was made showing how each conveys a highly individual view of the world Brotton shows how each of his maps both influenced and reflected contemporary events and how by considering it in all its nuances and omissions we can better understand the world that produced it Although the way we map our surroundings is more precise than ever before Brotton argues that maps today are no more definitive or objective than they have ever been Readers of this beautifully illustrated

and masterfully argued book will never look at a map in quite the same way again A fascinating and panoramic new history of the cartographer's art The Guardian The intellectual background to these images is conveyed with beguiling erudition There is nothing more subversive than a map The Spectator A mesmerizing and beautifully illustrated book The Telegraph The Right to Resist Mario Wenning, Thomas Byrne, 2023-01-12 While the idea of total revolution seems anachronistic today there is increasing consensus about the importance of new forms of political ethical and aesthetic resistance In the past resistance was often motivated as a form of protest against specific institutions Increasingly dissent has become integrated into the fabric of modern life This volume addresses new forms of resistance at a level that combines a rootedness in the philosophical tradition and a sensitivity to rethinking the possibility of emancipation in today's age The work focuses on contemporary social and political philosophy from a perspective informed by critical theory The text specifically addresses three challenges 1 Critical theorists need to investigate in which ways resistance conformism and oppression oppose and constitute each other 2 The relationship between the theory and the practice of resistance needs to be posed anew given recent protest movements and media of protest 3 It needs to be shown in which ways different areas of society such as the arts religion and social media establish divergent practices of resistance The chapters are written by scholars from Asia Europe and North America These experts in resistance discourse focus on practices of dissent ranging from traditional forms of civil disobedience to more recent practices such as guerrilla protest art and resistance in digital networks including social media What unites them is a shared concern for the dimensions of political acts of resistance in an age that is characterized by a tendency to integrate and thereby neutralize those very acts
