Emergency Medicine — A.P.I.C.E. A. Gullo, 2012-12-06 Basic research progress in technology and informatics and the success of clinical pharmacology are the fundamental bases of this interesting field of medicine Nowadays critical care medicine is no longer for experts only but it is a field in which researchers and clinicians nurses and technical staff work in an interdisciplinary way each offering their own skills The volume is divided in six sections devoted to critical care key issues to lung diseases to trauma to acid base equilibrium to perioperative medicine and to obstetrics **Trauma Operative**

Procedures G. Berlot, H. Delooz, A. Gullo, 2012-12-06 Trauma has assumed a prominent role in contemporary medicine as an event that can significantly influence clinical variables such as morbidity functional deficits and consequential disability and mortality Trauma is the principal cause of death in the population below 40 years of age in industrialized countries Therefore there is great interest in studying traumatic events from both the clinical and epidemiological viewpoints The importance of trauma is exemplified by the fact that in many countries the trauma patient is first treated in specialized trauma centers in which the diagnostic and treatment processes are facilitated by the 24 hour presence of personnel having interdisciplinary competencies Trauma in this context consists of any acute often unexpected condition Many of the medical difficulties associated with trauma occur in a relatively brief period that spans from the first call for help to the initiation of first aid measures A correct approach depends on the availability of experienced personnel The first measures of aid must guarantee above all the patient's survival The most critical initial phases of care to trauma patients are represented by the triad first aid triage and transport Specific morbidity indices whether anatomical functional or mixed are indispensable elements for monitoring a patient's clinical evolution The immediate availability of essential drugs is imperative to confront the clinical situations that often present in the acute post traumatic phase Essentials of Trauma Anesthesia Albert J.

Varon, Charles E. Smith, 2017-11-09 Covering the most important topics in trauma anesthesia this updated edition provides anesthesiology trainees and practitioners with a practical basis for managing trauma patients Many recent advances in trauma care are identified including paradigm shifts in the management of bleeding and coagulopathy new neuromuscular blockade and anticoagulant reversal drugs and updated clinical practice guidelines This volume provides a concise practical review of the essential elements in the care of the severely injured trauma patient including emergency airway management fluid and blood resuscitation monitoring coagulation therapy regional and general anesthesia and perioperative care Edited by two of the most experienced trauma anesthesiologists in the United States with chapters written by experts from leading US and Canadian trauma centers with the highest and most varied caseload of critically injured patients Essentials of Trauma Anesthesia identifies new trends in surgery and anesthesiology practices that impact on the management of trauma patients

Anaesthesia, Pain, Intensive Care and Emergency Medicine — A.P.I.C.E. Antonino Gullo, 2012-12-06 The management of the critically ill patients has been in the past few years a discipline at the forefront of development which continues to make progress with the support of basic and clinical research This work is a collection of material that deals with the management

of critically ill patients published on the occasion of the 13th APICE congress in November 1998 which celebrated 40 years of Critical Care Medicine
