Textile Wet Processes Preparation Of Fibers And Fabrics:

Textile Wet Processes: Preparation of fibers and fabrics Edward S. Olson, 1983-01-01 Wellington Sears Handbook of Industrial Textiles Sabit Adanur, 2017-11-22 The Wellington Sears Handbook of Industrial Textiles has been a widely used textile industry reference for more than 50 years. Now a completely updated new edition has been published. It was prepared by a team of industrial textile specialists at Auburn University to provide both technical and management personnel with a comprehensive resource on the current technology and applications of today's industrial textiles. All aspects of industrial textiles are covered: man-made and natural materials, manufacturing and finishing methods, and all applications. There are also sections on properties, testing, waste management, computers and automation, and standards and regulations. The appendices provide extensive reference data: properties, specifications, manufacturers and trade names, mathematical equations, and measurement units. The text is organized for easy reference and well illustrated with hundreds of schematics and photographs.

Fibres to Smart Textiles Asis Patnaik, Sweta Patnaik, 2019-08-08 *Fibres to Smart Textiles: Advances in Manufacturing Technologies and Applications* offers comprehensive coverage of the fundamentals and advances in the textile and clothing manufacturing sectors. It describes the basics of fibres, yarns, and fabrics and their end use in the latest developments and applications in the field and addresses environmental impacts from textile processes and how to minimize them. This book serves as a single comprehensive source discussing textile fibres, yarn formation, filament formation, techniques, woven fabric formation, knitting technologies, nonwoven manufacturing technologies, braiding technologies, and dyeing, printing, and finishing processes. Testing of textile materials, environmental impacts of textile processes, and use of CAD and CAM in designing textile products are also included. The book also discusses applications including textile composites and biocomposites, technical textiles, smart textiles, and nanotextiles. With chapters authored by textile experts, this practical book offers guidance to professionals in textile and clothing manufacturing and shows how to avoid potential pitfalls in product development.

Nanomaterials in the Wet Processing of Textiles Shahid Ul Islam, B. S. Butola, 2018-02-07 Nanotechnology has attracted attention of textile and polymer scientists and has been playing an extraordinary role over the past few decades in the functional finishing of different textile materials. Nanoparticles, due to their diverse functions, have not only imparted flame retardant, UV blocking, water repellent, self-cleaning, and antimicrobial properties to the textiles but also have greater affinity for fabrics, leading to an increase in durability of the functions. This book emphasizes recent approaches and strategies that are currently at operation to functionalize both natural and synthetic textile materials using diverse nanoparticles and their composites with polymers. The

book concludes by paying attention towards removal of toxic chemicals using state of the art nano adsorbents

Main Topics

- 1 Textile dyeing using metallic nanoparticles
- 2 Metal oxide nanoparticles for multifunctional finishing
- 3 New approaches to produce UV protective textiles
- 4 Polymeric nanocomposites for antimicrobial finishing
- 5 Self cleaning of textiles using advanced nanoparticles
- 6 Silver nanoparticles in dyeing and finishing applications
- 7 Zinc Oxide prospects in textile industry
- 8 Titanium dioxide Next generation photo catalysts
- 9 Textile effluent using chitosan nanocomposites
- 10 Recent advances in remediation of textile effluents using nano catalysts

Natural Dyes for Sustainable Textiles Padma Shree Vankar, Dhara Shukla, 2023-09-05

Natural Dyes for Sustainable Textiles describes how manufacturing processes that are safer more energy efficient and more sustainable can be achieved through the use of natural dyes There are three main elements of sustainability they are economic social and environmental and natural dyes can make a positive contribution to all three A number of the textile industry s largest producers have adopted natural dyes as part of their bid to make their products more sustainable in response to consumer demand as well as their own consciousness of environmental issues This unique book draws on the latest research to provide practical technical advice on safer and greener processing of fabric minimizing the use of hazardous chemical dyes Details of preparation methods at stages including wet processing dyeing and effluent management are provided with specific information on how the methods improve efficiency as well as other advantages and limitations of each technology Provides case studies of how to switch from synthetic to natural dyes and what benefits resulted in real life Describes a practical chemical management system which involves natural dyes Examines use of high tech methods such as plasma and electron beam in textile surface modification

The Textile Industry J. Thomas Vogel, Barbara W. Lowry, 1989

Fundamentals of Natural Fibres and Textiles Md. Ibrahim H. Mondal, 2021-03-20

The textile industry is focused in its search for alternative green fibres with the aim of providing high quality products which are fully recyclable and biodegradable Natural textile materials from renewable sources play an increasingly important role in the industry due to their unique properties and functionality over synthetic fibres as well as their sustainability

Fundamentals of Natural Fibres and Textiles covers all the fundamental and basic information about natural fibres and textiles Many different fibres are covered from their origin through processing properties and applications The latest methods for characterisation and testing of natural fibres are all addressed with reference to cutting edge industry trends This uniquely comprehensive approach to the topic provides the ideal entry point to natural fibres for textile and clothing scientists engineers designers researchers students and manufacturers of such products Explains the characteristics of natural fibres to show how they compare to synthetic fibres for a range of purposes Provides an overview of the environmental impact of the processing of fibres and how this creates industrial waste Covers a wide range of natural fibres in detail from traditional silk and wool to electrospun biopolymers Provides the latest updates on technologies for designing natural fibres and applying them to the development of new products
