That Special Mother To Be From Pregnancy To Motherhood:

That Special Mother to Be Phyllis D. Alston, 1994-04 **Maternity Homes for Unmarried Mothers** Maud Morlock, Miss Hilary Campbell, 1946 *Mothers on the Job* Lise Vogel, 1993 Women's increasing demands for protection and benefits in the workplace especially with regard to maternity leave have sparked more than a century of controversy among feminists on how best to serve the needs of working women. This debate continues to divide the feminist community. One side believes women are better served by emphasizing equality with men; pregnancy should be treated like any other disability. The other side wants to recognize difference; special provisions should apply only to pregnant women. Lise Vogel examines the evolution of this debate on pregnant women in the workplace, looking at theoretical as well as practical implications. Vogel begins by assessing the history of the contemporary debate on pregnancy policy in the U.S. Since the middle of the nineteenth century, American women have been torn by the contradictory demands of motherhood and the workplace. Pregnancy was grounds for dismissal from work, and few employers took action to protect pregnant workers. To counter this, early twentieth-century feminists and reformers emphasized female specificity and women's special role. In the 1960s, activists adopted a strategy framed on equality, which moved away from the earlier emphasis on differences. The use of equality strategies to cover the female-specific phenomenon of pregnancy turned out to have problems. Now, women's special needs were denied and ignored. These difficulties and a series of court cases in the 1980s triggered debates in the feminist legal community. Vogel looks at the litigation and debates which pitted advocates of gender-neutral strategies against critics who called for female-specific policies. Vogel argues that in terms of practical benefits, women will be served best by a gender-neutral approach to pregnancy policy. She encourages equality advocates to recognize the inherent diversity of individuals and points out the need to be sensitive to individual factors of race and class as well as sex. **American Motherhood** Della Thompson Lutes, 1905 **Reconstructing Motherhood and Disability in the Age of Perfect Babies** Gail Landsman, 2008-08-18 Examining mothers of newly diagnosed disabled children within the context of new reproductive technologies and the discourse of choice, this book uses anthropology and disability studies to revise the concept of normal and to establish a social environment in which the expression of full lives will prevail. **Health Services for Unmarried Mothers** Elizabeth Herzog, Rose Bernstein, 1965 *Disabled Mothers: Stories and Scholarship By and About Mother with Disabilities* Gloria Filax, 2014-03-01 This collection of 18 scholarly works and personal accounts from Canada, the U.S., and Australia explores and analyzes issues of parenting by mothers with a variety of physical and mental disabilities. The book delves into pregnancy, birth, adoption, child custody, discrimination, and disability politics. Noticing dominant ideas, meanings, and narratives about mothering and disability as the contributors of this book do, exposes how the actual lives and experiences of mothers with disabilities are key to challenging cultural norms and therefore discrimination. **Healthy Mothers, Healthy Babies**, 1986 The types of findings included for each category include program characteristics, services, strategies, staffing, outreach.
