Author Vincent Havelund's new epic work of fiction explores how Earth's development has been intertwined with that of a distant planet called Orbsey. It all begins in the year 1 and races to its conclusion in the twenty-fourth century. As the people of Earth looked to the heavens in search of others, the people of Orbsey were doing more than just looking; they were planning. In this first book of the series, the adventure begins when two cultures, two peoples, two worlds meet at long last. Thanks to their mastery of fourth-dimensional travel, explorers from Orbsey reach Earth, and neither planet will ever be the same. Humanity is still a young and developing race in the year 1. To the visitors, humanity is a barbaric and wild race. What must humanity think of their new guests? In rural China, a bright, ambitious young girl by the name of Sun Li dreams of a life of fulfillment and even love. But when she begins to dream of a long life of 285 years on a distant planet, she could never have imagined that what appeared to be a dream was actually memories of a real life lived on Orbsey. Sun Li is not alone. She is one of countless humans who would be integrated into Orbsey's society over the centuries, while many chose to stay, some did return to Earth. This is their story, and the first installment of The Star Series.

[Deep-Sky Companions: The Caldwell Objects](#) Stephen James O'Meara, 2016-09-26 The Caldwell Catalogue, compiled by the late Sir Patrick Moore, 1923-2012, has delighted amateur astronomers worldwide since its publication in 1995. Twenty years on, Stephen James O'Meara revisits his guide to these 109 deep-sky delights, breathing new life into them and the 20 additional observing targets included as an appendix. This second edition retains O'Meara's detailed visual descriptions and sketches, accompanied by stunning new images taken by amateur photographer Mario Motta and observations by Magda Streicher. The astrophysical descriptions have been updated to account for the many advances in our understanding of the objects, not least due to an armada of space-borne observatories and the new technologies used in large ground-based telescopes. Ideal for observers who have completed the Messier objects and are looking for their next challenge, *Deep Sky Companions: The Caldwell Objects* is a fitting tribute from a renowned visual observer to one of astronomy's most famous personalities.
