The Aboriginal Story:

The Aboriginal Story of Burke and Wills Ian Clark, Fred Cahir, 2013-07-22 The Aboriginal Story of Burke and Wills is the first major study of Aboriginal associations with the Burke and Wills expedition of 1860-61. A main theme of the book is the contrast between the skills, perceptions and knowledge of the Indigenous people and those of the new arrivals and the extent to which this affected the outcome of the expedition. The book offers a reinterpretation of the literature surrounding Burke and Wills using official correspondence, expedition journals and diaries, visual art and archaeological and linguistic research and then complements this with references to Aboriginal oral histories and social memory. It highlights the interaction of expedition members with Aboriginal people and their subsequent contribution to Aboriginal studies. The book also considers contemporary and multi-disciplinary critiques that the expedition members were on the whole deficient in bush craft, especially in light of the expedition's failure to use Aboriginal guides in any systematic way. Generously illustrated with historical photographs and line drawings, The Aboriginal Story of Burke and Wills is an important resource for Indigenous people, Burke and Wills history enthusiasts and the wider community. This book is the outcome of an Australian Research Council project. **The Aboriginal Story** Ruth C. Williams, 1967 **The aboriginal story**, 1957

Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures Helaine Selin, 1997-07-31 The Encyclopaedia fills a gap in both the history of science and in cultural studies. Reference works on other cultures tend either to omit science completely or pay little attention to it, and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works. The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures' science. Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas. The Western academic divisions of science, technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected. This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity. The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today. There is nothing that crosses disciplinary and geographic boundaries, dealing with both scientific and philosophical issues to the extent that this work does. xi PERSONAL NOTE FROM THE EDITOR Many years ago I taught African history at a secondary school in Central Africa. The Story of Australia Louise Johnson, Tanja Luckins, David Walker, 2021-09-02 The Story of Australia provides a fresh, engaging and comprehensive introduction to Australia's history and geography.
