The Origins of Moral Theology in the United States Charles E. Curran, 1997-02-01 Charles E Curran presents the first in depth analysis of the origins of Catholic moral theology in the United States focusing on three significant figures in the late nineteenth century and demonstrating that methodological pluralism and theological diversity existed in the Church even then Curran begins by tracing the historical development of moral theology especially as presented in nineteenth century manuals of moral theology which offered a legal model of morality including a heavy emphasis on canon law He then probes the different approaches and ideas of three important writers Aloysius Sabetti a Jesuit who was a typical as well as the most influential American manualist Thomas J Bouquillon first chair of moral theology at Catholic University of America a neoscholastic who criticized the manuals approach as narrow and incomplete for failing to address principles virtues and the connection to systematic theology and clerical educator John B Hogan a casuist who developed a more inductive and historically conscious methodology Curran describes how all three men dealt in different ways with the increasing role of authoritative teachings in moral theology from the Vatican He also shows how they reflected their American context and the views of their own time on women and sexuality So little attention has been paid to the development of moral theology in this country that these authors are unknown to many scholars Curran s book corrects this oversight and proposes that the ferment revealed in their writings offers important lessons for contemporary Catholic moral theology

Andrew, 2001-12-15 Conscience and Its Critics is an eloquent and passionate examination of the opposition between Protestant conscience and Enlightenment reason in the seventeenth and eighteenth centuries Seeking to illuminate what the United Nations Declaration of Rights means in its assertion that reason and conscience are the definitive qualities of human beings Edward Andrew attempts to give determinate shape to the protean notion of conscience through historical analysis The argument turns on the liberal Enlightenment's attempt to deconstruct conscience as an innate practical principle The ontological basis for individualism in the seventeenth century conscience was replaced in the eighteenth century by public opinion and conformity to social expectations Focusing on the English tradition of political thought and moral psychology and drawing on a wide range of writers Andrew reveals a strongly conservative dimension to the Enlightenment in opposing the egalitarian and antinomian strain in Protestant conscience He then traces the unresolved relationship between reason and conscience through to the modern conception of the liberty of conscience and shows how conscience served to contest social inequality and the natural laws of capitalist accumulation **Dust that Breathes**
