Families in the U.S. Karen V. Hansen,Anita Ilta Garey,1998 Attempts to do justice to the complexity of contemporary families and to situate them in their economic political and cultural contexts This book explores the ways in which family life is gendered and reflects on the work of maintaining family and kin relationships especially as social and family power structures change over time

The Dignity of Dependence Leah Libresco Sargeant,2025-10-01 The Dignity of Dependence argues that women s equal rights depend on advocating for women as women The world is not ready to welcome women as women a culture that fears dependence and asks everyone to aim for autonomy and independence will always be a society hostile to women Women are expected to care for those around them while living in a society that despises need and penalizes those who care for the weak The Dignity of Dependence aims to liberate women and men from this corrosive and false ideal of the human person as strongest alone Leah Libresco Sargeant argues that to thrive human beings need to exist in webs of mutual dependence not in isolating radical autonomy Women s equal dignity doesn t require women to deny biological reality or attempt to be interchangeable with men Sargeant advocates for building a culture that accepts and celebrates women as they are rather than demanding that women keep their relationships and their bodies in check The fight for women s dignity is a fight for a full human dignity a dignity that isn t threatened by dependence It is our need for each other that makes us human

Shades of Loneliness Richard Stivers,2004-02-09 To varying degrees loneliness has us all in its grip In this incisive and controversial book Richard Stivers rejects the recent emphasis on genetic explanations of psychological problems arguing that the very organization of technological societies is behind the pervasive experience of loneliness The extreme rationality that governs our institutions

and organizations results in abstract and impersonal relationships in much of daily life Moreover as common meaning is gradually eroded our connections to others become vague and tenuous Our ensuing fear and loneliness however can be masked by an outgoing extroverted personality In its extreme form loneliness assumes pathological dimensions in neurosis and schizophrenia Stivers maintains that even here the causes remain social The various forms of neuroses and psychoses follow the key contradictions of a technological society For instance narcissism and depression reflect the tension between power and meaninglessness that characterizes modern societies Stivers demonstrates that there is a continuum from the normal technological personality through the various neuroses to full blown schizophrenia He argues that all forms of loneliness emanate from the same cause they likewise share a common dynamic despite their differences Loneliness in its many manifestations seems to be the price we must pay for living in the modern world Yet nurturing family friend and community ties can mitigate its culturally and psychologically disorganizing power This book is a clarion call for a renewal of moral awareness and custom to combat the fragmentation and depersonalization of our technological civilization Social Limits to Growth Fred Hirsch, 2025-09-15 Fred Hirsch's *Social Limits to Growth* is one of the sleeper hits of economics Its brilliant and acute insights informed by Hirsch's experience as a journalist at *The Economist* before turning to academia have become ever more relevant as liberal capitalism confronts challenges from austerity to the global race for scarce resources Hirsch makes the case for what he calls positional goods which derive their value from being scarce in ways that can't be relieved by technological advancement such as a Rembrandt painting a priceless antique or even an elite private education Crucially Hirsch says their value lies in the social position their ownership allows one to occupy He contrasts them with material goods such as flushing toilets opportunities to travel and high quality food There is no such positional status afforded by their ownership because despite a relatively high cost at their introduction soon everyone has them Once such material goods cease being luxuries people begin to want other things which Hirsch memorably and prophetically describes as the needs of the mind and psyche But these only serve to entangle us in an inescapable war between consumers as each of us strive to be better than average reflecting the very limits described by the title of Hirsch's book A devastating account of the way consumerism conspicuous consumption and the expectation to be better off than the last generation undermine the delicate social capital that has previously bound individuals and communities together *Social Limits to Growth* is a book whose message is more urgent now than on its first publication nearly fifty years ago This Routledge Classics edition includes a new Foreword by Daniel Halliday
