Linguistic Turns, 1890-1950 Ken Hirschkop, 2019-04-04 Linguistic Turns rewrites the intellectual and cultural history of early twentieth century Europe In chapters that study the work of Saussure Russell Wittgenstein Bakhtin Benjamin Cassirer Shklovskii the Russian Futurists Ogden and Richards Sorel Gramsci and others it shows how European intellectuals came to invest language with extraordinary force at a time when the social and political order of the continent was itself in question By examining linguistic turns in concert rather than in isolation the volume changes the way we see them no longer simply as moves in individual disciplines but as elements of a larger constellation held together by common concerns and anxieties In a series of detailed readings the volume reveals how each linguistic turn invested language as such with powers that could redeem not just individual disciplines but Europe itself It shows how in the hands of different writers language becomes a model of social and political order a tool guaranteeing analytical precision a vehicle of dynamic change a storehouse of mythical collective energy a template for civil society and an image of justice itself By detailing the force linguistic turns attribute to language and the way in which they contrast language as such with actual language the volume dissects the investments made in words and sentences and the visions behind them The constellation of linguistic turns is explored as an intellectual event in its own right and as the pursuit of social theory by other means
