Small Arms Big Impact The Next Challenge Of Disarmament:

Small Arms, Big Impact Michael Renner, 1998-07 **Small Arms and Security** Denise Garcia, 2006-09-27 This book examines the emergence of new international norms to govern the spread of small arms and the extent to which these norms have been established in the policies and practices of states regions and international organizations It also attempts to establish criteria for assessing norm emergence and to assess the process of norm development by comparing what actually happens at the multilateral level If norm making on small arms and related multilateral negotiations have mostly dealt with illicit arms and most of the norms examined here fall on the arms supplier side of the arms equation the author argues that the creation of international norms and the setting of widely agreed standards amongst states on all aspects of the demand for availability and spread of both legal and illegal small arms and light weapons must become central to the multilateral coordination of policy responses in order to tackle the growing violence associated with small arms availability Small Arms and Security will be of interest to researchers and professionals in the fields of peace and conflict studies global governance international security and disarmament The Global War on Your Guns Wayne R. LaPierre, 2006 *The Palgrave Handbook of Small Arms and Conflicts in Africa* Usman A. Tar, Charles P. Onwurah, 2021-04-05 This handbook provides critical analyses of the theory and practices of small arms proliferation and its impact on conflicts and organized violence in Africa It examines the terrains institutions factors and actors that drive armed conflict and arms proliferation and further explores the nature scope and dynamics of conflicts across the continent as well as the extent to which these conflicts are exacerbated by the proliferation of small arms The volume features rich analyses by contributors who are acquainted with and widely experienced in the formal and informal structures of arms proliferation and control and their repercussions on violence instability and insecurity across Africa The chapters dissect the challenges of small arms and light weapons in Africa with a view to understanding roots causes and drivers and generating a fresh body of analyses that adds value to the existing conversation on conflict management and peacebuilding in Africa With contributions from scholars development practitioners defence and security professionals and civil society activists the handbook seeks to serve as a reference for students researchers and policy makers on small arms proliferation control and regulation defence and security practitioners and those involved in countering violence and managing conflicts in Africa **Failed States and Institutional Decay** Natasha M. Ezrow, Erica Frantz, 2013-07-18 What do we mean by failed states and why is this concept important to study The failed states literature is important because it aims to understand how state institutions or lack thereof impact conflict crime coups terrorism and economic performance In spite of this objective the failed state literature has not focused enough on how institutions operate in the developing world This book unpacks the state by examining the administrative security judicial and political institutions separately By doing so the book offers a more comprehensive and clear picture of how the state functions or does not function in the developing world merging the failed state and institutionalist literatures Rather

than merely describing states in crisis this book explains how and why different types of institutions deteriorate Moreover the book illustrates the impact that institutional decay has on political instability and poverty using examples not only from Africa but from all around the world

The Power of Partnership Riane Eisler, 2010-09-03 Based on the research that brought international recognition to Riane Eisler's groundbreaking work *The Chalice and the Blade* but addressing the world as it is today *The Power of Partnership* offers inspiration and guidance for moving to the better lives we yearn for Eisler offers us a new lens a new paradigm for seeing the world and living in it The Partnership Model which emphasizes mutual respect and a fundamental awareness of the sacredness of all life creates a solid foundation for families businesses communities and the world In contrast the suffocating paradigm that has guided much of recorded history what Eisler calls the Domination Model has led individuals and groups acting out of fear to oppress women wage war terrorize and subjugate others Using these simple yet far reaching models Eisler shows how political and personal relationships based on domination inevitably result in misery and violence while those founded on partnership foster respect love and an explosion of creativity

Protean Power Peter J. Katzenstein, Lucia A. Seybert, 2018-01-18 Mainstream international relations continues to assume that the world is governed by calculable risk based on estimates of power despite repeatedly being surprised by unexpected change This ground breaking work departs from existing definitions of power that focus on the actors evolving ability to exercise control in situations of calculable risk It introduces the concept of protean power which focuses on the actors agility as they adapt to situations of uncertainty Protean Power uses twelve real world case studies to examine how the dynamics of protean and control power can be tracked in the relations among different state and non state actors operating in diverse sites stretching from local to global in both times of relative normalcy and moments of crisis Katzenstein and Seybert argue for a new approach to international relations where the inclusion of protean power in our analytical models helps in accounting for unforeseen changes in world politics

Fractured Cities Dirk Kruijt, Kees

Koonings, 2013-04-04 As cities sprawl across Latin America absorbing more and more of its people crime and violence have become inescapable From the paramilitary invasion of Medellin in Colombia the booming wealth of crack dealers in Managua Nicaragua and police corruption in Mexico City to the glimmers of hope in Lima this book provides a dynamic analysis of urban insecurity Based on new empirical evidence interviews with local people and historical contextualization the authors attempt to shed light on the fault lines which have appeared in Latin American society Neoliberal economic policy it is argued has intensified the gulf between elites insulated in gated estates monitored by private security firms and the poor who are increasingly mistrustful of state sponsored attempts to impose order on their slums Rather than the current trend towards government withdrawal the situation can only be improved by co operation between communities and police to build new networks of trust In the end violence and insecurity are inseparable from social justice and democracy

Terrorism and Transnational Security Threats in West Africa: Adebayo E. Adeyemi PhD, 2015-09-18 While it could be arguably stated

that West Africa has achieved remarkable and sustainable progress in the areas of democratic governance and economic growth the subregion over the past few years has been challenged by terrorism and other transnational security threats Innocent civilians are continuously killed security operatives and providers of humanitarian assistance are targeted and properties and infrastructures are wantonly destroyed thus culminating in significant displacement of people and acute poverty If these developments are not carefully and timely addressed they are capable of eroding progress so far recorded It is against this background that this book examines the different manifestations of terrorism and related transnational security challenges in West Africa with a view to exploring the internal and external sources and drivers of instability establishing the linkages between terrorism and transnational threats and reviewing the various steps taken in recent time to strengthen the subregions capacity to prevent and address the menace of terrorism and other security challenges and make necessary policy recommendations based on comprehensive best practices *Gun Violence in America* Alexander

DeConde,2003 An in depth analysis of the folklore surrounding gun use and the state of the debate in today s political climate

Allies at Odds? T. Mowle,2004-10-28 Why despite their similar goals do the policy preferences of the European Union and United States diverge on so many multilateral issues To answer that question *Allies at Odds* thoroughly examines recent international efforts in arms control environmental protection human rights and military cooperation Evidence from 20 separate cases supports the expectations of the realist approach to international politics which focuses on the role of power above all Neither cultural factors nor international institutions have as much influence as some expect This finding was as true during the Clinton Presidency as during the Bush indicating that focusing on personalities overlooks more substantial and longer lasting differences between the Atlantic allies *How Corporations Hurt Us All* Dan Butts,2003 The recent accounting and corporate scandals of Enron WorldCom Tyco K Mart and McWane producer of cast iron water and sewer pipes which has killed 9 workers and injured 4600 more with impunity since 1995 and other greedy and lawless billion dollar behemoths are just the tip of the iceberg relative to the serious and pervasive harm that corporations and greed are doing to people communities the earth and to our children s and grandchildren s future *How Corporations Hurt Us All* examines many crises including how Big Oil billion dollar weapons contractors and unaccountable private firms like DynCorps are continuing dangerous and immoral Cold War policies by driving multiple wars and military operations our collapsing corporate health care system that restricts free speech stifles public debate and manipulates public opinion to serve narrow corporate and political goals Some of the world s largest multinational corporationsDExxonMobil 1 oil company Wal Mart 1 retailer HCA 1 hospital conglomerate Citigroup the world s 1 financial institution and other rogue operations are profiled in the book The good news is that there are effective approaches to all of these interrelated greed driven crises Even more hopeful are the corporate reform and global economic democracy movements representing thousands of dedicated citizens groups and millions fo individuals throughout the world Yet what is ultimately necessary to reverse global economic social and

environmental deterioration and eventual collapse insure world peace and security strength our weakened civil liberties and fulfill our human potential as the book explains is forging a broad consensus on a new bottom line or organizing principle for business and society **Terrorism and Political Violence in West Africa: a Global Perspective** Adebayo E.

Clausewitz and African War Isabelle Duyvesteyn, 2004-09-30 This book shows that wars that have hitherto been mainly interpreted as driven by economic resource ethnic or clan interests such as the conflicts in Liberia and Somalia in the early 1990s do have an overriding political rationale which revalidates Carl von Clausewitz s nineteenth century understanding of war **Light Weapons and Civil Conflict** Jeffrey Boutwell, Michael T. Klare, 1999 A common feature of conflict in the

1990s is death and suffering from small arms and light weapons The global diffusion of assault rifles machine guns mortars and rocket propelled grenades which can be easily carried by an individual or transported by a light vehicle has greatly intensified the violence of conflicts in countries around the world This book represents the perspectives of the foremost specialists on light weapons and it surveys the wide range of policy options open to the international community These include export and import controls law enforcement strategies to break up black markets collection and destruction of weapons following the end of conflict and efforts to illuminate how small arms and light weapons make their way to the killing grounds of the 1990s *The Logic of Humanitarian Arms Control and Disarmament* Nik Hynek, Anzhelika

Solovyeva, 2020-11-10 This novel and original book examines and disaggregates theoretically and empirically operations of power in international security regimes These regimes varying in degree from regulatory to prohibitory are understood as sets of normative discourses political structures and dependencies anarchies hierarchies and heterarchies and agencies through which power operates within a given security issue area with a regulatory effect In International Relations regime analysis has been dominated by several generations of regime theory theorization As this book makes clear not only has the IR Regime Theory been of limited utility for security domain due to its heavy focus on economic and environmental regimes

but it too heuristically suffered from its rigid pegging to general IR Theory It is not surprising then that the evolution of IR Regime Theory has largely been mirroring the evolution of IR Theory in general from the neo realist neo liberal institutionalist convergence regime theory through cognitivism to constructivist regime theory The commitment of this book is to remedy this situation by bringing together robust power analysis and international security regimes It provides the reader with a theoretically and empirically uncompromising and comprehensive analysis of the selected international security regimes which goes beyond one or another school of IR Regime Theory In doing so it completely abandons existing and piecemeal analysis of regimes within the intellectual field of IR based on conventional grand mid range theorization

Leashing the Dogs of War Chester A. Crocker, Fen Osler Hampson, Pamela R. Aall, 2007 The definitive volume on the sources of contemporary conflict and the array of possible responses to it *"Bodies, Borders, Believers"* Anne Hege Grung, Marianne Bjelland Kartzow, Anna Rebecca Solevag, 2016-05-26 This stimulating collection of essays by prominent scholars honours Turid Karlsen Seim Bodies Borders Believers brings together biblical scholars ecumenical theologians archaeologists classicists art historians and church historians working side by side to probe the past and its receptions in the present The contributions relate in one way or another to Seim's broad research interests covering such themes as gender analysis bodily practices and ecumenical dialogue The editors have brought together an international group of scholars and among the contributors many scholarly traditions theoretical orientations and methodological approaches are represented making this book an interdisciplinary and border crossing endeavour A comprehensive bibliography of Seim's work is included *State of the World*, 1995 **Terronomics** Sean S. Costigan, David Gold, 2016-03-16 Today no single issue dominates the global political landscape as much as terrorism Aware of their unique position in the newly unipolar world terrorist leaders have articulated that economic warfare is a key component of the new terrorist agenda Governments have accentuated the role of economic tools in their counter terrorism policies while maintaining emphasis on the application of military force or hard power even though such tools often prove unnecessarily blunt or even sorely inadequate Given the complexity of the global threat posed by modern transnational terrorist groups combating terrorism with a mix of hard and soft power is more important than ever As an invaluable new book in terrorism studies Terronomics brings together contributions from renowned international scholars and practitioners to provide a multifaceted view of contemporary financial counterterrorism and terrorist funding efforts It employs key concepts terms case studies and policy recommendations to advance our understanding of the threats and possible courses of action thus enabling us to grasp the critical financial and economic issues while providing potential counterterrorist strategies
