Small Party:

The Revolutionary Movement in Britain 1900-21 Walter Kendall, 2025-07-24 Kendall's classic work has been widely appreciated for its rich contextualisation of the events and forensic examination of both the national and international factors influencing the nativity of the British Communist Party. It imaginatively recuperates and critically evaluates the politics of the party's predecessors notably the British Socialist Party and the Socialist Labour Party, the radical upsurge of 1910-14, the wartime shop stewards movement, the resonance of the Russian Revolution and the role of the Comintern in moulding the form that British Communism took. Vivid portraits of the human actors H M Hyndman, John Maclean, Arthur MacManus and Theodore Rothstein illuminate the text. First published in 1969, *The Revolutionary Movement in Britain* has stood the test of time. It remains indispensable reading for everyone interested in understanding socialist history. John McIlroy has provided a detailed Introduction to this republication.

Taiwan During the First Administration of Tsai Ing-wen Gunter Schubert, Chun-yi Lee, 2021-10-21 This book offers a substantive assessment of the first Tsai Ing-wen administration, investigating different policy fields and issues from 2016 to 2020 prior to Tsai's election for a second term. Providing a balanced account of government performance under Tsai's Ing-wen's reign, chapters in this edited volume combine theory and extensive empirical data to highlight both achievements and shortfalls of her administration. Chapters range comprehensively from topics of the implementation of same-sex marriage, curriculum reform, transitional justice, industrial policy and pension reform, which have been celebrated by domestic Tsai Ing-wen supporters but have also met with considerable opposition from within Taiwanese society. Externally, cross-strait relations, the New Southbound Policy and the triangular relationship with China and the USA, which embodied major challenges for Tsai's first administration, are also analysed as key reference points throughout. Featuring contributions from twenty-six internationally renowned Taiwan scholars, *Taiwan During the First Administration of Tsai Ing-wen* is an essential resource for students and scholars of Taiwanese politics and society, cross-strait relations and international relations.

Hard not to be florid about this book Devoured in snippets or read straight through It presents amazing experiences and skills Because Marc Charles Nicolas has a brilliantly delicate appreciation for the idea of a sentence in a poem the juxtapositions of segments in these pages appear essentially to construct entire topics for mediation Examined along and the dawns increase and multiply inspirations love feelings locations events hitherto isolated are now all hooks and eyes into each other And because Marc Charles gets his inspiration from the muse you feel the exquisiteness and beauty buried in shattered phrases about the universality of poetry As a poet he belongs to a life larger than his own The life of genuine things And One more performance worth a word the poems in his book Perfumed Paradise are filled with aboutness Put together as they are they're seen to abound with roots their laughter or melancholy or ire has discernible reasons The humanness of poem writing as a hobby the splendid unavailability of it that is what this compilation brings together But floridity was to be kept away One cloudless day pace the anti sentimentalists life is short I sat in the sun and by a Brook with a friend and passed pages of this manuscript from side to side reading fragments aloud laughing quietly or looking grave occasionally thrilled and bemused A while back this was yet I remember no happier afternoon The poems were written originally in French 13 years ago in the year 1993 delicious remembrance fantastic book Virgo A Bernice **The Politics of Oligarchy** J. Péter Nádas,2023-11-21 The magnum opus of one of Europe s greatest living writers When telling one s life story to someone else one manufactures not chronicles but legends for oneself Péter Nádas writes in his fiction masterpiece Parallel Stories Now in his illuminating memoir Shimmering Details the renowned author investigates what it means to reconstruct a life without recourse to the techniques and embellishments of traditional storytelling Taking his firmly embedded memories the shimmering details that give this work its title as his starting point Nádas dissects them using a method inspired by Freudian dream interpretation Sounds scenes smells feelings all are probed for details that might allow him to reconstruct what happened and when and where To avoid conscious or unconscious distortions he deconstructs the stories of others too moving in concentric circles toward cause and effect until their meaning and significance come to light In Shimmering Details Volume I Nádas probes the history of his family from the late nineteenth century to his birth in 1942 and beyond In a work that encompasses World War II and the Hungarian Revolution Nádas traces the hidden connections between the seemingly random events of a life and assembles them into a memoir like no other

[The Politics of Electoral Systems](#)

Michael Gallagher,Paul Mitchell,2005-09-15 Electoral systems matter They are a crucial link in the chain connecting the preferences of citizens to the policy choices made by governments They are chosen by political actors and once in existence have political consequences for those actors They are an important object of study for anyone interested in the political process and in this book we subject them to systematic analysis In addition to some comparative chapters the book contains full accounts of the operation of electoral systems in 22 countries France the UK Germany Italy Israel Spain Austria Belgium Denmark Finland The Netherlands Ireland Hungary Russia Australia Canada India the USA Japan New Zealand Chile and South Africa The book provides detailed analyses of the operation of a diverse set of electoral systems in their national context Each chapter explains how the electoral system really works in the given country examining the strategic incentives the system provides to voters candidates and parties All country chapters have a common format and structure Successive sections analyse the institutional context how each electoral system was chosen historically how the current electoral system operates the rules mechanics and ballot structure and the political consequences of the current system the impact on the party system the internal life of parties and the impact on parliament and government formation Each country chapter then contains a final section which focuses on the politicization of electoral institutions In recent years many countries have changed their electoral systems either entirely or in part so there is a strong focus on the processes of electoral reform both historically and prospectively The book concentrates on the real world politics as well as the political science of electoral

systems The book will be of interest to those concerned with the practical political business of electoral reform The book contains a wealth of evidence about the performance of various kinds of proportional representation and of non PR systems This will be invaluable for anyone interested in the question What would be the best electoral system for my country

Cross-Level Inference Christopher H. Achen, W. Phillips Shively, 1995-05-20 In the last several years new disputes have erupted over the use of group averages from census areas or voting districts to draw inferences about individual social behavior Social scientists policy analysts and historians often have little choice about using this kind of data but statistical analysis of them is fraught with pitfalls The recent debates have led to a new menu of choices for the applied researcher This volume explains why older methods like ecological regression so often fail and it gives the most comprehensive treatment available of the promising new techniques for cross level inference Experts in statistical analysis of aggregate data Christopher H Achen and W Philips Shively contend that cross level inference makes unusually strong demands on substantive knowledge so that no one method such as Goodman s ecological regression will fit all situations Criticizing Goodman s model and some recent attempts to replace it the authors argue for a range of alternate techniques including extensions of cross tabular regression analysis and unobservable variable estimators

Departures from Post-colonial Authoritarianism Elke Grawert, 2009 This study sends the reader on an exciting journey into social and political life in Africa It gives space to the voices of Tanzanian villagers rural associations branches of political parties and local government officers and their views of socio economic and political change during the 1990s This authentic picture is combined with a thorough sociological and political economy analysis showing the dynamics in the relations between state components and social forces in the context of neo liberal globalization The book is not only attractive as a country case study It contains a deep analysis of the paradigmatic shift of African political systems from post colonial rule to governance in response to neo liberalism and provides new insights in processes of political transformation

Privileging Industry Fiona McGillivray, 2018-06-26 Why do some industries win substantial protection from the whims of international trade while others do not Privileging Industry challenges standard approaches to this question in its examination of when governments use trade and industrial policy for political goals Fiona McGillivray shows why aiding an industry can be a politically efficient way for a government to redistribute resources from one industrial sector to another Taking a comparative perspective that stands in contrast with the usual focus on U S trade politics she explores for example how electoral rules party strength and industrial geography affect redistribution politics across countries How do political institutions and the geographical dispersion of industries interact to determine which industries governments privilege What tests can assess how governments distribute assistance across industries Research has focused on the industries that legislators want to protect

but just as important is identifying those legislators able to deliver trade assistance. Assisting an industry requires both a will and a means. Whether an industry is a good vehicle through which to redistribute income depends on its geographic make up and the country's electoral system. In turn, the electoral system and party strength affect how legislators' preferences contribute to policy. McGillivray tests these arguments using a tariff-based empirical test and nonstandard dependent variables such as the dispersion of stock prices within fourteen different capital markets and government influence in the targeting of plant closures within declining industries.

Insight Turkey 2015 - Fall 2015 (Vol. 17, No. 4) , Last year was the year of elections in Turkey with two parliamentary elections and months long electoral campaigns that dominated the political agenda of the country. The parliamentary elections of June 7 2015 brought an end to the AK Party's 12 year long era of parliamentary majority and single party government in Turkey. Nevertheless the endeavors to form a coalition government could not be concluded successfully and another election appeared on the horizon. The country was ruled by an AK Party led interim government and the elections were repeated five months later on November 1 2015. While close in time the two elections were quite distant with regard to the political contexts in which they were carried out and in their respective results. The November elections witnessed a comeback for the AK Party which increased its votes by over 9 points with the addition of five million new votes in the ballot box.
