Third Series** Library of Congress. Copyright Office,1972 Women and Capital Punishment in the United States David V. Baker,2015-11-26 The history of the execution of women in the United States has largely been ignored and scholars have given scant attention to gender issues in capital punishment This historical analysis examines the social political and economic contexts in which the justice system has put women to death revealing a pattern of patriarchal domination and female subordination The book includes a discussion of condemned women granted executive clemency and judicial commutations an inquiry into women falsely convicted in potentially capital cases and a profile of the current female death row population *Merry and McCall Smith's Errors, Medicine and the Law* Alan Merry,Warren Brookbanks,2017-04-03 There is an understandable tendency or desire to attribute blame when patients are harmed by their own healthcare However many cases of iatrogenic harm involve little or no moral culpability Even when blame is justified an undue focus on one individual often deflects attention from other important factors within the inherent complexity of modern healthcare This revised second edition advocates a rethinking of accountability in healthcare based on

science the principles of a just culture and novel therapeutic legal processes Updated to include many recent relevant events including the Keystone Project in the USA and the Mid Staffordshire scandal in the UK this book considers how the concepts of a just culture have been successfully implemented so far and makes recommendations for best practice This book will be of interest to anyone concerned with patient safety medical law and the regulation of healthcare
