Smooth Talkers The Linguistic Performance Of Auctioneers And Sportscasters:

Smooth Talkers Koenraad Kuiper, 1996 This book examines the contexts in which sportscasters and auctioneers speak and the characteristic techniques they employ in order to speak fluently These speakers were selected because they have the capacity to show what happens to speech when speakers are under memory and processing pressure from having to perform other tasks while they are speaking This volume offers a set of theories to explain how this speech comes into being and identifies the conditions which should be conducive to smooth talking It then tests the theories by recording transcribing and analyzing the speech which is produced in a variety of circumstances The major thematic contribution of the monograph is to suggest that the speech of fluent native speakers relies heavily on what might be termed the speaker's phrasal lexicon memorized phrases and clauses which are indexed for specific roles in speech Even in normal speech speakers are heavily reliant on formulae to speak in a native like manner rather than as foreigners might do who know the language perfectly but do not know the formulae appropriate to particular contexts Cross disciplinary in nature this volume provides a systematic linguistic treatment of formulaic speech offers a close analysis of the speech of sportscasters and auctioneers and explains why speakers resort to formulaic speech Of interest to scholars in communication linguistics popular culture and folklore

Psycholinguistics is an interdisciplinary field and hence relationships are at its heart First and foremost is the relationship between its two parent disciplines psychology and linguistics a relationship which has changed and advanced over the half century of the field s independent existence At the beginning of the 21st Century psycholinguistics forms part of the rapidly developing enterprise known as cognitive neuroscience in which the relationship between biology and behavior plays a central role Psycholinguistics is about language in communication so that the relationship between language production and comprehension has always been important and as psycholinguistics is an experimental discipline it is likewise essential to find the right relationship between model and experiment This book focuses in turn on each of these four cornerstone relationships Psychology and Linguistics Biology and Behavior Production and Comprehension and Model and Experiment The authors are from different disciplinary backgrounds but share a commitment to clarify the ways that their research illuminates the essential nature of the psycholinguistic enterprise English Grammar Pedagogy Barbara M.

Formulaic Language and New Data Elisabeth Piirainen, Natalia Filatkina, Sören Stumpf, Christian Pfeiffer, 2020-01-20 The existence of formulaic patterns has been attested to all languages of the world However systematic research in this field has been focused on only a few European standard languages with a rich literary tradition and a high degree of written norm It was on the basis of these data that the theoretical framework and methodological approaches were developed The volume shifts this focus by centering the investigation on new data including data from lesser used languages and dialects extra european languages linguistic varieties mostly used in spoken domains as well as at previous historical stages of language development Their inclusion challenges the existing postulates at both a theoretical and methodological level Areas of interest include the following questions What is formulaic in these types of languages varieties and dialects Are the criteria developed within the framework of phraseological research applicable to new data Can any specific types of formulaic patterns and or any specific features of regular already known types of formulaic patterns be observed and how do they emerge What methodological difficulties need to be overcome when dealing with new data

Handbook of Communication and Social Interaction Skills John O. Greene, Brant Raney Burleson, 2003 A comprehensive handbook covering social interaction skills skill acquisition in

the context of personal professional and public stages For scholars students in interpersonal group family health communication **Making Way in Corpus-based Interpreting Studies** Mariachiara Russo,Claudio Bendazzoli,Bart Defrancq,2017-10-24 This book presents a collection of state of the art work in corpus based interpreting studies highlighting international research on the properties of interpreted speech based on naturalistic interpreting data Interpreting research has long been hampered by the lack of naturalistic data that would allow researchers to make empirically valid generalizations about interpreting The researchers who present their work here have played a pioneering role in the compilation of interpreting data and in the exploitation of that data The collection focuses on both of these aspects including a detailed overview of interpreting corpora a collective paper on the way forward in corpus compilation and several studies on interpreted speech in diverse language pairs and interpreter mediated settings based on existing corpora **The Mental Corpus** John R. Taylor,2012-05-04 This book presents a radical reconceptualization of the nature of linguistic knowledge John Taylor challenges the conventional notion that a language can be understood in terms of the interaction of syntax with a lexicon the second listing the words and the first the rules for combining them He proposes instead that an individual s knowledge of a language can be thought of as a repository of memories of linguistic experience Each encounter with the language he argues leaves a trace in our minds We record the forms of utterances the concepts and interpretations associated with them and the contexts in which they were heard or seen Features of incoming language a word a phrase a meaning a voice quality an interactional situation resonate with items already stored Similarities between stored items give rise to generalizations of varying degrees of certainty and precision which in turn are able to sanction new and innovative expressions John Taylor writes with conviction clarity and wit illustrating every stage of his argument with arresting examples His account makes a profound and original contribution to understanding the nature of language and the operations of the mind and brain His book will appeal in equal measure to linguists philosophers and cognitive scientists

Creativity and Convention Rosa E. Vega Moreno,2007-08-15 This book offers a pragmatic account of the interpretation of everyday metaphorical and idiomatic expressions Using the framework of Relevance Theory it reanalyses the results of recent experimental research on figurative utterances and provides a novel account of the interplay of creativity and convention in figurative interpretation showing how features emerge during metaphor comprehension and how literal meaning contributes to idiom comprehension The central claim is that the mind is rather selective when processing information and that in the pragmatic interpretation of both literal and figurative utterances this selectivity often results in the creation of new ad hoc concepts or the standardization of pragmatic routines With this approach the comprehension of metaphors and idioms requires no special pragmatic principles or procedures not required for the interpretation of ordinary literal utterances but follows from an automatic tendency towards selective processing which is itself a by product of Sperber and Wilson s Cognitive Principle of Relevance **Phraseology and Culture in English** Paul Skandera,2008-08-22 The

proposition that there is a correlation between language and culture or culture specific ways of thinking can be traced back to the views of Herder and von Humboldt in the late 18th and early 19th centuries It is generally accepted today that a language especially its lexicon influences its speakers cultural patterns of thought and perception in various ways for example through a culture specific segmentation of the extralinguistic reality the frequency of occurrence of particular lexical items or the existence of keywords or key word combinations revealing core cultural values The aim of this volume is to explore the cultural dimension of a wide range of preconstructed or semi preconstructed word combinations in English The 17 papers of the volume are divided into four sections focusing on particular lexemes e g enjoy and its collocates types of word combinations e g proverbs and similes use related varieties such as the language of tourism or answering machine messages and user related varieties such as Aboriginal English or African English The sections are preceded by a prologue tracing the development of the study of formulaic language and followed by an epilogue which draws together the threads laid out in the various papers The relation between language and culture in general has been explored in a number of important works over the past ten years However the study of the relation between English phraseology and culture in particular has been largely neglected This volume is the first book length publication devoted entirely to this topic

Metaphor in Specialist Discourse J. Berenike Herrmann, Tony Berber Sardinha, 2015-12-15 Metaphor in Specialist Discourse presents multiple perspectives on metaphor use in specialist and popularized discourse contexts Using genre and register as starting parameters for deeper exploration and pushing the boundaries further to open up new areas and possibilities ten independent articles investigate metaphor use across a range of specialist domains of discourse such as biology research articles psychological counseling soccer commentaries workfloor communication and penal policy documents Framed by two theoretical chapters the book is a contribution to the study of metaphor use in distinct discourse settings that will be of value to linguists and metaphor scholars of different persuasions graduate students of linguistics and related disciplines and practitioners of specialized areas with an interest in verbal or gestural language use in their areas of expertise It shows that aspects of discourse variation are the beginning of not an afterthought to accurate empirical metaphor studies
