International Transactions In Services Karl P Sauvart, 2020-01-29 This book focuses on the international politics of transborder data flows It examines the rise of data services and the impact of these services on international economic transactions The book looks at trade and foreign direct investment in services and reviews the policy position of the U S

International Trade in Services and Domestic Regulations Panagiotis Delimatsis, 2007-12-27 This book examines the regulation of services within the WTO It examines the problem of reconciling a liberal system of trade in services with national governments ability to protect social values through service regulation The book analyses the existing legal framework and assesses the potential of ongoing trade negotiations

The Rise of Transparency in International Arbitration Alberto Malatesta , Rinaldo Sali, 2013-08-01 The Rise of Transparency in International Arbitration is inspired by a joint research conducted in the last years by the Milan Chamber of Arbitration and the Law School of the University Carlo Cattaneo LIUC Castellanza in Italy The two bodies have shared a common concern in order to increase the use of international commercial arbitration and to develop a proper culture in the field the need for enhancing transparency and especially for a wider dissemination of arbitral awards The advantages of arbitration as the main alternative means of dispute resolution are well known and undisputed Privacy and confidentiality are among them and at the same time among the prevailing features of any arbitral proceedings However sometimes users have the feeling to deal with a close and too slow growing world The need if not the request for a greater accountability of the arbitral world in the whole is more and more widespread In this context the aim of this book is on the one hand to spur discussion and to shed new light on the traditional idea of confidentiality in international commercial arbitration and in some other figures alike Although this idea is sometimes founded upon sound reasons that cannot be ignored or totally set aside it must be reconsidered by taking into account the rise of transparency On the other hand a specific proposal is made in order to step ahead from the current situation with particular reference to the issue of the publication of the awards In this respect the main outcome is the Guidelines for the Anonymous Publication of Arbitral Awards already adopted and experienced by the Milan Chamber They are addressed to institutions practitioners scholars with the goal to favor the circulation of the awards and of the related decisions

The Limits of Transparency Jacqueline Best, 2007 Jacqueline Best has developed a novel theoretical framework to more fully comprehend the role of ambiguity in international governance

International Trade in Services Olivier Cattaneo, Michael Engman, Sebastian Sez, Robert M. Stern, 2010-06-24 The services sector is key to economic growth competitiveness and poverty alleviation Comprising more than two thirds of the world economy services are now commonly traded across borders helped by technological progress and the increased mobility of persons In recent years a number of developing countries have looked at trade in services as a means to both respond to domestic supply shortages and to diversify and boost exports Any country can tap into the trade potential of services but not every country can become a services hub across sectors The

opening of the services sector potentially comes with large benefits but also fears and costs that should not be overlooked This book provides useful guidelines for the assessment of a country s trade potential and a roadmap for successful opening and export promotion in select services sectors It looks at both the effects of increased imports and exports and provides concrete examples of developing country approaches that have either succeeded or failed to maximize the benefits and minimize the risks of opening It focuses on sectors that have been rarely analyzed through the trade lens and or have a fast growing trade potential for developing countries These sectors are accounting construction distribution engineering environmental health information technology and legal services This book is designed for non trade specialists to understand how trade can help improve access to key services in developing countries and for trade specialists to understand the specific characteristics of each individual sector It will be a useful tool for governments to design successful trade opening or promotion strategies and for the private sector and consumers to advocate sound domestic policy reforms accompanying an offensive trade agenda
