Some Problems Of Development Financing The Turkish First Fiveyear Plan 19631967:

Some Problems of Development Financing M. Durdag, 2012-12-06 This study originally a Ph D thesis accepted in the University of Birmingham is intended to present a critical analysis of some important problems of development financing The boundaries of our subject matter will be defined as follows First of all the discussion will be confined to the problems of a particular country Turkey during a particular period of time the period of the First Five Year Development Plan of 1963-67 Secondly the problems to be discussed will be chosen from among those concerning the saving aspect of development financing It has now become a widely used method in the literature to assume a dichotomy between the saving and investing aspects of the process of development financing Thirdly even within the saving aspect of development financing no claim will be made to comprehensiveness Preference will be given to analyzing in depth a few main questions rather than touching upon everything concerning our subject The study begins with an introduction to the social and economic framework of Turkey in Chapter 1 in which emphasis is given to factors that bear upon the problems to be discussed in the following chapters

The Political and Economic Development of Modern Turkey William Hale, 2023-05-31 This book outlines the evolution of policy and the course of Turkey's economic development since the foundation of Turkey's republic in 1923 Turkey is a fast developing country with over the last seventy years a radically transformed economic and social structure The concept of planned development was first applied as long as fifty years ago long before other such approaches in the region Furthermore Turkey's post war economic development has proceeded in a rare environment of a predominantly liberal competitive political system This book is the first comprehensive and up to date study of Turkish economic development and its relationship to political change First published in 1981

Global Development Sara Lorenzini, 2022-07-26 In the Cold War development was a catchphrase that came to signify progress modernity and economic growth Development aid was closely aligned with the security concerns of the great powers for whom infrastructure and development projects were ideological tools for conquering hearts and minds around the globe from Europe and Africa to Asia and Latin America In this sweeping and incisive book Sara Lorenzini provides a global history of development drawing on a wealth of archival evidence to offer a panoramic and multifaceted portrait of a Cold War phenomenon that transformed the modern world Taking readers from the aftermath of the Second World War to the tearing down of the Berlin Wall Lorenzini shows how development projects altered local realities transnational interactions and even ideas about development itself She shines new light on the international organizations behind these projects examining their strategies and priorities and assessing the actual results on the ground and she also gives voice to the recipients of development aid Lorenzini shows how the Cold War shaped the global ambitions of development on both sides of the Iron Curtain and how international organizations promoted an unrealistically harmonious vision of development that did not reflect local and

international differences An unparalleled journey into the political intellectual and economic history of the twentieth century this book presents a global perspective on Cold War development demonstrating how its impacts are still being felt today

Employment and Growth: Issues for the 1980s A. Steinherr, D. Weiserbs, 2012-12-06 The papers published in this book were presented and discussed on occasion of the celebration of Albert Kervyn de Lettenhove's retirement on 29-30 May 1986 This conference was made feasible through the participation of a large audience and the generous financial support of the Commission of the European Communities The sessions were organised under three topics as are the papers in this book The first session chaired by Massimo Russo Director General Commission of the European Communities was devoted to an evaluation of past and current debates of central macro economic problems those of growth and business cycle stabilization The second session chaired by Jean Godeaux Governor of Belgium's National Bank looked at innovations in the conduct of monetary policy and the opportunities offered and problems associated with innovations in financial markets The last session chaired by Baron Michel Woitrin formerly Professor of Economics and Head Administrator of the Universite Catholique de Louvain contains several empirical analyses and policy proposals I 30 years ago growth theory was a very promising research field at the center of macroeconomics and macroeconomics was at the center of economics Robert Solow one of the major contributors to growth theory reexamines the pertinence of that body of theory to problems of our times A Steinherr and D Weiserbs eds Employment and Growth Issues for the 1980s ISBN 90 247 3514 9 Socialism: Institutional,

Philosophical and Economic Issues S. Pejovich, 2012-12-06 It was Lenin's genius to recognize the importance of socialist system with all the trappings of embellishing the democracy If the people want a constitution give them one and even include the bill of rights If they want a parliament give them that too And a system of courts If they want a federal system create that myth as well Above all let them have elections for the act of voting is what the common man most clearly associates with democracy Give them all these but make sure that they have no effect on how things are run G Warren Nutter Most research by Western scholars has emphasized macroeconomics and to a considerable extent still does as the method of analysis and growth rates as a standard for evaluating the performance of different economies In the early 1960s Nutter raised questions about the reported growth rates in socialist states the importance of growth policies for human welfare and the ability of macroeconomists to enhance our understanding of social and economic processes In his work Nutter used the standard price theory adjusted to incorporate the incentive effects of property rights in resources He was castigated for defying the traditions of wisdom Not surprisingly history has validated Nutter's theoretical framework and his conclusions

Stabilization and Privatization in Poland K. Poznanski, 2012-12-06 Stabilization and Privatization An Economic Evaluation of the Shock Therapy Program is the first comprehensive account of Poland's economic transition since mid 1989 Monetary stabilization trade liberalization including convertibility and privatization of state capital assets are discussed Sources of economic recession which have accompanied the post 1989 transition are analyzed The role of demand side

factors i.e monetary contraction is weighed against that of supply side factors i.e credit availability The prevailing view is that the recession has been supply type rather than demand type Economic performance has been impacted by the lack of a proper institutional framework e.g a segmented banking sector diluted property rights Arguments in favor of evolutionary reforms and market enhancing measures are presented Stabilization and Privatization examines the main components of Poland's shock therapy program implemented in 1990 Post shock recession lasting at least through 1992 is examined to establish whether a sharp decline in output was caused by excessive demand contraction or lack of accommodating credit policies The merits of an evolutionary approach and a more proactive state are debated

Output Decline in Eastern Europe R. Holzmann, János Gács, G. Winckler, 2012-12-06 The first phase of transition to a market economy in Central and Eastern Europe was characterized by a sharp output decline The fall in real GDP exceeded 20% while real industrial production decreased even by 40% Output Decline in Eastern Europe aims at providing comprehensive multi factor explanations for this unique painful experience Various hypotheses are analyzed credit and fiscal policies may have been too tight the collapse of the CMEA and the USSR came as a shock domestic producers were neither experienced nor flexible enough to adjust the output to new patterns of demand Output Decline in Eastern Europe contains a unique combination of authors from East and West who extensively analyze new data based on country studies Understanding the causes of recent output decline the subject matter of this volume may help to assess the prospects for Eastern Europe The book is addressed to researchers and students as well as interested officials who deal with the transition of formerly centrally planned economies in Central and Eastern Europe

Privatizing Eastern Europe J.M. Van Brabant, 2012-12-06 This volume is meant to be a modest contribution to the ongoing debate about the transitions away from the administrative planning environment typical of the former communist regimes The central subject matter is a fairly special one namely the privatization of these economies together with the restoration and effective monitoring of property rights These are paramount tasks of the ongoing transformations once progress toward political democracy is secured Though I would not allot divestment of existing state owned assets the kind of pivotal importance that some observers reserve for it changing rules on the utilization of these assets is evidently at the core of what the transition toward market based economic systems should be all about Rather than examining the entire range of issues that surround the controversy on privatization this volume is primarily concerned with the economics of taking the state out of the decision making about existing assets Among the several aspects of this discussion three stand out One is the establishment of clear property rights This is fundamental to minimize transaction costs in an environment where decisions will increasingly be taken by independent economic agents acting on their own account Second I look only incidentally at the various angles of creating capital markets particularly for existing assets in these economies
