Ijams' friend, Kris Light was busy photographing snowflakes yesterday and we are so glad she has allowed us to share her work with you! We love diversity in all things and these snowflakes are no exception!

Kris Light is the science outreach educator for the American Museum of Science and Energy in Oak Ridge. She enjoys using photography to share her love of nature. The snowflakes are caught on black velvet and photographed with a 105mm macro lens and a 36mm extender.

Davis, 1985 Lists over 5 200 titles of books published by American poets between 1973 and 1983 **The Last Crimson Snowflake** Mirko Jean George Stasiak, 2003-01-10 The spawn of the devil the elite of the Russian Red Army were playing football with what looked like a doll's head They were using the head of a newborn dead baby He tore himself away as his abdomen muscles contracted and reached to their maximum He felt sick but there was nothing more to give his stomach had been empty for days If a token gesture of defiance was required He finally bought up his own bile Humanity had reached the depths of hell This was a one way journey AND NONE OF THEM WERE COMING BACK **The New Humans** Jonathan G. Loree, 2011-06-29 The New Humans reveals the very real possibility that we as a people are already evolving into the next higher species of hominids The lives of the most advanced humans on Earth are portrayed as they struggle to survive in a post cold war government run institution designed with dark secrets Each member of this unique brotherhood is carrying a special ability that sets them apart from our world The recorded life of the most powerful man in existence is examined as he discovers when he is a boy that he has an advanced brain Tim Walker's evolved brain gives him the ability for higher cognitive thinking perceiving without the use of eyes and psychokinesis He realizes at a young age that he is superior to us in every way This knowledge coupled with his abilities makes Tim extremely dangerous to us as we try to cope with his existence Also as we learn and understand why nature created such superior humans we start to realize that we are not the true heirs of the planet Earth after all **A New Design for Living** Ernest Holmes, Willis H. Kinnear, 2010-09-02 Nothing lies beyond the scope of your ability The new design for living you create has no limitations Literally all the good things that life and the world offer are yours to have and enjoy But you need to recognize them accept them and incorporate them into the new design you are now going to create In its scope and in its effect on readers A New Design for Living is second only to Ernest Holmes's magnum opus The Science of Mind In this cherished spiritual classic Holmes demonstrates that wishes from health love and friendship to the career and home of your dreams are not only possible to realize but are within each person's very reach At last available again this galvanizing book teaches how to turn mind power into an infinitely positive force the very force of creation itself Harmonize with the beauty and intelligence of the universe watch the magnificence of life transform before you and awaken to the nature of reality With this newfound power of transformative thinking every goal is attainable Weekly Weather and Crop Bulletin, 1955 Final yearly issue includes index of special articles December through March issues contain reports of snow and ice conditions **New-Church Messenger**, 1914 Horizons, the Poetics and Theory of the Intermedia Dick Higgins, 1984 Written for the lay reader as well as for academic literary theorists this book bridges the gulf between the artistic avant garde in music visual arts and experimental literature and the general public Higgins delves into multiple areas but here is an example of one kind of poem he works with those pieces that move

like these pieces I say are snowflakes I say those pieces that move like these pieces Along with many other artists John Cage Merce Cunningham Robert Rauschenberg and Jackson Mac Low come to mind Dick Higgins has investigated and invented a variety of genres and forms working especially in intermedia the fusion of two or more discrete media His poetics travel some distance from the poetry of the past Here he uses the fusion of the receiver's and the artist's horizons their knowledge feelings experiences and imaginings to provide a vivid account of artistic experimentation over the last thirty years
