**A ^ACatholic Modernity?** James L. Heft, 1999-09-30

This book offers a series of reflections on the state of Christianity and especially Catholicism in the world today The centerpiece of the volume is a lecture by the renowned philosopher Charles Taylor from which the title of the book is taken The lecture delivered at Dayton University in January of 1996 offered Taylor the opportunity to speak about the religious dimensions of his intellectual commitment dimensions left implicit in his philosophical writing In fact this is the only place where Taylor a Roman Catholic spells out his theological views and his sense of the cultural placement of Catholicism its history and trajectory He uses the occasion to argue against the common claim that obstacles to religious belief in modern culture are epistemic that they have to do with the triumph of the scientific worldview The real obstacles says Taylor are moral and spiritual having to do with the historic failures of religious institutions Four well known commentators on religion and society two Protestant two Catholic were invited to respond to Taylor s lecture William M Shea George Marsden Jean Bethke Elshtain and Rosemary Luling Haughton Their chapters offer a variety of astute reflections on the tensions between religion and modernity and in particular on the role that Catholicism can and should play in contemporary society The volume concludes with Taylor s perceptive and thoughtful response to his interlocutors A Catholic Modernity provides one of the most thoughtful conversations to date about the place of the Catholic Church in the modern world and more generally about the role of religion in democratic liberal societies

**Science and Religion** Gary B. Ferngren, 2017-03-01

An essential examination of the historical relationship between science and religion Since its publication in 2002 Science and Religion has proven to be a widely admired survey of the complex relationship of Western religious traditions to science from the beginning of the Christian era to the late twentieth century In the second edition eleven new essays expand the scope and enhance the analysis of this enduringly popular book Tracing the rise of science from its birth in the medieval West through the scientific revolution the contributors here assess historical changes in scientific understanding brought about by transformations in physics anthropology and the neurosciences and major shifts marked by the discoveries of Copernicus Galileo Isaac Newton Charles Darwin and others In seeking to appreciate the intersection of scientific discovery and the responses of religious groups contributors also explore the theological implications of contemporary science and evaluate approaches such as the Bible in science and the modern synthesis in evolution which are at the center of debates in the historiography understanding and application of science The second edition provides chapters that have been revised to reflect current scholarship along with new chapters that bring fresh perspectives on a diverse range of topics including new scientific approaches and disciplines and non Christian traditions such as Judaism Islam Asiatic religions and atheism This

Gill, 2020-04-14 During the twentieth century theological and religious perspectives have been marginalized if not utterly excluded in many of our colleges and universities The essays in this book argue in different ways for the critical appreciative inclusion of theological and religious perspectives in higher education The contributors believe that even in our secular religiously disestablished era religion and God continue to occupy an important and dynamic role in personal and social life If our colleges and universities are to fulfill their higher aspirations of educating whole persons for the real world in all of its diversity and challenge we need to go bravely against the flow and give God tenure **The Mythopoetics of Currere** Mary Aswell Doll, 2018-04-19 In *The Mythopoetics of Currere* Doll uses depth psychology myth and literature to offer a new approach to currere the root of curriculum through essays exploring significant literary images that open doorways into the fictions that layer the self Offering a focus on the body queer love false belief strangeness otherness and chaos this book suggests new metaphors for understanding why currere is what matters most in curriculum **Theology Today** Patrick D. Miller, 2006-01-01 In this collection of his essays from the popular and respected journal *Theology Today* longtime editor Patrick D Miller offers insights into the basic human condition His reflections range from popular culture the popularity of *Seinfeld* to political matters the proper public role for the Ten Commandments to the sublime the connection between poetry and faith The wit and wisdom of this internationally respected biblical scholar come through clearly in this collection *The Interplay Between Scientific and Theological Worldviews* Niels Henrik Gregersen, Ulf Görman, Christoph Wassermann, 1999 *Extravagant Affections* Susan A.
