Biblical Theology of prayer in the New Testament Francois P. Viljoen, Albert J. Coetsee, 2023-08-31 This publication deals with a biblical theology of prayer based on the New Testament. It forms the second of a two-volume publication on a biblical theology of prayer dealing with the concept of prayer in the Old and New Testament respectively. This New Testament volume begins with an introduction on prayer and worship in early Jewish tradition followed by eleven chapters dealing with New Testament corpora. It concludes with a final chapter synthesising the findings of the respective investigations of the Old and New Testament corpora to provide a summative theological perspective of the development of the concept of prayer through scripture. Prayer forms a major and continuous theme throughout the biblical text. Prayer was an integral part of the religious existence of God's people in both the Old and New Testament. It underwent its greatest developments during and as a result of the Exile and was deepened and transformed in the New Testament. In both the Old and the New Testament God is the sole addressee of his people's prayer. This conviction continued into the New Testament but was broadened with Trinitarian elements of worship, adoration and intercession. A biblical theological investigation is chosen as methodology. Since all the biblical books form part of one canonical text the assumption is that the various theologies about prayer being displayed in these books can be synthesised into a developing meta-theology about prayer. As the Old and New Testament form part of the canonical text the results about prayer in the Old Testament can be brought into play with the results about prayer in the New Testament. This eventually leads toward an overarching biblical theology of prayer.

Tacitus' History of Politically Effective Speech Ellen O'Gorman, 2020-09-03 This study examines how Tacitus' representation of speech determines the roles of speakers within the political sphere and explores the possibility of politically effective speech in the principate. It argues against the traditional scholarly view that Tacitus refuses to offer a positive view of senatorial power in the principate while senators did experience limitations and changes to what they could achieve in public life they could aim to create a dimension of political power and efficacy through speeches intended to create and sustain relations which would in turn determine the roles played by both senators or an emperor. Ellen O'Gorman traces Tacitus' own charting of these modes of speech from flattery and aggression to advice, praise and censure and explores how different modes of speech in his histories should be evaluated not according to how they conform to pre-existing political stances but as they engender different political worlds in the present and future. The volume goes beyond literary analysis of the texts to create a new framework for studying this essential period in ancient Roman history much in the same way that Tacitus himself recasts the political authority and presence of senatorial speakers as narrative and historical analysis.
