Heumann, 2016-10-01 Godzilla a traditional natural monster and representation of cinema's subgenre of natural attack also provides a cautionary symbol of the dangerous consequences of mistreating the natural world monstrous nature on the attack Horror films such as Godzilla invite an exploration of the complexities of a monstrous nature that humanity both creates and embodies Robin L. Murray and Joseph K. Heumann demonstrate how the horror film and its offshoots can often be understood in relation to a monstrous nature that has evolved either deliberately or by accident and that generates fear in humanity as both character and audience This connection between fear and the natural world opens up possibilities for ecocritical readings often missing from research on monstrous nature the environment and the horror film Organized in relation to four recurring environmental themes in films that construct nature as a monster anthropomorphism human ecology evolution and gendered landscapes the authors apply ecocritical perspectives to reveal the multiple ways nature is constructed as monstrous or in which the natural world itself constructs monsters This interdisciplinary approach to film studies fuses cultural theological and scientific critiques to explore when and why nature becomes monstrous **Merchants of Menace** Richard Nowell, 2014-04-10 Even though horror has been a key component of media output for almost a century the genre's industrial character remains under explored and poorly understood Merchants of Menace The Business of Horror Cinema responds to a major void in film history by shedding much needed new light on the economic dimensions of one of the world's most enduring audiovisual forms Given horror cuts across budgetary categories industry sectors national film cultures and media Merchants of Menace also promises to expand understandings of the economics of cinema generally Covering 1930 present this groundbreaking collection boasts fourteen original chapters from world leading experts taking as their focus such diverse topics as early zombie pictures post WWII chillers Civil Rights Era marketing Hollywood literary adaptations Australian exploitation torture porn Auteurs and twenty first century remakes

Entomology at the Land Grant University Kevin M. Heinz, Carlos Enrique Bográn, Raymond E. Frisbie, 2005. Insects affect the health and well-being of humans every day everywhere, so the entomology departments that study them make a crucial contribution to many aspects of life. Indeed, agricultural success in the United States and other countries depends upon the work of entomology departments within the land grant system at universities across the nation. Entomology at the Land Grant University is a thorough look at how entomology departments have adapted to shifting demographics, changes in land use patterns, environmental issues and advances in the life sciences. It also highlights the leadership of entomologists in their multifaceted roles as researchers, teachers and consultants. With world-renowned contributors from both academia and industry, this volume is the culmination of a series of mini symposia celebrating the 100th anniversary of the Department of Entomology at Texas A M University. The centenary was a time to reflect on past accomplishments and to plan for future challenges, spotlighting the academic, scientific, economic and social importance of entomology. The result is a broad-brushed picture of a discipline that at its best represents the highest virtues of fundamental and applied science, with topics such as fulfilling the land grant university mission, roles of entomology departments, the function of the extension service, the global reach of entomological research, civic education in insect management, genetic engineering, future innovations in pest management and insecticide design. Not just for entomologists, this insightful look into the workings of a university department within the context of a rapidly changing scientific, social and economic climate will appeal to anyone associated with a land grant university, extension or regulatory agency or related industry.
