The Abbey And After:

Ecclesiastical Lordship, Seigneurial Power and the Commercialization of Milling in Medieval England Adam Lucas, 2016-04-29 This is the first detailed study of the role of the Church in the commercialization of milling in medieval England Focusing on the period from the late eleventh to the mid sixteenth centuries it examines the estate management practices of more than thirty English religious houses founded by the Benedictines Cistercians Augustinians and other minor orders with an emphasis on the role played by mills and milling in the establishment and development of a range of different sized episcopal and conventual foundations Contrary to the views espoused by a number of prominent historians of technology since the 1930s the book demonstrates that patterns of mill acquisition innovation and exploitation were shaped not only by the size wealth and distribution of a house s estates but also by environmental and demographic factors changing cultural attitudes and legal conventions prevailing and emergent technical traditions the personal relations of a house with its patrons tenants servants and neighbours and the entrepreneurial and administrative flair of bishops abbots priors and other ecclesiastical officials My Life in the Madhouse Judy Pierson, 2007

Church Music and Protestantism in Post-Reformation England Jonathan Willis, 2016-05-23 Church Music and Protestantism in Post Reformation England breaks new ground in the religious history of Elizabethan England through a closely focused study of the relationship between the practice of religious music and the complex process of Protestant identity formation Hearing was of vital importance in the early modern period and music was one of the most prominent powerful and emotive elements of religious worship But in large part traditional historical narratives of the English Reformation have been distinctly tone deaf Recent scholarship has begun to take increasing notice of some elements of Reformed musical practice such as the congregational singing of psalms in meter This book marks a significant advance in that area combining an understanding of theory as expressed in contemporary religious and musical discourse with a detailed study of the practice of church music in key sites of religious worship Divided into three sections Discourses Sites and Identities the book begins with an exploration of the classical and religious discourses which underpinned sixteenth century understandings of music and its use in religious worship It then moves on to an investigation of the actual practice of church music in parish and cathedral churches before shifting its attention to the people of Elizabethan England and the ways in which music both served and shaped the difficult process of Protestantisation Through an exploration of these issues and by reintegrating music back into the Elizabethan church we gain an expanded and enriched understanding of the complex evolution of religious identities and of what it actually meant to be Protestant in post Reformation England

The Dissolution of the Monasteries James G. Clark, 2022 The first account of the dissolution of the monasteries for fifty
years exploring its profound impact on the people of Tudor England This is a book about people though not ideas and as a
detailed account of an extraordinary human drama with a cast of thousands it is an exceptional piece of historical writing
Lucy Wooding Times Literary Supplement Shortly before Easter 1540 saw the end of almost a millennium of monastic life in
England Until then religious houses had acted as a focus for education literary and artistic expression and even the creation
of regional and national identity Their closure carried out in just four years between 1536 and 1540 caused a dislocation of
people and a disruption of life not seen in England since the Norman Conquest Drawing on the records of national and
regional archives as well as archaeological remains James Clark explores the little known lives of the last men and women
who lived in England s monasteries before the Reformation Clark challenges received wisdom showing that buildings were
not immediately demolished and Henry VIII s subjects were so attached to the religious houses that they kept fixtures and
fittings as souvenirs This rich vivid history brings back into focus the prominent place of abbeys priories and friaries in the
