Archaeologies of the Heart Kisha Supernant,Jane Eva Baxter,Natasha Lyons,Sonya Atalay,2020-02-13 Archaeological practice is currently shifting in response to feminist indigenous activist community based and anarchic critiques of how archaeology is practiced and how science is used to interpret the past lives of people Inspired by the calls for a different way of doing archaeology this volume presents a case here for a heart centered archaeological practice Heart centered practice emerged in care based disciplines such as nursing and various forms of therapy as a way to recognize the importance of caring for those on whom we work and as an avenue to explore how our interactions with others impacts our own emotions and heart Archaeologists are disciplined to separate mind and heart a division which harkens back to the origins of western thought The dualism between the mental and the physical is fundamental to the concept that humans can objectively study the world without being immersed in it Scientific approaches to understanding the world assume there is an objective world

to be studied and that humans must remove themselves from that world in order to find the truth An archaeology of the heart rejects this dualism rather we see mind body heart and spirit as inextricable An archaeology of the heart provides a new space for thinking through an integrated responsible and grounded archaeology where there is care for the living and the dead acknowledges the need to build responsible relationships with communities and with the archaeological record and emphasize the role of rigor in how work and research is conducted The contributions bring together archaeological practitioners from across the globe in different contexts to explore how heart centered practice can impact archaeological theory methodology and research throughout the discipline

The Source of All Things Reinhard Friedl,2025-08-22 In the tradition of Henry Marsh's Do No Harm Reinhard Friedl's The Source of All Things is a heart surgeon's personal investigation of the human heart moving from his riveting clinical experiences to a more poetic understanding of its workings The heart is our most important organ Yet despite that it has not changed since the appearance of Homo sapiens 300 000 years ago it is also our most mysterious In most human cultures it is seen as the source of love sympathy joy courage strength and wisdom What if the heart could answer questions neurosciences can't begin to Having witnessed the extraordinary complexity and unpredictability of human hearts in the operating theatre each one individual like a fingerprint heart surgeon Reinhard Friedl looked again at this primitive pump to reconcile it with his experiences from thousands of heart operations In this book he presents findings from various scientific disciplines such as secret connections of the heart and brain and their influence on emotions and consciousness He reveals the miracle that is the heart that we speak about so often yet is strangely foreign to many human beings Full of compelling patient stories The Source of All Things ends with a plea that we recognize the heart's wisdom and adopt a more heart centered way of living leading to greater health and more joy

Kaklauskas, Albert Tsun-Hung Chan, Monica Mansilla, 2020-06-15 *Existential Psychology East West* is a collection of chapters exploring existential psychology in a cross cultural context. The original version was published in preparation for the First International Conference on Existential Psychology held in Nanjing China in 2010. This revised and expanded edition includes several updated chapters as well as four new chapters. The book consists of three sections. The first section provides an introduction to existential humanistic psychotherapy along with a case illustration. Section two contains 13 chapters from Eastern and Western scholars exploring the theory of existential psychology. The third section contains 10 chapters building from Rollo May's work on myth. Each chapter explores the existential themes of a myth embedded within a particular cultural context. The book concludes with an Annotated Bibliography of important works in existential psychology. *Existential Psychology East West* is an important contribution to the field with many influential Eastern and Western scholars including Kirk Schneider, Xuefu Wang, Ilene Serlin, Mark Yang, Ed Mendelowitz, Heyong Shen, Erik Craig, Myrtle Heery, Alan G. Vaughan, Louis Hoffman, and Nathaniel Granger Jr. [The American Physician](#) Frank Kraft, 1902 *Pueblo Indian Religion* Elsie Worthington Clews Parsons, 1939-01-01. The rich religious beliefs and ceremonials of the Pueblo Indians of Arizona and New Mexico were first synthesized and compared by ethnologist Elsie Clews Parsons. Prodigious research and a quarter century of fieldwork went into her 1939 encyclopedic two volume work *Pueblo Indian Religion*. The author gives an integrated picture of the complex religious and social life in the pueblos including Zuni, Acoma, Laguna, Taos, Isleta, Sandia, Jemez, Cochiti, Santa Clara, San Felipe, Santa Domingo, San Juan, and the Hopi villages. In volume I she discusses shelter, social structure, land tenure, customs, and popular beliefs. Parsons also describes spirits, cosmic notions, and a wide range of rituals. The cohesion of spiritual and material aspects of Pueblo culture is also apparent in volume II which presents an extensive body of solstice, installation, initiation, war, weather, curing, kachina, and planting and harvesting ceremonies, as well as games, animal dances, and offerings to the dead. A review of Pueblo ceremonies from town to town considers variations and borrowings. Today, a half century after its original publication, *Pueblo Indian Religion* remains central to studies of Pueblo religious life. [Heart Disease Risks](#) Felicia Dunbar, AI, 2025-03-14. Worried about heart disease? *Heart Disease Risks* provides a comprehensive understanding of cardiovascular health, focusing on risk factors and prevention strategies. It empowers readers to take control through informed choices, highlighting that heart disease isn't inevitable but heavily influenced by modifiable factors like hypertension, high cholesterol, and smoking. Understanding the historical context of dietary shifts and medical advancements helps contextualize current approaches to heart health. The book explores the impact of factors like obesity and lack of exercise, detailing how dietary modifications and exercise regimens can mitigate risks. It emphasizes practical guidelines for creating personalized heart healthy plans, drawing from nutrition science, exercise physiology, and behavioral psychology. By presenting evidence-based information without complex jargon, the book guides readers through the complexities of cardiovascular care. Beginning with cardiovascular function basics, the book progresses through risk factor

analysis prevention strategies and lifestyle modifications It uniquely balances rigorous scientific research with actionable advice useful for anyone seeking to improve their cardiovascular health encouraging proactive management and informed decision making
