Earp, Elizabeth French, Melissa Gilkey, 2008-05-02 As a contribution to the emerging healthcare quality movement Patient Advocacy for Healthcare Quality Strategies for Achieving Patient Centered Care is distinct from any others of its kind in its focus on the consumer's perspective and in its emphasis on how advocacy can influence change at multiple social levels This introductory volume synthesizes patient advocacy from a multi level approach and is an ideal text for graduate and professional students in schools of public health nursing and social work

Meeting the Challenges of Elder Care Yayoi Saitō, Reiko Abe Auestad, Kari Wærness, 2010 Based on comparative and collaborative studies of Japanese and Norwegian specialists this book focuses upon the critical analysis of rationality of care with an empirical examination of care services in the two countries The book argues that elder care is not simply the act of labor but that of love and it looks at such aspects of care as home help new public management and social enterprise Predicated on the historical experience and contemporary reality of elder care in both countries the study confronts the commercial rationalization of care practices and explores their desirable forms

Ritual Healing in Suburban America Meredith B. McGuire, Debra Kantor, 1988 Many Americans believe that people who practice folk healing are uneducated and too poor to afford conventional medical care Contrary to this popular belief Meredith McGuire finds that a large number of college educated middle class suburbanites participate in a variety of nonmedical healing groups In suburban New Jersey people practice such diverse alternatives as psychic healing New Age therapies naturopathy Christian Science Transcendental Meditation reflexology acupuncture yoga Jain meditation Therapeutic Touch reflexology shiatsu rebirthing and occult therapies McGuire places these various healing groups into broader categories according to their traditional sources of inspiration and their beliefs about healing power She then looks at the participants diverse ideas about health and illness By locating alternative healing in the context of these beliefs she shows the many ways the adherents experience ritual healing From publisher's description

Healing Traditions Bonnie Blair O'Connor, 2010-08-03 The popularity and practice of alternative medicine continues to expand at astonishing rates In *Healing Traditions* Bonnie Blair O'Connor considers the conflicts that arise between the values and assumptions of Western scientific medicine and those of unconventional health systems Providing in depth examples of the importance and benefits of alternative health practices including the extraordinarily extensive and sophisticated HIV AIDS alternative therapies movement O'Connor identifies ways to integrate alternative strategies with orthodox medical treatments in order to ensure the best possible care for patients In spite of the long standing prediction that as science and medicine progressed and education became more generally available unconventional systems would die out they have persisted with undiminished vitality They have in fact experienced a reinvigoration and expansion during the last fifteen to twenty years In the United States this renewal is fueled by people representing a wide cross section of American society and most of them also use conventional medicine This eclecticism can result in conflicts between the values and assumptions of Western scientific medicine and those of unconventional health systems O'Connor demonstrates the importance of understanding how various belief systems interact and how this interaction affects health care She argues that through neutral observation and thorough description of health belief systems it is possible to gain an understanding of those systems to identify likely points of conflict among systems especially conflicts that may occur in conventional care settings and to intervene in ways that ensure the best possible care for patients

Gazing at Welfare, Gender and Agency in Post-socialist Countries Maija Jäppinen, Meri Kulmala, Aino

Saarinen,2010-10-12 The volume presents a new and unique view of welfare in Russia and Eastern European countries from an intersectional perspective of welfare gender and agency Since the collapse of socialism the welfare structures of the post socialist states have experienced large and rapid changes The discussions on the reforming welfare models serve as the integrating theme for the volume The authors discuss past and current developments and make comparisons in time and space between the early 1990s and late 2000s and between post socialist and transitional countries Welfare and political democratization are analyzed on the one hand as structures and processes and on the other hand as cultural meanings and through agency which all are strongly gendered Macro level analyses and in depth case studies by scholars from different countries and disciplines provide a wide and multilayered picture of welfare developments and gendered practices of social services caregiving and civic activism among others Special attention is given to research methodologies particularly on fieldwork and micro level understanding of the related topics The contributors come from social and political sciences and from both former socialist and Western countries from Russia and Slovenia as well as the US the UK Germany and Finland In their studies the authors examine various regions of Russia and other post socialist countries such as the Czech Republic Romania Moldova and Slovenia **Technical Report Series** ,1983 **Public Health Explored** John Ashton,2025-02-28 An understanding of public health has never been more important There has been a growing interest in public health driven by concerns for social justice and sustainability but it is currently in the headlines as never before The failure of governments to get to grips with the Covid 19 pandemic has demonstrated widespread ignorance of the basics of a public health approach to threats to health and well being Relevant to all interested individuals but particularly students and professionals within nursing medicine social work and public health this book encourages critical debate and reflection to develop a deep understanding of the complexities of public health issues It offers 50 powerful stories and sayings around public health that could just change the world Accompanied by searching questions for discussion and case studies that provide context and link each aphorism to a key event or theme important messages around public health are extracted and explored The Informal City Michel S. Laguerre,2016-07-27 In this book Michel S Laguerre argues that there exists an informal city located just beneath and in the interstices of the formal city The metaphor is not geographical but rather structural and hermeneutical This is the city where manoeuvres that cannot be done publicly legally ethically or otherwise are performed The author shows with illustrative data drawn from the American urban experience the San Francisco Oakland Metropolitan area why and how the informal city must be seen as the hidden dimension of the formal city Catholic Social Thought and Liberal Institutions Michael Novak,2017-07-12 Increasingly the religious leaders of the world are addressing problems of political economy expressing concern about the poor But will their efforts actually help the poor Or harm them Much depends Michael Novak asserts upon what kind of institutions are constructed that is upon realism and practicality His thesis may be simply stated Although the Catholic Church during the nineteenth and early twentieth centuries set itself against

liberalism as an ideology it has slowly come to admire liberal institutions such as democracy and free markets Between the Catholic vision of social justice and liberal institutions Novak argues there is a profound consonance but not identity Both celebrate realism respect for institutions and prudence or practical wisdom The Catholic tradition adds to liberal individualism a strong communitarian sense This book was first published in 1984 as *Freedom with Justice* This new edition adds both a lengthy introduction carrying forward the original argument and a long concluding chapter on Pope John Paul II's controversial new encyclical of early 1988 *Sollicitudo Rei Socialis*

Abundance of Life Harry R. Moody, 1988-07-21

Abundance of Life **Age of Fracture** Daniel T. Rodgers, 2012-09-03 In the last quarter of the twentieth century the ideas that most Americans lived by started to fragment Mid century concepts of national consensus managed markets gender and racial identities citizen obligation and historical memory became more fluid Flexible markets pushed aside Keynesian macroeconomic structures Racial and gender solidarity divided into multiple identities community responsibility shrank to smaller circles In this wide ranging narrative Daniel Rodgers shows how the collective purposes and meanings that had framed social debate became unhinged and uncertain *Age of Fracture* offers a powerful reinterpretation of the ways in which the decades surrounding the 1980s changed America Through a contagion of visions and metaphors on both the intellectual right and the intellectual left earlier notions of history and society that stressed solidity collective institutions and social circumstances gave way to a more individualized human nature that emphasized choice agency performance and desire On a broad canvas that includes Michel Foucault Ronald Reagan Judith Butler Charles Murray Jeffrey Sachs and many more Rodgers explains how structures of power came to seem less important than market choice and fluid selves Cutting across the social and political arenas of late twentieth century life and thought from economic theory and the culture wars to disputes over poverty color blindness and sisterhood Rodgers reveals how our categories of social reality have been fractured and destabilized As we survey the intellectual wreckage of this war of ideas we better understand the emergence of our present age of uncertainty
