Susan Forbes Martin, John Tirman

Social Suffering Hb:

Social Suffering Emmanuel Renault, 2017-10-11 There are various forms of suffering that are best described as social suffering such as stress harassment experience of poverty and domination Such suffering is a matter of social concern but it is rarely a matter of discussion in the social sciences political theory or philosophy This book aims to change this by making social suffering central to an interdisciplinary critical theory of society The author advances the various contemporary debates about social suffering connecting their epistemological and political stakes He provides tools for recasting these debates constructs a consistent conception of social suffering and thereby equips us with a better understanding of our social world and more accurate models of social critique The book contributes to contemporary debates about social suffering in sociology social psychology political theory and philosophy Renault argues that social suffering should be taken seriously in social theory as well as in social critique and provides a systematic account of the ways in which social suffering could be conceptualised He goes on to inquire into the political uses of references to social suffering surveys contemporary controversies in the social sciences and distinguishes between economical socio medical sociological and psychoanalytic approaches before proposing an integrative model and discussing the implications for social critique He claims that the notion of social suffering captures some of the most specific features of the contemporary social question and that the most appropriate approach to social suffering is that of an interdisciplinary critical theory of society

Social and Interpersonal Dynamics in Pain Tine Vervoort, Kai Karos, Zina Trost, Kenneth M. Prkachin, 2018-07-18 This groundbreaking analysis moves our knowledge of pain and its effects from the biomedical model to one accounting for its complex psychosocial dimensions Starting with its facial and physical display pain is shown in its manifold social contexts in the lifespan in a family unit expressed by a member of a gender and or race and as observed by others These observations by caregivers and family are shown as vital to the social dynamic of pain as observers react to sufferers pain and as these reactions affect those suffering The book's findings should enhance practitioners understanding of pain to develop more effective individualized treatments for clients pain experience and inspire researchers as well Among the topics covered Why do we care Evolutionary mechanisms in the social dimension of pain When how and why do we express pain On the overlap between physical and social pain Facing others in pain why context matters Caregiving impact upon sufferers cognitive functioning Targeting individual and interpersonal processes in therapeutic interventions for chronic pain *Social and Interpersonal Dynamics in Pain* will be a valuable resource for clinicians who deal in pain practice and management as well as for students and researchers interested in the social interpersonal and emotional variables that contribute to pain the processes with which pain is associated and the psychology of pain in general

Brown,Svea Closser,2016-07 The editors of the third edition of the seminal textbook *Understanding and Applying Medical Anthropology* bring it completely up to date for both instructors and students The collection of 49 readings 17 of them new to this edition offers extensive background description and exposes students to the breadth of theoretical methodological and practical perspectives and issues in the field of medical anthropology The text provides specific examples and case studies of research as it is applied to a range of health settings from cross cultural clinical encounters to cultural analysis of new biomedical technologies and the implementation of programs in global health settings The new edition features a major revision that eliminates many older readings in favor of more fresh relevant selections a new section on structural violence that looks at the impact of poverty and other forms of social marginalization on health an updated and expanded section on Conceptual Tools including new research and ideas that are currently driving the field of medical anthropology forward such as epigenetics and syndemics new chapters on climate change Ebola PTSD among Iraq Afghanistan veterans eating disorders and autism among others recent articles from Margaret Mead Award

winners Sera Young Seth Holmes and Erin Finley along with new articles by such established medical anthropologists as Paul Farmer and Merrill Singer California Cultivator, 1905 **Rethinking Diabetes** Emily Mendenhall, 2019-07-15 In **Rethinking Diabetes** Emily Mendenhall investigates how global and local factors transform how diabetes is perceived experienced and embodied from place to place Mendenhall argues that the link between sugar and diabetes overshadows the ways in which underlying biological processes linking hunger oppression trauma unbridled stress and chronic mental distress produce diabetes The life history narratives in the book show how deeply embedded these factors are in the ways diabetes is experienced and re produced among poor communities around the world **Rethinking Diabetes** focuses on the stories of women living with diabetes near or below the poverty line in urban settings in the United States India South Africa and Kenya Mendenhall shows how women s experiences of living with diabetes cannot be dissociated from their social responsibilities of caregiving demanding family roles expectations and gendered experiences of violence that often displace their ability to care for themselves first These case studies reveal the ways in which a global story of diabetes overlooks the unique social political and cultural factors that produce syndemic diabetes differently across contexts From the case studies **Rethinking Diabetes** clearly provides some important parallels for scholars to consider significant social and economic inequalities health systems that are a mix of public and private with substandard provisions for low income patients and rising diabetes incidence and prevalence At the same time Mendenhall asks us to unpack how social cultural and epidemiological factors shape people s experiences and why we need to take these differences seriously when we think about what drives diabetes and how it affects the lives of the poor
