Approaches and Philosophical Implications Stefan Schmidt,Harald Walach,2013-11-19 This volume features a collection of essays on consciousness which has become one of the hot topics at the crossroads between neuroscience philosophy and religious studies Is consciousness something the brain produces How can we study it Is there just one type of consciousness or are there different states that can be discriminated Are so called higher states of consciousness that some people report during meditation pointing towards a new understanding of consciousness Meditation research is a new discipline that shows new inroads into the study of consciousness If a meditative practice changes brain structure itself this is direct proof of the causal influence of consciousness onto its substrate If different states of consciousness can be linked with properties and states of the brain this can be used to study consciousness more directly If the sense of self is modifiable through meditative techniques and this can be objectively shown through neuro imaging this has profound implications for our understanding of who we are Can consciousness in deep states of meditative absorption actually access some aspect of reality which we normally don t Meditation research can potentially foster us with a new access to the phenomenological method in general This has even been branded with a new catch phrase Contemplative Science It brings together the most modern

neuroscientific approach and the most advanced phenomenological methodology of studying the mind from within through highly skilled self observation that has gone through many thousand hours of honing the capacity to look carefully without distraction This book addresses these issues by bringing together some of the leading researchers and thinkers in the field The scope of the volume reaches from first person neuroscience to Indian philosophy from pedagogic applications to epistemological aspects and from compassion meditation to the study of brain activity

Sanatana Dharma and Plantation Hinduism (Second Edition Volume 2) Ramesh Gampat, 2020-01-06 Christian Missionaries worked hard to convert immigrants Their first order of business was to denigrate Hinduism designate Hindus as heathen and disparage their culture food and even attire Immigrants stubbornly resisted led by the tiny educated elite including Brhmas whom we call Brahmins Conversion was a failure at least up to the end of the 19th century but picked up a self-generating momentum thereafter The result is that the share of Hindus in Guyana's Indian population declined from 83.5 percent in 1880 to 62.8 percent in 2012 The largest portion of the contraction was lost to Christianity The loss notwithstanding even a casual observer would conclude that Guyanese Hindus at home and in the Diaspora are a very religious people Many of us do a jhandi or havan once annually others do the more elaborate and costlier yajna where everyone is welcome once or twice in their lifetime Most of us do a short daily puja prayers offerings reading the stras and listening to bhajan in our homes An important but perhaps unintended way immigrants countered conversion to Christianity was an unplanned movement towards a synthesis that brought Hindus regardless of caste or sect under a unitary form of Hinduism The synthesis began around the 1870s and was

completed by the 1930s to the 1950s Guyanese Hindus call the unified corpus of religious beliefs and practices that emerged from the synthesis Sanatana Dharma Ramesh Gampat labels it Plantation Hinduism in this path breaking book The book argues that the brand of Hinduism practiced is inconsistent with Sanatana Dharma called Vednta by the more philosophically inclined Plantation Hinduism features an extraordinary dependence upon purohits pandits which has anaesthetized the Hindu mind and render him unable to think question and inquire when it comes to Dharma Rituals and bhakti have been degraded and turned into desire motivated worship devats have been misconstrued as Brahman rather than as limited manifestation of the one non dual pure Consciousness belief in the multiplicity of gods encourages image worship and superstitions anchor Guyanese Hindus to tradition and mere belief Plantation Hinduism is little more than desire motivated actions dogmas and superstitions Absent is the idea that Sanatana Dharma is a spiritual science no less scientific than hard sciences such as physics and astronomy The central message of Vednta is the innate divinity of every person and the freedom to realize that divinity through anubhava direct personal experience of Supreme Reality Many Mansions ,1992-01-31 The Harvard Divinity School professor recounts meetings with Hindu Buddhist Jewish and Marxist men and women and what they have taught him about the relationship between Christianity and other great religious traditions of the world **Unifying Force of Hinduism** Haripada Adhikary,2012-04-27 The contents of the book are based upon the materials collected through extensive and careful research for the preparation of a thesis for a higher degree for the Lancaster University It deals with the conception of Hindu religion its history and progress along with the gradual rationalization of the belief and practices with the time since Rigveda and its effect on the caste system Special attempt has been made to present many complex theological topics in a simpler way for the easy understanding of the young generation on whom the religion depends enormously for its future growth and expansion The vast amount of information has been accumulated here in a concise form to make it a useful reference book for the students of religious studies and sociology **Śrīmad-Bhāgavatam** A.
