

GEOGRAPHY, HISTORY, AND THE CITY IN EUROPE AND RUSSIA

JAMES H. BATER, *St. Petersburg: Industrialization and Change*, Studies in Urban History 4. Montreal: McGill-Queens University Press, 1976. Pp. 469.

The unity of geography and history was long accepted by historians. Geography was both the theatre of history and its ground. It was space conjoined with time, land with men and events. In Europe, this tradition was vigorously and creatively restated during the first half of the twentieth century. In the United States, during the same period, there was a parting of the ways of geography and history, a schism that is well known, although its explanation has never been clear. Geography became suspect to the American historian. He came to "glimpse the fields and gardens"¹ of this neighboring discipline, with its foliage of specializations far more dense than his own, and questioned the nature and importance of the geographer's work. For the Philistine, it was a rudimentary topic studied in grammar school; for the rest, the "relative lack of study of the relations between Geography and History" that Frederick Jackson Turner noted at an American Historical Association conference of 1907 devoted to that topic, and the highly skeptical conclusions that the same conference reached about the importance of geography for historical study, are facts that apply to most American historians seventy years later.²

Recently, they have been called upon to reconsider geography. This current encounter of the two disciplines may be seen largely as a by-product of the erosion since the 1960s of traditional historical method and the growing acceptance of new approaches to history emanating from the social sciences and from European as well as American

Underwater Archaeology Carol V. Ruppe, Jane F. Barstad, 2013-11-11 Although underwater archaeology has assumed its rightful place as an important subdiscipline in the field the published literature has not kept pace with the rapid increase in the number of both prehistoric and historic underwater sites The editors have assembled an internationally distinguished roster of contributors to fill this gap In addition to both geographical and topical approaches the chapters also focus on technology law public and private institutional roles and goals and the research and development of future technologies and public programs *Urban Historical Geography* Dietrich Denecke, Gareth Shaw, 1988-06-30 Originally published in 1988 this book provides a fascinating comparative review of research in urban historical geography in Britain and West Germany It draws together a wide range of material on the history of urban development to explore the theoretical and methodological possibilities offered by comparative surveys of contrasting national and regional urban expenses The chronological focus of the essays ranges in time from the medieval period onwards and the contributors explore not only the specifically intellectual consequences of their empirical research but also its policy implications for urban planners and conservationists Serious extended comparative debate has hitherto been absent from the field of urban historical geography as a whole this volume sought to reverse that trend and in so doing to establish a fresh research agenda for an important and expanding discipline

Curtains of Iron and Gold Heikki Eskelinen, Ilkka Liikanen, Jukka Oksa, 2019-01-15 First published in 1999 this book examines the construction of new political economic and mental borders in post Cold War Europe Various national and regional settings are analyzed along the old East West divide In post Cold War Europe the East West divide no longer exists in the form of the clear cut Iron Curtain separating two security blocs two politico economic systems and two ideologically and culturally distinct worlds Still it remains clearly discernible both in the form of unrelenting politico cultural differences and as an economic Golden Curtain At the same time a more complicated system of intersecting political economic and mental borders keeps developing Today there are various scales of interaction which produce distinctive national regional and local experiences of borders In this book the construction of new political economic and mental borders is analysed by specialists from both sides of the former East West divide The future of European borders is discussed in various national and regional settings from the Barents Region in the North to the Old Habsburgian lands in Mitteleuropa *Urbanism Past & Present* ,1981 **St. Petersburg** James H. Urban Problems and Planning in the Developed World (Routledge Revivals) Michael Pacione, 2014-06-03 This edited collection first published in 1981 presents a discussion of the urban problems faced in the developed world and addresses the plans and policies devised by governments to solve them Using a number of city based case studies including New York Tokyo and Glasgow the authors present a thorough analysis of urban problems and planning in relation to varying economic cultural and political conditions throughout the developed world With a detailed general survey from Michael Pacione this is a comprehensive and relevant guide which will be of particular value to students and scholars of urban planning and geography Mapping St. Petersburg Julie A. Buckler, 2007-04-08 Pushkin's palaces or Dostoevsky's slums Many a modern day visitor to St Petersburg has one or more likely both of these images in mind when setting foot in this stage set like setting for some of the world's most treasured literary masterpieces What they overlook is the vast uncharted territory in between In Mapping St Petersburg Julie Buckler traces the evolution of Russia's onetime capital from a conceptual hierarchy to a living cultural system a topography expressed not only by the city's physical structures but also by the literary texts that have helped create it By favoring noncanonical works and underdescribed spaces Buckler seeks to revise the literary monumentalization of St Petersburg with Pushkin and Dostoevsky representing two traditional albeit opposing perspectives to offer an off center view of a richer less familiar urban landscape She views this grand city the product of Peter the Great's ambitious vision not only as a geographical entity but also as a network of genres that carries historical and cultural meaning We discover the busy messy middle ground of this hybrid city through an intricate web of descriptions in literary works nonfiction writings such as sketches feuilletons memoirs letters essays criticism and urban legends lore songs and social practices all of which add character and depth to this refurbished imperial city Canadian - American Slavic Studies, 1977 A quarterly journal devoted to Russia and East Europe **Queen's Quarterly**, 1977

Bibliography of European Economic and Social History Derek Howard Aldcroft, Richard Rodger, 1993 This bibliographical guide contains 10 000 references to the economic and social history of 30 European countries during the period 1700 1939 More than 3000 periodicals have been consulted to obtain references as well as books edited collections and conference proceedings The information is listed in categories such as industry agriculture finance migration labour conditions urban communities and organizations Full publication details are included so that references may be located easily *Geschichte des Nicht-Essens* Norman Aselmeyer, Veronika Settele, 2018-06-25 Ernährung ist in Mode Gerade in Verzicht und Vermeidung von Nahrungsmitteln liegt heute das Heil für Mensch und Gesellschaft Wie kam es dass Essen entgegen seiner physiologischen Funktion zur Bedrohung von Gesundheit und Gesellschaft wurde Ende des 19 Jahrhunderts verbesserte sich

die Verfügbarkeit von Lebensmitteln in Industrieländern derart, dass die zuvor periodisch wiederkehrenden Hungersnöte überwunden waren. Nicht Essen stand nicht länger allein für Knappheit und Armut, sondern bekam als Ausdruck bewussten Handelns eine neue Bedeutung. Gesellschaften begannen sich entlang des Essensverzichts sozial und kulturell zu organisieren. Diäten und Schlanksein, Hungerstreik und Vegetarismus, Knappheit und Mangel, Gesundheitsvorsorge und Rationalisierung sind nur einige der im Band behandelten Themen, in denen das Nicht Essen historisch relevant wurde. Alle Spielarten des Nicht Essens erhellen Praktiken der Selbstverantwortung, staatliche Regulierung sowie individuelle und kollektive Sinnbildung und ermöglichen so gesellschaftliche Wandlungsprozesse zu entziffern. Der Band schreibt mit seinem kulturhistorischen Zugriff auf das Nicht Essen ein neues Kapitel der Essensgeschichte. Er richtet sich sowohl an Historiker und Historikerinnen als auch an all diejenigen Leserinnen und Leser, die sich für das Verhältnis von Individuum, Nahrung und Gesellschaft interessieren. *Humanistic Geography and Literature (RLE Social & Cultural Geography)* Douglas C. D.

Pocock, 2014-01-23 This book introduces the beginning student to the major concepts, materials and tools of the discipline of geography. While it presents geographic theory as a whole and for each of its parts, the chief emphasis is on concrete analysis and example rather than on abstraction, an approach which has proven more successful for undergraduate courses than those with a more heavily theoretical bias. The text was extensively rewritten for the third edition, which enhanced its clarity and effectiveness with expanded cartographic coverage. *The Post-Socialist City* Kiril Stanilov, 2007-08-13 In the large body of literature produced during the last fifteen years on the transformation of Eastern European societies after the fall of communism, studies investigating changes in urban form and structure have been quite rare. Yet a profound reorganization of the manner in which urban space is appropriated has taken place, impacting the life of over 200 million urban residents in the region. The patterns of spatial organization which have been established during this fairly limited but critical timeframe are likely to set the direction of future urban development in CEE cities for a long time. This book focuses on the spatial transformations in the most dynamically evolving urban areas of post-socialist Central and Eastern Europe, linking the restructuring of the built environment with the underlying processes and forces of socio-economic reforms. We hope that the detailed accounts of the spatial transformations in a key moment of urban history in the region will enhance our understanding of the linkages between society and space, adding to the knowledge that is needed for resolving the difficult challenges facing cities throughout the globe in the beginning of the twenty-first century. **Hooliganism** Joan

Neuberger, 2023-12-22 In this pioneering analysis of diffuse underclass anger that simmers in many societies, Joan Neuberger takes us to the streets of St. Petersburg in 1900-1914 to show us how the phenomenon labeled hooliganism came to symbolize all that was wrong with the modern city: increasing hostility between classes, society's failure to civilize the poor, the desperation of the destitute, and the proliferation of violence in public spaces.
