**Stability of International Exchange** United States. Commission on International Exchange, 1903      **Stability of International Exchange**, 1903      **Stability in International Finance** Frederick Betz, 2016-01-28 This book aims to explore stability in an international financial system using disequilibrium theory It examines historical cases of both instability and stability and reviews price disequilibrium theory to construct a theoretical model for a stable international financial system In the modern knowledge economy in a global world financial socio technical systems still continue to be central to global commerce Moreover technological advances in computer and communications have changed both the knowledge economy and the financial system While globalization and technology have made international finance more powerful and important to knowledge economies they have also increased the volatility instability and fraudulent use of international finance The international world has not experienced a long term stable financial system after 1913 International financial systems have been periodically unstable triggering financial crises and resultant economic depressions in different nations Yet the global economy cannot develop properly without a stable international system which distributes wealth to economically productive activities How then can a stable and modern international financial system be constructed In this provocative volume the authors applies the cross disciplinary analysis of societal dynamics to important economic writers to derive a new approach to the problem of stabilizing international financial systems      Reform Of The International Monetary System And Internationalization Of The Renminbi Ruogu Li, 2015-11-09 This book argues that only by reforming the international monetary system can we prevent financial crises in the future and the internationalization of the Renminbi China s national currency will be an important step in the process Just as the old saying goes An old building needs to be demolished before a new one can be erected in its place there will be no construction without destruction The commencement of the dismantling of the old monetary system is also the beginning of the construction of the new one Contrary to Western rhetoric which portrays China as part of the cause of the recent financial crisis the author contends that China is actually a victim of the current unjust international economic and monetary system To address the imbalance and break the dollar dominated international monetary system the author calls for the internationalization of the Renminbi and diversification of the international monetary system Written by one of the foremost financial practitioners in China this book is thought provoking and provides a unique Chinese perspective on how the international monetary system should be reformed what the future system should look like and the role China should play in the process It is a required reading for anyone interested in understanding China s own vision in its rise in the global political economic and financial systems      **China and the End of Global Silver, 1873-1937** Austin Dean, 2020-11-15 In the late nineteenth century as much of the world adopted some variant of the gold standard China remained the most populous country still using silver Yet China had no unified national currency there was not one monetary standard but many Silver

coins circulated alongside chunks of silver and every transaction became an encounter of wits China and the End of Global Silver 1873 1937 focuses on how officials policy makers bankers merchants academics and journalists in China and around the world answered a simple question how should China change its monetary system Far from a narrow technical issue Chinese monetary reform is a dramatic story full of political revolutions economic depressions chance and contingency As different governments in China attempted to create a unified monetary standard in the late nineteenth and early twentieth century the United States England and Japan tried to shape the direction of Chinese monetary reform for their own benefit Austin Dean argues convincingly that the Silver Era in world history ended owing to the interaction of imperial competition in East Asia and the state building projects of different governments in China When the Nationalist government of China went off the silver standard in 1935 it marked a key moment not just in Chinese history but in world history
