Democratic Consolidation in East-Central Europe Fritz Plasser, Peter Ulram, Harald Waldrauch, 2016-07-27 The postcommunist regimes in East Central Europe are confronted with the double challenge of establishing a democratic order and a market economy The book discusses the concepts of democratic consolidation and analyzes the development of attitudes towards the political and economic system in Poland Hungary the Czech Republic Slovakia and Slovenia The study compares the political values in East Central Europe with respective attitudes in the USA and Western Europe Special attention is given to experiences of the consolidation process in Germany Italy and Austria after 1945 as well as the more recent developments in Latin America and Southern Europe The final chapter discusses patterns and paths of democratic consolidation in the light of concepts of regime change

**Democratic Consolidation in Eastern Europe: Volume 1: Institutional Engineering** Jan Zielonka, 2001 This is the first volume in a series of books on democratic consolidation in Eastern Europe The series focuses on three major aspects of democratic consolidation in Eastern Europe institutional engineering transnational pressures and civil society This first volume analyses constraints on and opportunities of institutional engineering in Eastern Europe to what extent and how elites in Eastern Europe have been able to shape if not manipulate the politics of democratic consolidation through institutional means The aim is to contrast a set of democracy theories with empirical evidence accumulated in Eastern Europe over the last ten years The volume tries to avoid complex debates about definitions methods and the uses and misuses of comparative research Instead it tries to establish what has really happened in the region and which of the existing theories have proved helpful in explaining these developments The volume starts with a presentation of conceptual and comparative frameworks followed by in depth empirical analyses of the thirteen individual countries undergoing democratic consolidation The first conceptual and comparative part contains three chapters The first chapter explains what institutional engineering is about and describes our experiences with institutional engineering in former transitions to democracy It also focuses on the import and export of institutional designs The second chapter analyses the utility of constitutions in the process of democratic consolidation The third chapter compares constitutional designs and problems of implementation in Southern and Eastern Europe The empirical case studies deal with the following countries Estonia Latvia Lithuania Bulgaria Romania Ukraine Russia Belarus the Czech Republic Slovakia Slovenia Hungary and Poland And the conclusions evaluate the enormous impact of institutions on politics in Eastern Europe and show how central constitutional designs are to the institutional engineering in the societies undergoing transitions to democracy

**Democratic and Capitalist Transitions in Eastern Europe** M. Dobry, 2012-12-06 here of exchange and borrowing in debates between these disciplines all the more so as we shall see a little further on as the analysis of the Central and East European transformations has also contributed to introduce into political science and sociology theoretical systematizations first formulated in economics In addition to this opening up to the objects and theories of economics the

pseudo dilemma of simultaneity produced by a kind of feedback another series of effects on transitology and the related research domains Contrary to most expectations and predictions in the wake of the 1989 upheavals affirmations that the dilemmas problems or challenges of the transitions in Central and Eastern Europe ought to have been dealt with and resolved one after the other in sequence in the manner of the more or less idealized trajectories of Great Britain or Spain trajectories significantly enough promoted far beyond the circles of scholars as a model of transition and above all contrary to the assumption that superposing a radical economic transformation upon a transition to democracy would make the whole edifice thoroughly unworkable unstable or dangerous it must be stated clearly out that the two processes in their simultaneity are not necessarily incompatible This is one of the main findings stressed upon in several chapters of this book

Political Parties in Post-Communist Eastern Europe Paul Lewis, 2002-01-04 Political Parties in Post Communist Eastern Europe is the first textbook to survey the course of party developments in eastern Europe as a whole in the post Communist period This book relates the specifics of the post communist situation to the broader picture of the early stages of party development in western Europe and also to contemporary models of party organisation in established democracies The book includes a brief historical introduction to the context of post communist change the process of competitive party formation and democratic elections the development of independent parties their ideologies and electoral volatility the structure and level of organisation developed by new parties an analysis of stable party systems which have emerged in eastern Europe and the contribution they make to emerging democracies in the region Party Politics in Post Communist Eastern Europe will be a comprehensive and invaluable resource accessible to undergraduates of politics and European studies as well as the non specialist reader

**Regression of Democracy?** Gero Erdmann, Marianne Kneuer, 2013-06-21 Democratization since the implosion of the communist bloc displays a mixed balance While the neo democracies in Central Eastern European Countries can be seen as largely consolidated many other processes of democratization in other parts of the world such as Africa Asia and Latin America got stuck as unconsolidated or became defective democracies some regressed into hybrid regimes or were even turned into autocracies While transitology dealt with the transition from authoritarian rule the reverse process the transition from democratic rule remained almost completely outside the scholarly attention This special issue will address the problems of the regression of democracy and aims at closing the gap between research on democracy and democratization on one side and the emergence of authoritarian regimes on the other The contributions of this volume analyse the different phenomena in which decline of democracy fans out the loss of quality which means a silent regression the backslide into hybrid regimes hybridization and the breakdown of democracy

**Stabilising Fragile Democracies** Paul Lewis, Geoffrey Pridham, 2002-11 The first book to provide a systematic comparison of the democratic transitions in both Eastern and Southern Europe covering Italy Spain Greece Portugal Hungary Romania Poland and Bulgaria

**Democratic Institutions and Authoritarian Rule in Southeast Europe** Danijela Dolenec, 2017-05-19 Josip Broz Tito's saying that one should not

hold on to the law like a drunken man holds on to a fence remains a valid piece of popular wisdom today encapsulating the problem of weak rule of law in Southeast European societies This book poses the question of why democratisation in Southeast Europe disappointed initial expectations and claims that it is caused by the dominance of authoritarian parties over regime change Their rule established nondemocratic governance practices that continue to subvert rule of law principles more than twenty years after the collapse of communism The unique contribution of this book is in providing empirical evidence for the argument that post socialist transformation proceeded in a double movement whereby advances to formal democratic institutions were subverted through nondemocratic rule This misfit helps explain why improvements to formal democratic institutions did not result in expected democratisation advances **The Politics of Contemporary**

**Spain** Sebastian Balfour, 2005-07-08 While Spain is now a well established democracy closely integrated into the European Union it has suffered from a number of severe internal problems such as corruption discord between state and regional nationalism and separatist terrorism The Politics of Contemporary Spain charts the trajectory of Spanish politics from the transition to democracy through to the present day including the aftermath of the Madrid bombings of March 2004 and the elections that followed three days later It offers new insights on the main political parties and the political system on the monarchy corruption terrorism regional and conservative nationalism and on Spain's policies in the Mediterranean and the EU It challenges many existing assumptions about politics in Spain reaching beyond systems and practices to look at identities political cultures and mentalities It brings to bear on the analysis the latest empirical data and theoretical perspectives **Democratic Transitions** Sergio Bitar, Abraham F. Lowenthal, 2015-09-15

**Institutional Design and Party Government in Post-communist Europe** Csaba Nikolenyi, 2014 This book examines the institutional foundations of coalition government in the ten post communist democracies of Eastern and Central Europe for the 1990-2010 period Bulgaria the Czech Republic Estonia Hungary Latvia Lithuania Poland Romania Slovakia and Slovenia Its central argument is that differences in the arrangement of political institutions systematically explain variations in patterns of multi party government across these states The book starts with the premise that electoral systems and constitutional provisions about the powers the structure and the relationship between parliament and the presidency determine the degree to which political power is dispersed or concentrated in the political system On the basis of these institutional features three groups of states are distinguished with regard to their degree of power concentration the substantive chapters of the book demonstrate how these institutional combinations and differences shape three specific facets of party government which capture the main stages of the lifecycle of coalitions governments the formation of electoral coalitions government formation and government duration Specifically three comparative chapters assess the impact of institutional power concentration on the size of electoral coalitions the likelihood that political parties form a minority government and the number of days that a government lasts in office The main finding of the book is that power concentration matters political parties in those democracies where institutions are designed to concentrate political power tend to form large electoral coalitions they tend to form majority rather than undersized governments and they build more durable cabinets In addition the book contains a detailed case study of government formation in Hungary and a previously unstudied comparison of indirect presidential elections in four states the Czech Republic Estonia Hungary and Latvia Comparative Politics is a series for students teachers and researchers of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit [www.ecpr.net/eu](http://www.ecpr.net/eu) *Handbook of Party Politics* Richard S Katz, William J Crotty, 2006-01-26 The Handbook of Party Politics is the first book to comprehensively map the state of the art in contemporary party politics scholarship This major new work brings together the world's leading party theorists to provide an unrivalled resource on the role of parties in the pressing contemporary problems of institutional design and democratic governance today **Democratic**
