Computers in Fisheries Research Bernard A. Megrey, Erlend Moksness, 1995-12-31 In 1989 we were asked by Dr Vidar Weststad National Oceanographic and Atmospheric Administration National Marine Fisheries Service Alaska Fisheries Science Center Seattle USA to prepare and convene a session at the 1992 World Fisheries Congress in Athens Greece on computer applications in fisheries We agreed that the idea was a good one and the computer session turned out to be very successful The computer session was organized in three parts training classes informal demonstrations accompanied by posters and oral presentations of scientific papers We were both amazed by the high level of interest and the high quality of contributions presented at the paper session Returning from the World Fisheries Congress we suggested to the International Council for the Exploration of the Sea ICES in Copenhagen to hold a theme session on the topic Computers in Fisheries Research at their statutory meeting the following year in Dublin Ireland The proposal was very positively received by ICES and we began organizing this new meeting with Dr John Ramster of the Ministry of Agriculture Fisheries and Food Fisheries Laboratory Lowestoft England Based on our experience with the World Fisheries Congress we expected a maximum of 15 titles would be submitted to the ICES theme session Accordingly the ICES symposium was originally allocated one half day time slot The response we received from the call for papers however exceeded our most optimistic expectations A total of 62 abstracts were submitted Consequently
