Gay Men in Modern Southern Literature William Mark Poteet, 2006 The concept of masculinity has had a profound influence on modern gay written and gay-themed American Southern literature. Much of the fiction and drama of three important contemporary writers Tennessee Williams, Charles Nelson, and Reynolds Price has been shaped by the cultural dynamics of the Southern tradition of codified definitions and parameters of masculinity. This regional approach to literature also serves as critically protective, maintaining its focus in an effort to avoid essentializing experience and identity. *Gay Men in Modern Southern Literature* will be a valuable asset in the study of gender construction, literary theory, and modern American Southern writing. Shakespeare and the History of Soliloquies James E. Hirsh, 2003-06 Provides the first systematic and comprehensive account of the conventions governing soliloquies in Western drama from ancient times to the twentieth century. Over the course of theatrical history there have been several kinds of soliloquies. Shakespeare's soliloquies are not only the most interesting and the most famous but also the most misunderstood, and several chapters examine them in detail. The present study is based on a painstaking analysis of the actual practices of dramatists from each age of theatrical history.

This investigation has uncovered evidence that refutes long standing commonplaces about soliloquies in general about Shakespeare's soliloquies in particular and especially about the to be or not to be episode Shakespeare and the history of Soliloquies casts new lights on historical changes in the artistic representation of human beings and because representations cannot be entirely disentangled from perception on historical changes in the ways human beings have perceived themselves
