## **Stalins School Moscows Model School No 25 1931 1937:**

**Stalin's School** Larry E. Holmes, 2010-11-23 A different kind of history Stalin's School brings a unique human dimension to the Soviet Union of the 1930s and a new understanding of Stalinism as a cultural and psychological phenomenon From 1931 to 1937 School No 25 was the most famous and most lavishly appointed school in the Soviet Union instructing the children of such prominent parents as Joseph Stalin head of the Communist Party Viacheslav Molotov head of the Soviet State and Paul Robeson American actor and singer Relying on published records materials in eleven archives accounts left by visiting foreigners including the prominent American educator George Counts and thirty six interviews with surviving pupils from the 1930s Holmes brings the school to life The school's administrators teachers pupils friends and foes become companions as well as objects of this study as we walk the school's halls enter its classrooms eavesdrop on feuding officials who debate its fate and learn something of what the school and the period meant for its youth Photographs of the school's teachers and students and reproductions of the students notebooks drawings and watercolors add personality to this compelling story Holmes uses the experience of School No 25 as a microcosm and mirror of Stalinism illuminating the interplay of state and society in decision making and providing an opportunity to examine Stalinism from ideological cultural and psychological perspectives While placing the school's history in the context of the coercion corruption and repression of the 1930s Holmes challenges the prevailing view that state and public spectacle on the one hand and society and private life on the other were contrasting entities School No 25 molded these elements into an organic whole In the intimate setting of Stalin's School the degree of acceptance of Stalinism transcends historians customary reference to the fear or privilege a Soviet citizen experienced In a mutually reinforcing way forced compliance and voluntary choice moved individual teachers and pupils to accept a structured environment both at school and in society as the means to a powerful prosperous and just Soviet Union

**From Ruins to Reconstruction** Karl D. Qualls, 2018-07-05 Sevastopol located in present day Ukraine but still home to the Russian Black Sea Fleet and revered by Russians for its role in the Crimean War was utterly destroyed by German forces during World War II In *From Ruins to Reconstruction* Karl D Qualls tells the complex story of the city's rebuilding Based on extensive research in archives in both Moscow and Sevastopol architectural plans and drawings interviews and his own extensive experience in Sevastopol Qualls tells a unique story in which the periphery bests the Stalinist center the city's experience shows that local officials had considerable room to maneuver even during the peak

years of Stalinist control Qualls first paints a vivid portrait of the ruined city and the sufferings of its surviving inhabitants He then turns to Moscow's plans to remake the ancient city on the heroic socialist model prized by Stalin and visited upon most other postwar Soviet cities and towns In Sevastopol however the architects and city planners sent out from the center went native deviating from Moscow's blueprints to collaborate with local officials and residents who seized control of the planning process and rebuilt the city in a manner that celebrated its distinctive historical identity When completed postwar Sevastopol resembled a nineteenth century Russian city with tree lined boulevards wide walkways and buildings street names and memorials to its heroism in wars both long past and recent Though visually Russian and still containing a majority Russian speaking population Sevastopol was in 1954 joined to Ukraine which in 1991 became an independent state In his concluding chapter Qualls explores how the Russianness of the city and the presence of the Russian fleet affect relations between Ukraine Russia and the West

*Living the Revolution* Andy Willimott, 2017 *Living the Revolution* offers a pioneering insight into the world of the early Soviet activist At the heart of this book are a cast of fiery eyed bed headed youths determined to be the change they wanted to see in the world First banding together in the wake of the October Revolution seizing hold of urban apartments youthful enthusiasts tried to offer practical examples of socialist living Calling themselves urban communes they embraced total equality and shared everything from money to underwear They actively sought to overturn the traditional family unit reinvent domesticity and promote a new collective vision of human interaction A trend was set a revolutionary meme that would in the coming years allow thousands of would be revolutionaries and aspiring party members to experiment with the possibilities of socialism The first definitive account of the urban communes and the activists that formed them this volume utilizes newly uncovered archival materials to chart the rise and fall of this revolutionary impulse Laced with personal detail it illuminates the thoughts and aspirations of individual activists as the idea of the urban commune grew from an experimental form of living limited to a handful of participants in Petrograd and Moscow into a cultural phenomenon that saw tens of thousands of youths form their own domestic units of socialist living by the end of the 1920s *Living the Revolution* is a tale of revolutionary aspiration appropriation and participation at the ground level Never officially sanctioned by the party the urban communes challenge our traditional understanding of the early Soviet state presenting Soviet ideology as something that could both frame and fire the imagination

### **Showcasing the Great Experiment**

Michael David-Fox, 2011-10-01 During the 1920s and 1930s thousands of European and American writers professionals scientists artists and intellectuals made a pilgrimage to experience the Soviet experiment for themselves *Showcasing the Great Experiment* explores the reception of these intellectuals and fellow travelers and their cross cultural and trans ideological encounters in order to analyze Soviet attitudes towards the West Many of the twentieth century's greatest writers and thinkers including Theodore Dreiser Andr Gide Paul Robeson and George Bernard Shaw notoriously defended Stalin's USSR despite the unprecedented violence of its prewar decade While many visitors were profoundly affected by their Soviet

tours so too was the Soviet system The early experiences of building showcases and teaching outsiders to perceive the future in the making constitute a neglected international part of the emergence of Stalinism at home Michael David Fox contends that each side critically examined the other negotiating feelings of inferiority and superiority admiration and enmity emulation and rejection By the time of the Great Purges these tensions gave way to the dramatic triumph of xenophobia and isolationism whereas in the twenties the new regime assumed it had much to learn from Western modernity by the Stalinist thirties the Soviet order was declared superior in all respects Drawing on the declassified archival records of the agencies charged with crafting the international image of communism David Fox shows how Soviet efforts to sell the Bolshevik experiment abroad through cultural diplomacy shaped and were in turn shaped by the ongoing project of defining the Soviet Union from within These interwar Soviet methods of mobilizing the intelligentsia for the international ideological contest he argues directly paved the way for the cultural Cold War

Children of the Gulag Cathy A. Frierson, Semen Samuilovich Vilenskii, 2010-01-01 A comprehensive documentary history of children whose parents were identified as enemies of the Soviet regime from its inception through Joseph Stalin's death With top secret documents in translation from the Russian state archives memoirs and interviews with child survivors

Science of the Child in Late Imperial and Early Soviet Russia Andy Byford, 2020-02-27 Between the 1880s and the 1930s children became the focus of unprecedented scientific and professional interest in modernizing societies worldwide including in the Russian Empire and then the Soviet Union Those who claimed children as special objects of investigation were initially spread across a network of imperfectly professionalized scholarly and occupational groups based mostly in the fields of medicine education and psychology From their various perspectives they made ambitious claims about the contributions that their emergent expertise made to the understanding of and intervention in human bio psycho social development The international movement that arose out of this catalyzed the institutionalization of new domains of knowledge including developmental and educational psychology special needs education and child psychiatry Science of the Child charts the evolution of the child science movement in Russia from the Crimean War to the Second World War It is the first comprehensive history in English of the rise and fall of this multidisciplinary field across the late Imperial and Soviet periods Drawing on ideas and concepts emanating from a variety of theoretical domains the study provides new insights into the concerns of Russia's professional intelligentsia with matters of biosocial reproduction and investigates the incorporation of scientific knowledge and professional expertise focused on child development into the making of the welfare warfare state in the rapidly changing political landscape of the early Soviet era

**Russia** Egor Timurovich Gaïdar, 2012 An important Russian economist and politician takes a long view of economic history and Russia's development

**Education & the Great Depression** David Hicks, 2006 Education and the Great Depression Lessons from a Global History examines the history of schools in terms of pedagogies curricula policies and practices at the point of intersection with worldwide patterns of economic crisis political instability and social transformation

Examining the Great Depression in the historical contexts of Egypt Turkey Germany Brazil and New Zealand and in the regional contexts of the United States including Virginia New York City Cleveland Chicago and South Carolina this collection broadens our understanding of the scope of this crisis while also locating more familiar American examples in a global framework

**Stalinism** Alter L. Litvin, John L. H. Keep, 2005 This volume the fruit of co operation between a British and Russian historian seeks to review comparatively the progress made in recent years largely thanks to the opening of the Russian archives in enlarging our understanding of Stalin and

**Borders of Socialism** L. Siegelbaum, 2016-04-15 This fascinating book argues that in Russia the relations between culture and nation art and life commodity and trash often diverged from familiar Western European or American versions of modernity The essays show how public and private overlapped and shaped each other creating new perspectives on individuals and society in the Soviet Union

**Socialist Churches** Catriona Kelly, 2016-11-01 In Russia legislation on the separation of church and state in early 1918 marginalized religious faith and raised pressing questions about what was to be done with church buildings While associated with suspect beliefs they were also regarded as structures with potential practical uses and some were considered works of art This engaging study draws on religious anthropology sociology cultural studies and history to explore the fate of these socialist churches showing how attitudes and practices related to them were shaped both by laws on the preservation of monuments and anti religious measures Advocates of preservation while sincere in their desire to save the buildings were indifferent if not hostile to their religious purpose Believers on the other hand regarded preservation laws as irritants except when they provided leverage for use of the buildings by church communities The situation was eased by the growing rapprochement of the Orthodox Church and Soviet state organizations after 1943 but not fully resolved until the Soviet Union fell apart Based on abundant archival documentation Catriona Kelly s powerful narrative portrays the human tragedies and compromises but also the remarkable achievements of those who fought to preserve these important buildings over the course of seven decades of state atheism Socialist Churches will appeal to specialists students and general readers interested in church history the history of architecture and Russian art history and cultural studies

**Wheels in the Head** Joel Spring, 2012-08-21 In this popular text Joel Spring provocatively analyzes the ideas of traditional and non traditional philosophies from Confucianism to human rights regarding the contribution of education to the creation of a democratic society The goal is to explore how governments use education to control and manage their populations and to examine forms of education that claim to free people from authoritarian control A critically original work it is widely used as a text for courses on philosophical social political and historical foundations of education and critical issues in education Reflecting its global relevance a Chinese translation was published by the University of Peking Press in 2005 New in the third edition Expanded analysis of the use of education by authoritarian states Revisions to more clearly relate educational ideas to the theme of wheels in the head a phrase coined by philosopher Max Stirner to describe the use of schools by modern

governments to control their citizens New sections on liberation education and on human rights education

**The Right to Be Helped** Maria Cristina Galmarini, 2016-08-15 Doesn't an educated person, simple and working, sick and with a sick child, doesn't she have the right to enjoy at least the crumbs at the table of the revolutionary feast? Disabled single mother Maria Zolotova Sologub raised this question in a petition dated July 1929 demanding medical assistance and a monthly subsidy for herself and her daughter. While the welfare of able-bodied and industrially productive people in the first socialist country in the world was protected by a state-funded insurance system, the social rights of labor-incapacitated and unemployed individuals such as Zolotova Sologub were difficult to define and legitimize. *The Right to Be Helped* illuminates the ways in which marginalized members of Soviet society understood their social rights and articulated their moral expectations regarding the socialist state between 1917 and 1950. Maria Galmarini Kabala shows how definitions of state assistance and who was entitled to it provided a platform for policymakers and professionals to engage in heated debates about disability, gender, suffering, and productive and reproductive labor. She explores how authorities and experts reacted to requests for support, arguing that responses were sometimes characterized by an enlightened nature and other times by coercive discipline, but most frequently by a combination of the two. By focusing on the experiences of behaviorally problematic children, unemployed single mothers, and blind and deaf adults in several major urban centers, this important study shows that the dialogue over the right to be helped was central to defining the moral order of Soviet socialism. It will appeal to scholars and students of Russian history as well as those interested in comparative disabilities and welfare studies.

**Grand Theater** Larry E. Holmes, 2009-06-16 *Grand Theater* examines bureaucracy not as a readily identifiable structure but rather as a process of day-to-day operation. Thus it is concerned with how agencies of both the communist party and the state apparatus not only implemented directives from above but also responded to perceived successes and failures, chose to produce, share, and conceal information, and reacted when common citizens injected themselves into governance by making demands and complaints. It concentrates on the 1930s as a seminal period when Stalin's regime established a hypercentralized system that dominated the Soviet Union until its collapse and the Russian Federation since then. It also focuses on the administration of schools as the primary window through which to examine governance because of the importance of education to Soviet authorities, most notably Stalin himself, and the accessibility of archival documents in this field, one not classified as particularly sensitive. *Grand Theater* provides novel insights into the functioning of Stalinist bureaucracy, brings to the forefront a new understanding of center-periphery relations, and reveals the important role of individuals in what has heretofore been largely regarded when beyond the Kremlin's inner circle as a highly impersonal system. It also examines in unprecedented ways the reciprocal relationship between ideology and policy formation on the one hand and actual administrative practices on the other, a relationship that more often than not had negative and dysfunctional consequences for both the governed and governing. Holmes argues that the Soviet administrative system during the 1930s

was much like grand theater The documents produced for and by that system were the script for a discursive theatrical reality that inspired neither a careful appraisal of problems nor a dispassionate search for workable solutions

**Globalization of Education** Joel Spring, 2014-08-01 Continuing Joel Spring's reportage and analysis of the intersection of global forces and education this text offers a comprehensive overview and synthesis of current research theories and models related to the topic Written in his signature clear narrative style Spring introduces the processes institutions and forces by which schooling has been globalized and examines the impact of these forces on schooling in local contexts Significant conceptual frameworks are added to this Second Edition specifically the economization of education corporatization of education and the audit state These concepts are embedded in the global educational plans of major organizations such as the World Bank the Organization for Economic Development and Cooperation OECD World Economic Forum and multinational corporations Globalization of Education Second Edition features new and updated information on The World Bank OECD and the United Nations The World Trade Organization and the Global Culture of Higher Education Corporatization of Global Education Religious and Indigenous Education Models The Global Workforce Migration and the Talent Auction Globalization and Complex Thought

**Low Income, Social Growth, and Good Health** James C. Riley, 2008 Life expectancy and income among the first countries to begin health transitions Which countries should be studied A colonizer and the country colonized Japan and Korea Very low income is not a barrier Sri Lanka Two neighbors Panama and Costa Rica Capitalism and communism dictatorship and democracy Cuba and Jamaica The Soviet and Chinese models of social development Oil rich lands The Latin American case income inequality and health in Mexico Limiting mortality from fecal disease malaria and tuberculosis

**A History Of Russia Volume 2** Walter G. Moss, 2004-10-01 Moss has significantly revised his text and bibliography in this second edition to reflect new research findings and controversies on numerous subjects He has also brought the history up to date by revising the post Soviet material which now covers events from the end of 1991 up to the present day This new edition retains the features of the successful first edition that have made it a popular choice in universities and colleges throughout the US Canada and around the world
