Stalins Russia:

Stalin's Russia Martyn Whittock, 1997 Part of the Questions in History series for AS and A Level History this title examines the Soviet Union under Stalin concentrating on the period before the Second World War **Popular Opinion in Stalin's Russia** Sarah Rosemary Davies, 1997-10-02 Between 1934 and 1941 Stalin unleashed what came to be known as the Great Terror against millions of Soviet citizens The same period also saw the Great Retreat the repudiation of many of the aspirations of the Russian Revolution The response of ordinary Russians to the extraordinary events of this time has been obscure Sarah Davies's study uses NKVD and party reports letters and other evidence to show that despite propaganda and repression dissonant public opinion was not extinguished The people continued to criticise Stalin and the Soviet regime and complain about particular policies The book examines many themes including attitudes towards social and economic policy the terror and the leader cult shedding light on a hugely important part of Russia's social political and cultural history

Stalin's Russia Max Eastman, 2021-11-30 First published in 1940 Stalin's Russia is a close study of the development of the Stalinist regime and the flaws in socialist doctrine that made it possible The book examines the contrasts between the free and equal society heralded by the Marxist Leninist programme and the totalitarian state that emerged in its place It makes use of a wealth of material to cast light on the inner workings of Stalin's regime It explores the significance of the Stalin Hitler pact and argues that the word socialism itself became a liability to any genuine movement of liberation as a result

Industry, State, and Society in Stalin's Russia, 1926-1934 David R. Shearer, 2018-09-05 In his reexamination of the origins of the Stalinist state during the formative period of rapid industrialization in the late 1920s and early 1930s David R. Shearer argues that a centralized state controlled economic system was the consciously conceived political creation of Stalinist leaders rather than the inevitable by-product of socialist industrialization Focusing on the different economic and bureaucratic cultures within the industrial system Shearer reconstructs the debates in 1928 and 1929 over administrative financial and commercial reform He uses information from recently opened archives to show that attempts by the state's trading organizations to create a commercial economy enjoyed wide support offering a model that combined planning and rapid industrialization with social democracy and economic prosperity In an effort to crush the syndicate movement and establish tight political control over the economy Stalinist leaders intervened with a program of radical reforms Shearer demonstrates that professional engineers planners and industrial administrators in many cases actively supported the creation of a powerful industrial state unhampered by domestic social and economic constraints The paradoxical result Shearer shows was a loss of control The overly centralized system that emerged during the first Five Year Plan was rendered incoherent by periodic economic crises and the continuing influence of partially suppressed social and market forces

Factory and Community in Stalin's Russia Kenneth M. Straus, 2010-11-23
 Kenneth Straus weaves together many threads in Russian social history to develop a new theory of working class formation in the years of Stalin's First Five Year Plan In so doing he

addresses a long standing debate among historians by suggesting new answers to an old question Was there social support for the Stalin regime among the Soviet working class during the 1930s and if so why Straus argues that the keys for interpreting Stalinism lie in occupational specialization on the one hand and community organization on the other He focuses on the daily life of the new Soviet workers in the factory and community arguing that the most significant new trends saw peasants becoming open hearth steel workers housewives becoming auto assembly line workers and machine operatives and youth training en masse rather than occupations categories in the vocational schools in the factories the FZU Tapping archival material only recently available and a wealth of published sources Straus presents Soviet social history within a new analytical framework suggesting that Stalinist forced industrialization and Soviet proletarianization is best understood within a comparative European framework in which the theories of Marx Durkheim and Weber best elucidate both the broad similarities with Western trends and the striking exceptional aspects of the Soviet experience Life in Stalin's Soviet Union Kees Boterbloem,2019-09-05 Life in Stalin s Soviet Union is a collaborative work in which some of the leading scholars in the field shed light on various aspects of daily life for Soviet citizens Split into three parts which focus on Food Health and Leisure the Lived Experience and Religion and Ideology the book is comprised of chapters covering a range of important subjects including Food Health and Housing Sex and Gender Education Religion Christianity Islam and Judaism Sport and Leisure Festivals There is detailed analysis of urban and rural life as well as explorations of life in the gulag life as a peasant life in the military and what it was like to be disabled in Stalin s Russia The book also engages with the wider Soviet Union wherever possible to ensure the most in depth discussion of life in all its minutiae under Stalin This is a vitally important book for any student of Stalin s Russia keen to know more about the human history of this complex period of dictatorship
