**Human Rights in a Changing World** Mehmet Okyayuz, Junxiang Mao, Letlhokwa George Mpedi, Peter Herrmann, 2023-03-08 The book aims at presenting an updated version of the basic and general human rights debates While it is frequently suggested that Human Rights are universal and indivisible it is an undeniable fact that this is far from being true And if there was ever any justification for talking about an ending to history that narrative has definitely lost all justification in the light of recent developments In fact we are now witnessing a new harsh round of global system competition often at the edge of a global hot war now not anymore in a bipolar world but in a multipolar setting The book contributions include reflections on history and theory the reinterpretation of rights in different national contexts and or in relation to specific groups e.g. women and areas e.g. digitization The book is meant to be a food for thought at the end arguing in favour of the need to redefine Human Rights

*The Federal Courts* Richard A. Posner, 2009-07-01

The federal courts are the world's most powerful judiciary and a vital element of the American political system. In recent decades these courts have experienced unprecedented growth in caseload and personnel. Many judges and lawyers believe that a crisis in quantity is imperiling the ability of the federal judiciary to perform its historic function of administering justice fairly and expeditiously. In a substantially revised edition of his widely acclaimed 1985 book *The Federal Courts Crisis and Reform*, Chief Judge Richard A. Posner of the U.S. Court of Appeals for the Seventh Circuit provides a comprehensive evaluation of the federal judiciary and a detailed program of judicial reform. Drawing on economic and political theory as well as on legal analysis and his own extensive judicial experience, Posner sketches the history of the federal courts, describes the contemporary institution, appraises the concerns that have been expressed with the courts' performance, and presents a variety of proposals for both short-term and fundamental reform. In contrast to some of the direr prophecies of observers of the federal courts, Posner emphasizes the success of these courts in adapting to steep caseload growth with minimum sacrifice in quality. Although the book ranges over a variety of traditional topics in federal jurisdiction, the focus is steady on federal judicial administration, conceived of as an interdisciplinary approach emphasizing system rather than doctrine, statistics rather than impressions, and caseload rather than cases. Like the earlier edition, this book promises to be a landmark in the empirical study of judicial administration.

*Social Studies for the Twenty-First Century* Jack Zevin, 2015-01-09

Now in its 4th edition, this popular text offers practical, interesting, exciting ways to teach social studies and a multitude of instructional and professional resources for teachers. Theory, curriculum, methods, and assessment are woven into a comprehensive model for setting objectives, planning lessons, units, and courses, choosing classroom strategies, and constructing tests for some of the field's most popular and enduring programs. The reflective and integrative framework emphasizes building imagination, insight, and critical thinking into everyday classrooms; encourages problem-solving attitudes and behavior; and provokes analysis, reflection, and debate. The text includes separate chapters on teaching each of the major areas of the social studies curriculum. Throughout the text, all aspects of curriculum and instruction are viewed from a tripartite perspective that divides social studies instruction into didactic, factual, reflective, analytical, and affective/judgmental components. These three components are seen as supporting one another, building the groundwork for taking stands on issues past and present. At the center is the author's belief that the heart and soul of social studies instruction, perhaps all teaching, lies in stimulating the production of ideas, looking at knowledge from others' viewpoints, and formulating for oneself a set of goals, values, and beliefs that can be explained and justified in open discussion.
