Social And Biological Aspects Of Ethnicity:

Social and Biological Aspects of Ethnicity Malcolm Chapman, 2023 This volume focuses on the biological and social aspects of ethnicity which comprises three chapters from anthropologists Biology and society are both considered and the bidirectional nature of influence between the two factors is emphasized throughout the text **The Meaning of Race**

Kenan Malik, 1996-07-12 In *The Meaning of Race* Kenan Malik throws new light on the nature and origins of ideas of racial difference Arguing that the concept of race is a means through which Western society has come to understand the relationship between humanity society and nature the book re examines the relationship between Enlightenment thought and racial discourse clarifies the nature of scientific racism and presents a critique of postmodern theories of cultural difference

The Concept of Race in Natural and Social Science E. Nathaniel Gates, 2014-05-01 Explores the concept of race The term race which originally denoted genealogical or class identity has in the comparatively brief span of 300 years taken on an entirely new meaning In the wake of the Enlightenment it came to be applied to social groups This ideological transformation coupled with a dogmatic insistence that the groups so designated were natural and not socially created gave birth to the modern notion of races as genetically distinct entities The results of this view were the encoding of race and racial hierarchies in law literature and culture How racial categories facilitate social control The articles in the series demonstrate that the classification of humans according to selected physical characteristics was an arbitrary decision that was not based on valid scientific method They also examine the impact of colonialism on the propagation of the concept and note that racial categorization is a powerful social force that is often used to promote the interests of dominant social groups Finally the collection surveys how laws based on race have been enacted around the world to deny power to minority groups A multidisciplinary resource This collection of outstanding articles brings multiple perspectives to bear on race theory and draws on a wider range of periodicals than even the largest library usually holds Even if all the articles were available on campus chances are that a student would have to track them down in several libraries and microfilm collections Providing of course that no journals were reserved for graduate students out for binding or simply missing This convenient set saves students substantial time and effort by making available all the key articles in one reliable source Authoritative commentary The series editor has put together a balanced selection of the most significant works accompanied by expert commentary A general introduction gives important background information and outlines fundamental issues current scholarship and scholarly controversies Introductions to individual volumes put the articles in context and draw attention to germinal ideas and major shifts in the field After reading the material even a beginning student will have an excellent grasp of the basics of the subject **Ethnicity: Anthropological Constructions** Marcus Banks, 2003-09-02 Ethnicity has been a key concept in anthropology and sociology for many years yet many people still seem uncertain as to its meaning its relevance and its relationship to other concepts such as race and nationalism In *Ethnicity Anthropological Constructions* the major

anthropological and sociological approaches to ethnicity covering much of the significant literature and leading authors are outlined clearly and concisely

Health and Ethnicity Helen Macbeth, Prakash Shetty, 2000-11-23 It is becoming increasingly apparent that certain diseases occur at higher frequencies in different ethnic groups e.g. Afro Caribbeans and sickle cell anaemia. The causes for such differences are only just being investigated and the factors involved are clearly both genetic and non genetic. The biological complexity lies in the interaction of genetic variation and lifestyle differences. Cultural differences range from diet to traditional remedies from religious beliefs to marriage patterns and much more. This multidisciplinary volume discusses these factors with contributions from geneticists, medics, anthropologists, epidemiologists and social scientists. Anyone considering variation in health experience due to ethnic factors would be enriched by reading the different perspectives presented in this volume.

Migration, Ethnicity, Race, and Health in Multicultural Societies Raj S. Bhopal, 2014 This book discusses the concepts of migration, race and ethnicity and demonstrates how these can be applied in scientific research, policy making, health service planning and health promotion. Extensive examples are used to demonstrate the application of the theory.

Public Health Reports, 1994

Culture and Modernity Eliot Deutsch, 1991-01-01 The crisis of modernity. Incommensurability. Relativism. Language and non Western cultural traditions. Culture and the ethical. Culture and the aesthetic. Culture and the religious. Culture and the political. Cultural identity. Scientific progress.

Racial Theories in Social Science Sean Elias, Joe R. Feagin, 2016-04-14 Racial Theories in Social Science: A Systemic Racism Critique provides a critique of the white racial framing and lack of systemic racism analysis prevalent in past and present mainstream race theory. As this book demonstrates, mainstream racial analysis and social analysis more generally remain stunted and uncritical because of this unhealthy white framing of knowledge and evasion or downplaying of institutional, structural and systemic racism. In response to ineffective social science analyses of racial matters, this book presents a counter approach: systemic racism theory. The foundation of this theoretical perspective lies in the critical insights and perspectives of African Americans and other people of color who have long challenged biased white framed perspectives and practices and the racially oppressive and exclusionary institutions and social systems created by whites over several centuries.
