Hallinger, 2012-12-06 The first International Handbook of Educational Leadership and Administration Leithwood et al was published in 1996 and quickly became something of a best seller for reference works within education Such success we suggest was at least partly due to the unprecedented global waves of concern for improving schools launched in the mid 1980 s combined with a widespread belief in leadership as the single most powerful contribution to such improvement The roots of this belief can be found in evidence produced by the early effective schools research although there is a romance with leadership as an explanation for success in many non school enterprises as well During the two year period during which this current handbook was being written activity in the realms of school leadership school improvement and leadership development gained further momentum The English government created its new National College of School Leadership and several Asian nations announced new initiatives in leadership selection preparation and development

English, 2007-08-14 English successfully challenges the established educational community to rethink the current state of research on school leadership in the social sciences The inclusion of theory discourse and stories of recognized leaders followed by chapter learning extensions that include key concepts movie recommendations and prompted reflective journaling makes this book a most valuable resource for the educational leadership community H J Bultinck CHOICE *The Art of Educational Leadership* provides one of the most complete examinations of leadership that I have encountered I admire the way it urges students to

think and reflect The format allows individual learners to focus on those materials that best fit their learning style while the numerous presentations of a single topic through the different modalities strengthens the learning This text is a fresh new look at leadership Louise L MacKay East Tennessee State University Fenwick W English returns to themes of leadership he explored in more than 20 earlier books and dozens of presentation to educator audiences He favors re centering educational leadership in the humanities rather than acting on the recommendation of the business literature and he emphasizes the use of films as a way to humanize leadership concepts THE SCHOOL ADMINISTRATOR Excellent cogent analysis of key concepts of leadership are presented in a reader friendly style Saul B Grossman Temple University Moves beyond established notions of leadership to recognize that effective leading is about drama and performance artistry The Art of Educational Leadership Balancing Performance and Accountability stresses the human side of leadership No other text on this topic demonstrates so ably the importance of artistry in leadership in a field that has been lopsidedly dominated by concepts informed by science Presenting the idea that leadership is an art this book Exemplifies a balance between the science and the art of educational leadership The real improvement of practice is rooted in the art of application which is about context and represents the key to leadership practice Connects content material to self discovery Exercises at the end of each chapter include creating a personal reflective journal to engage the reader in and reflect upon theories and practices presented in the book Films are suggested for viewing to illustrate the interaction between context culture decisions and outcomes Portrays multicultural leadership in action Biography boxes throughout the book share how multicultural educational and political leaders who have been recognized as expert practitioners learned the art of leadership in the public arena This is the first book in educational leadership to sketch out a balance between the science and the art of the field The text illustrates how performance and practice represent the art while the delineation of the skills and conceptual models represent the science The Bloomsbury Handbook of Gender and Educational Leadership and Management Victoria Showunmi,Pontso Moorosi,Charol Shakeshaft,Izhar Oplatka,2022-02-24 Drawing together diverse research perspectives and theoretical underpinnings this handbook explores gender as a social category and examines cultural and social differences Bringing together diverse perspectives from around the world including from Africa Europe the Middle East the UK and the USA the volume sets out the gender and educational leadership and management field providing a snapshot of the field as it stands signalling its development and directions for future development It offers focused reviews of empirical research on particular aspects of the field and presents new insights from research findings and methodological approaches **Educational Leadership Relationally** Scott Eacott,2015-01-19 Educational leadership management and administration has a rich history of epistemological and ontological dialogue and debate However in recent times at least since the publication of Colin Evers and Gabriele Lakomski s trilogy knowing exploring and doing educational administration there has been a distinct dearth Educational Leadership Relationally explicitly returns matters of epistemology and ontology to the centre of the discussion

Through a sustained and rigorous engagement with contemporary thought and analysis Scott Eacott articulates and defends a relational approach to scholarship in educational leadership management and administration Eacott belongs to a group of scholars in educational administration who could be called meta sociologist This group blends sociology historical revisionism managerial theories and general philosophy to emphasise the relevance of sociological analysis in the field of educational administration Proposing a relational turn Eacott outlines a methodological agenda for constructing an alternative approach to educational leadership management and administration scholarship that might be persuasive beyond the critical frontier The relational research programme is arguably the most ambitious agenda in educational leadership management and administration coming out of Australia since Colin Evers and Gabriele Lakowski's natural coherentism and Richard Bates Critical Theory of Educational Administration As a research agenda it engages with the centrality of administration in constructions of the social world the legitimization of popular labels such as leadership the inexhaustible and inseparable grounding of administrative labour in time and space and overcomes contemporary tensions of individualism collectivism and structure agency to provide a productive rather than merely critical space to theorise educational leadership management and administration

Rethinking Educational Leadership Nigel Bennett, Lesley Anderson, 2003-07-24 The charismatic transformational leader who creates a vision for the future of their organization and persuades others to follow their path towards it is now the dominant viewpoint that underpins government policies towards leadership development in the English speaking world This book offers a much needed corrective to this orthodoxy by focusing on current research and thinking about leadership rather than leaders A wide range of prominent international contributors present a rare self critical look at their own assertions and test alternative leadership models against recent research projects They also demonstrate how their analysis is relevant to all countries where leadership is an issue Major features include alternative theories to understanding the nature of leadership how leadership could be analyzed re analysis of recent research carried out by contributors in the light of one or more of the alternative theories examined implications of the alternative perspectives for leadership training This book is recommended to all staff and students involved in educational leadership management or administration programmes

International Handbook of Educational Leadership and Administration Kenneth A. Leithwood,Judith Chapman,P. Corson,P. Hallinger,Ann Hart,2012-12-06 EDITORS This introduction to the International Handbook of Educational Leadership and Administration describes some of the motivation for developing the book and several assumptions on which is based much of the work represented in its 31 chapters A synopsis of the contents of those chapters is also provided SOME KEY ASSUMPTIONS It is sometimes suggested that the search for an adequate understanding of leadership is doomed to fail After all there is little evidence of agreement about the concept in spite of prodigious efforts dating back hundreds if not thousands of years Such a view is captured for example in Bennis observation that Of all the hazy and confounding areas in social psychology leadership theory undoubtedly contends for top nomination Probably more has been written and less is known about leadership than any other topic in the behavioural sciences 1959 page 259 We do not find this state of affairs discouraging nor entirely accurate and of course it did not prevent Bennis from proceeding either One reason for our desire to continue in the face of such discouraging words is that a great deal of leadership research aspires to develop a general theory a theory which applies to all or most domains of organized human activity This aspiration inevitably produces decontextualized and therefore abstract categories of practice Howard Gardner s 1995 depiction of leadership as story telling is a case in point

Handbook of Urban Educational Leadership Muhammad Khalifa,Noelle Witherspoon Arnold,Azadeh F. Osanloo,Cosette M. Grant,2015-06-01 This authoritative handbook examines the community district and teacher leadership roles that affect urban schools It will serve as a foundation for pedagogical and educational leadership practices that foster social justice equity and advocacy for those who have been traditionally and historically underserved in education The handbook s ten

sections cover topics as diverse as curriculum instruction and educational outcomes gender race and class higher education and leadership preparation and support Its twenty nine chapters offer both American and international perspectives

Critical Perspectives On Educational Leadership John Smyth, 2005-08-12 This book is an edited collection of original papers which challenge in a very direct manner the dominant behaviourist and functionalist views that have come to entrap those who live work and conduct research in the areas of educational leadership and focusing instead on the structures and processes within schools as organisations that frustrate distort and ultimately stifle educative relationships the writers provide a much needed way of reconceptualising both thought and action in so called acts of educational leadership
