Guidance Note: Use of Political Economy Analysis for ADB Operations Asian Development Bank, 2013-06-01. Political economy analysis facilitates understanding on how incentives institutions and ideas shape political action and development outcomes in ADB's developing member countries (DMCs). These factors can inform assessments of feasibility of policy reform and institutional change, the contribution that ADB and other development partners can realistically make and the risks involved. A political economy analysis can therefore strengthen the design of more effective support leading to better development results. While important for all DMCs, political economy considerations especially matter in DMCs with fragile and conflict affected situations. This guidance note develops a definition and parameters for political economy analysis to ensure consistency and to guide country sector and project teams in analysis. It

provides ADB staff with guidance on how political economy analysis can be used to inform the design and implementation of ADB operations for more feasible and sustainable development outcomes *A Measured Approach to Ending Poverty and Boosting Shared Prosperity* World Bank,2014-10-07 In 2013 the World Bank Group adopted two new goals to guide its work ending extreme poverty and boosting shared prosperity More specifically the goals are to reduce extreme poverty in the world to less than 3 percent by 2030 and to foster income growth of the bottom 40 percent of the population in each country While poverty reduction has been a mainstay of the World Bank's mission for decades the Bank has now set a specific goal and timetable and for the first time the Bank has explicitly included a goal linked to ensuring that growth is shared by all The discussion until now has centered primarily on articulating the new goals This report the latest in World Bank's Policy Research Report series goes beyond that and lays out their conceptual underpinnings discusses their relative strengths and weaknesses by contrasting them with alternative indicators and proposes empirical approaches and requirements to track progress towards the goals The report makes clear that the challenges posed by the World Bank Group's new stance extend not just to the pursuit of these goals but indeed to their very definition and empirical content The report also argues that an improved data infrastructure consisting of many elements including the collection of more and better survey data is critical to ensure that progress towards these goals can be measured and policies to help achieve them can be identified and prioritized

Geriatric Psychiatry in South Asia Nilamadhab Kar,Sujita Kumar Kar,S. M. Yasir Arafat,2025-07-28 This book is about the current status and ways ahead of geriatric psychiatry in South Asia South Asia is home to a large proportion of the world's elderly With improved longevity the geriatric population is increasing fast in recent years in South Asian countries Along with this the mental health burden of the older adults is increasing However mental health care of older adults in South Asia is a neglected area Little is known about the burden of mental disorders and available mental health services specific for the older adults population in South Asia and other low and middle income countries It is well known that resources are fewer in this region and most of the older adults in these areas are not recognized or treated There is a urgent need to explore the services available their appropriateness and effectiveness and to reflect on the region specific economically viable solutions that can be adapted soon The book discusses how these services can be seamlessly integrated to the existing support systems Besides the interventional aspects the book also explores the facilitating and impeding factors of implementing evidence based preventive efforts in these countries
