Srimad Bhagavatam Third Canto Part Two:

Srimad-Bhagavatam, Third Canto His Divine Grace A. C. Bhaktivedanta Swami Prabhupada, 1972-12-31 Srimad Bhagavatam an epic philosophical and literary classic holds a prominent position in India's voluminous written wisdom. The timeless wisdom of India is expressed in the Vedas, ancient Sanskrit texts that touch upon all fields of human knowledge. Originally preserved through oral tradition, the Vedas were first put into writing by Srila Vyasadeva, the literary incarnation of God. After compiling the Vedas, Srila Vyasadeva was inspired by his spiritual master to present their profound essence in the form of Srimad Bhagavatam. Known as the ripened fruit of the tree of Vedic literature, Srimad Bhagavatam is the most complete and authoritative exposition of Vedic knowledge. After writing the Bhagavatam, Vyasa taught it to his son Shukadeva Goswami, who later spoke the Bhagavatam to Maharaja Parikshit in an assembly of sages on the bank of the sacred Ganges River. Although Maharaja Parikshit was a great rajarshi, saintly king and the emperor of the world when he received notice of his death seven days in advance, he renounced his entire kingdom and retired to the bank of the Ganges to seek spiritual enlightenment. The questions of King Parikshit and Shukadeva Goswami's illuminating answers concerning everything from the nature of the self to the origin of the universe are the basis of Srimad Bhagavatam. This edition of Bhagavatam is the only complete English translation with an elaborate and scholarly commentary, and it is the first edition widely available to the English reading public. This work is the product of the scholarly and devotional effort of His Divine Grace A. C. Bhaktivedanta Swami Prabhupada, the world's most distinguished teacher of Indian religious and philosophical thought. His Sanskrit scholarship and intimate familiarity with Vedic culture combine to reveal to the West a magnificent exposition of this important classic.

Meditation - Neuroscientific Approaches and Philosophical Implications Stefan Schmidt, Harald Walach, 2013-11-19 This volume features a collection of essays on consciousness, which has become one of the hot topics at the crossroads between neuroscience, philosophy, and religious studies. Is consciousness something the brain produces? How can we study it? Is there just one type of consciousness, or are there different states that can be discriminated? Are so-called higher states of consciousness that some people report during meditation pointing towards a new understanding of consciousness? Meditation research is a new discipline that shows new inroads into the study of consciousness. If a meditative practice changes brain structure itself, this is direct proof of the causal influence of consciousness onto its substrate. If different states of consciousness can be linked with properties and states of the brain, this can be used to study consciousness more directly. If the sense of self is modifiable through meditative techniques, and this can be objectively shown through neuroimaging, this has profound implications for our understanding of who we are. Can consciousness in deep states of meditative absorption actually access some aspect of reality which we normally don't? Meditation research can potentially foster us with a new access to the phenomenological method in general. This has even been branded with a new catch phrase: Contemplative Science. It brings together the most modern neuroscientific approach and the most advanced

phenomenological methodology of studying the mind from within through highly skilled self observation that has gone through many thousand hours of honing the capacity to look carefully without distraction This book addresses these issues by bringing together some of the leading researchers and thinkers in the field The scope of the volume reaches from first person neuroscience to Indian philosophy from pedagogic applications to epistemological aspects and from compassion meditation to the study of brain activity
