**The St. James Encyclopedia of Banking & Finance** Glenn Gaywaine Munn,1991 Over four thousand entries identify terms and explain concepts in banking finance economics business and investment      **Crises and Cycles in Economic Dictionaries and Encyclopaedias** Daniele Besomi,2013-03-01 This book aims at investigating from the perspective of the major economic dictionaries the notions of economic crisis and cycle The project consists in giving an extensive summary of a number of significant entries on this subject with an introductory essay to each entry placing them and the dictionary to which they belong in their context giving some details on the author of the dictionary entry and assessing the entry s and its author s contribution The broad picture including the history of these encyclopedic tools will be examined in the introductory essays      Searching the Law, 3d Edition Frank Bae,Edward Bander,Francis Doyle,Joel Fishman,Paul Richert,2021-12-13

The End of Finance Massimo Amato,Luca Fantacci,2013-12-19 This new book by two distinguished Italian economists is a highly original contribution to our understanding of the origins and aftermath of the financial crisis The authors show that the recent financial crisis cannot be understood simply as a malfunctioning in the subprime mortgage market rather it is rooted in a much more fundamental transformation taking place over an extended time period in the very nature of finance The end or purpose of finance is to be found in the social institutions by which the making and acceptance of promises of payment are made possible that is the creation and cancellation of debt contracts within a specified time frame Amato and Fantacci argue that developments in the modern financial system by which debts are securitized has endangered this fundamental credit debt structure The illusion has been created that debts are universally liquid in the sense that they need not be redeemed but can be continually sold on in increasingly extensive global markets What appears to have reduced the riskiness of default for individual agents has in fact increased the fragility of the system as a whole The authors trace the origins of this profound transformation backwards in time not just to the neoliberal reforms of the 1980s and 90s but to the birth of capitalist finance in the mercantile networks of the sixteenth and seventeenth centuries This long historical perspective and deep analysis of the nature of finance enables the authors to tackle the challenges we face today in a fresh way not simply by tinkering with existing mechanisms but rather by asking the more profound question of how institutions might be devised in which finance could fulfil its essential functions      *Capital Markets, Derivatives, and the Law* Alan N. Rechtschaffen,Jean-Claude Trichet,2014 Capital Markets Derivatives and the Law Evolution After Crisis investigates the impact of the financial crisis on capital markets and regulation With an emphasis on the structure and the workings of financial instruments it considers market evolution after the crisis and the impact of Central Bank policy In doing so it provides the reader with the tools to recognize vulnerabilities in capital market trading activities      Capitalism Richard Smalbach,2014-07-15 Capitalism is first and foremost an economic system that prizes free and competitive markets private ownership and a comparatively small role for government intervention and regulation Yet capitalism also has many political

undertones and has become associated with notions of freedom individualism self determination and anti unionism As a political and economic philosophy it was a major player in the Cold War squaring off against communism and seemingly triumphing The colorful history of this economic system that doubles as a political philosophy is recounted here from Medieval era experiments in agrarian capitalism and mercantilism to the 21st century digital economy and bitcoins This is a fascinating and provocative read and an immersive journey through the political and economic history of the modern world
