The End of Composition Studies David W Smit, 2007-03-29 Setting forth an innovative new model for what it means to be a writing teacher in the era of writing across the curriculum *The End of Composition Studies* urges a reconceptualization of graduate work in rhetoric and composition systematically critiques the limitations of current pedagogical practices at the

postsecondary level and proposes a reorganization of all academic units David W Smit calls into question two major assumptions of the field that writing is a universal ability and that college level writing is foundational to advanced learning Instead Smit holds writing involves a wide range of knowledge and skill that cannot be learned solely in writing classes but must be acquired by immersion in various discourse communities in and out of academic settings *The End of Composition Studies* provides a compelling rhetoric and rationale for eliminating the field and reenvisioning the profession as truly interdisciplinary a change that is necessary in order to fulfill the needs and demands of students instructors administrators and our democratic society *Composition in the Twenty-first Century* Lynn Z. Bloom, Donald A. Daiker, Edward Michael White, 1997 The essays in this book stemming from a national conference of the same name focus on the single subject required of nearly all college students composition Despite its pervasiveness and its significance composition has an unstable status within the curriculum Writing programs and writing faculty are besieged by academic political and financial concerns that have not been well understood or addressed At many institutions composition functions paradoxically as both the gateway to academic success and as the gatekeeper reducing access to academic work and opportunity for those with limited facility in English Although writing programs are expected to provide services that range from instruction in correct grammar to assisting or resisting political correctness expanding programs and shrinking faculty get caught in the crossfire The bottom line becomes the firing line as forces outside the classroom determine funding and seek to define what composition should do In search of that definition the contributors ask and answer a series of specific and salient questions What implications intellectual political and institutional will forces outside the classroom have on the quality and delivery of composition in the twenty first century How will faculty and administrators identify and address these issues What policies and practices ought we propose for the century to come This book features sixteen position papers by distinguished scholars and researchers in composition and rhetoric most of the papers are followed by invited responses by other notable compositionists In all twenty five contributors approach composition from a wide variety of contemporary perspectives rhetorical historical social cultural political intellectual economic structural administrative and developmental They propose solutions applicable to pedagogy research graduate training of composition teachers academic administration and public and social policy In a very real sense then this is the only book to offer a map to the future of composition **Food, Feminisms, Rhetorics** Melissa A. Goldthwaite, 2017-06-19 Inspired by the need for interpretations and critiques of the varied messages surrounding what and how we eat *Food Feminisms Rhetorics* collects eighteen essays that demonstrate the importance of food and food related practices as sites of scholarly study particularly from feminist rhetorical perspectives Contributors analyze messages about food and bodies from what a person watches and reads to where that person shops taken from sources mundane and literary personal and cultural This collection begins with analyses of the historical cultural and political implications of cookbooks and recipes explores definitions of feminist food writing and ends with a focus on bodies and

cultures both self representations and representations of others for particular rhetorical purposes The genres objects and practices contributors study are varied from cookbooks to genre fiction from blogs to food systems from product packaging to paintings but the overall message is the same food and its associated practices are worthy of scholarly attention

A Rhetoric of Doing Stephen Paul Witte, Neil Nakadate, Roger Dennis Cherry, 1992 Concerned with both the nature and the practice of discourse the eighteen essays collected here treat rhetoric as a dynamic enterprise of inquiry exploration and application and in doing so reflect James L Kinneavy's firm belief in the vital relationship between theory and practice his commitment to a spirit of accommodation and assimilation that promotes the development of ever more powerful theories and ever more useful practices A thorough introduction provides the reader with clear summaries of the essays by leading edge theorists researchers and teachers of writing and rhetoric A field context for the ideas presented in this book is provided through the division of the various chapters into four major sections that focus on classical rhetoric and rhetorical theory in historical contexts on dimensions of discourse theory aspects of discourse communities and the sorts of knowledge people access and use in producing written texts on writing in school related contexts and on several dimensions of nonacademic writing A fifth section contains a bibliographic survey and an appreciation of James Kinneavy's work The exceptional range of these essays makes *A Rhetoric of Doing* an ecumenical examination of the current state of mind in rhetoric and written communication a survey and description of what discourse and those in the field of discourse are in fact doing

Stories of Mentoring Michelle F. Eble, 2008-10-01 Describes mentoring of teachers and scholars in the field of composition and rhetoric

Beyond the Corporate University Henry A. Giroux, Kostas Myrsiades, 2001 Prominent scholars in this book move boldly beyond critique to show how and why the critical functions of a democratically informed civic education not merely professional training must become the core of the university's mission They show why higher education must address what it means to relate knowledge to public life and social responsibility to the demands of critical citizenship Moreover they show why democratic forms of education and various elements of a critical pedagogy are vital not only to individual students but also to our economy and our democratic institutions and future leadership Visit our website for sample chapters
