Parametric Resonance in Dynamical Systems Thor Fossen, Henk Nijmeijer, 2011-12-13 Parametric Resonance in Dynamical Systems discusses the phenomenon of parametric resonance and its occurrence in mechanical systems vehicles motorcycles aircraft and marine craft along micro electro mechanical systems The contributors provides an introduction to the root causes of this phenomenon and its mathematical equivalent the Mathieu Hill equation Also included is a discussion of how parametric resonance occurs on ships and offshore systems and its frequency in mechanical and electrical systems This volume is ideal for researchers and mechanical engineers working in application fields such as MEMS maritime aircraft and ground vehicle engineering

Risk-Based Ship Design Apostolos Papanikolaou, 2009-04-09 Risk based ship design is a new scientific and engineering field of growing interest to researchers engineers and professionals from various disciplines related to ship design construction operation and regulation The main motivation to use risk based approaches is twofold implement a novel ship design which is considered safe but for some formal regulatory reason cannot be approved today and or rationally optimize an existing design with respect to safety without compromising on efficiency and performance It is a clear direction that all future technological and regulatory International Maritime Organisation developments regarding ship design and operation will go through risk based procedures which are known and well established in other industries e g nuclear aviation The present book derives from the knowledge gained in the course of the project SAFEDOR Design Operation and Regulation for Safety an Integrated Project under the 6th framework programme of the European Commission IP 516278 The book aims to provide an understanding of

the fundamentals and details of the integration of risk based approaches into the ship design process The book facilitates the transfer of knowledge from recent research work to the wider maritime community and advances scientific approaches dealing with risk based design and ship safety
