Stadt Der Tausend Augen:

Stadt der tausend Augen Ingeborg Bayer, 2011 **Stadt der tausend Augen** Ingeborg Bayer, 1992 , **Die Stadt der tausend Augen** Klaus Frühauf, 2000 **Strategies of Ambiguity** Matthias Bauer, Angelika Zirker, 2023-09-13 There has been a growing awareness that ambiguity is not just a necessary evil of the language system resulting from its need for economy or by contrast a blessing that allows writers to involve readers in endless games of assigning meaning to a literary text. The present volume contributes to overcoming this alternative by focusing on strategies of ambiguity and the strategic avoidance of ambiguity both at the production and the reception end of communication. The authors examine ways in which speakers and hearers may use ambiguous words, structures, references and situations to pursue communicative ends. For example, the question is asked what it actually means when a listener strategically perceives ambiguity, which may happen both synchronically e.g. in conversations as well as diachronically e.g. when strategically ambiguating biblical texts in order to make them applicable to moral lessons. Another example is the question of whether ambiguity awareness increases the strategic use of ambiguity in prosody. Moreover, the authors enquire not only into the effects of ambiguous meanings but also into the strategic use of ambiguity as such, for example as a response to censorship or as a means of provoking irritation. This volume brings together several contributions from linguistics, literary studies, rhetoric, psychology and theology and it aims to provide a systematic approach to the strategic production and perception of ambiguity in a variety of texts and contexts. Science Fiction Literature in East Germany Sonja Fritzsche, 2006 East German science fiction enabled its authors to create a subversive space in another time and place. One of the country's most popular genres, it outlined futures that often went beyond the party's official version. Many utopian stories provided a corrective vision intended to preserve and improve upon East German communism. This study is an introduction to East German science fiction. The book begins with a chapter on German science fiction before 1949. It then spans the entire existence of the country 1949-1990 and outlines key topics essential to understanding the genre: popular literature, socialist realism, censorship, fandom and international science fiction. An in-depth discussion addresses notions of high and low literature, elements of the fantastic and utopia as critical narrative strategies, ideology and realism in East German literature, gender and the relation between literature and science. Through a close textual analysis of three science fiction novels, the author expands East German literary history to include science fiction as a valuable source for developing a multi-faceted understanding of the country's short history. Finally, an epilogue notes new titles and developments since the fall of the Berlin Wall.
