Stadtischer Wohnbau In Agypten:

The Archaeology of Egypt in the Third Intermediate Period James Edward Bennett, 2019-09-26 This book is aimed at students teachers and academics who have an interest in the study of urbanism in Egypt and the ancient world This book provides for the first time an up to date comprehensive analysis of Egyptian urbanism during the Third Intermediate Period 1076 664 BCE

The Monastic Landscape of Late Antique Egypt Darlene L. Brooks Hedstrom, 2017-11-27 Darlene L Brooks Hedstrom offers a new history of the field of Egyptian monastic archaeology It is the first study in English to trace how scholars identified a space or site as monastic within the Egyptian landscape and how such identifications impacted perceptions of monasticism Brooks Hedstrom then provides an ecohistory of Egypt's tripartite landscape to offer a reorientation of the perception of the physical landscape She analyzes late antique documentary evidence early monastic literature and ecclesiastical history before turning to the extensive archaeological evidence of Christian monastic settlements In doing so she illustrates the stark differences between idealized monastic landscape and the actual monastic landscape that was urbanized through monastic constructions Drawing upon critical theories in landscape studies materiality and phenomenology Brooks Hedstrom looks at domestic settlements of non monastic and monastic settlements to posit what features makes monastic settlements unique thus offering a new history of monasticism in Egypt

The Egyptian World Toby Wilkinson, 2007-09-18 The Egyptian World provides an authoritative exploration of Ancient Egyptian civilization The volume covers seven broad themes with each section allowing specialists to focus on a particular topic

The Archaeology of Urbanism in Ancient Egypt Nadine Moeller, 2016-04-18 In this book Nadine Moeller challenges prevailing views on Egypt's non urban past and argues for Egypt as an early urban society She traces the emergence of urban features during the Predynastic period up to the disintegration of the powerful Middle Kingdom state c 3500 1650 BC This book offers a synthesis of the archaeological data that sheds light on the different facets of urbanism in ancient Egypt Drawing on evidence from recent excavations as well as a vast body of archaeological data this book explores the changing settlement patterns by contrasting periods of strong political control against those of decentralization It also discusses households and the layout of domestic architecture which are key elements for understanding how society functioned and evolved over time Moeller reveals what settlement patterns can tell us about the formation of complex society and the role of the state in urban development in ancient Egypt

Settlements of the Ptolemies Katja Mueller, 2006 Unlike the Seleukid's the Ptolemies did not at first glance create numerous eye catching cities

Akhenaten and the Religion of Light Erik Hornung, 2001 Akhenaten also known as Amenhotep IV was king of Egypt during the Eighteenth Dynasty and reigned from 1375 to 1358 B C E Called the religious revolutionary he is the earliest known creator of a new religion The cult he founded broke with Egypt's traditional polytheism and focused its worship on a single deity the sun god Aten Erik Hornung one of the world's preeminent Egyptologists here offers a concise and accessible account of Akhenaten and his religion of light Hornung begins with a

discussion of the nineteenth century scholars who laid the foundation for our knowledge of Akhenaten's period and extends to the most recent archaeological finds. He emphasizes that Akhenaten's monotheistic theology represented the first attempt in history to explain the entire natural and human world on the basis of a single principle. Akhenaten made light the absolute reference point. Hornung writes and it is astonishing how clearly and consistently he pursued this concept. Hornung also addresses such topics as the origins of the new religion, profound changes in beliefs regarding the afterlife and the new Egyptian capital at Akhetaten which was devoted to the service of Aten, his prophet Akhenaten and the latter's family.

Tutankhamun Martin Bommas, 2024-12-02 Over a century after his discovery, this comprehensive biography of Tutankhamun explores a wealth of evidence including archaeological and ancient textual sources, DNA analysis and CT scanning, bringing to life a pharaoh who has remained elusive apart from his grandiose tomb treasures. For the first time, this volume identifies the names of Tutankhamun's biological parents, tracing the footsteps of his short life that was marked by genetic defects and physical deterioration. Between his early days and his untimely death, Tutankhamun previously, Tutankhaten appears as a child of his time; he was torn between the cult of the Aten and the restoration of the cult of Amun, a campaign in which he personally played a leading role. Equipped with a thorough education, gifted with a brilliant mind and living mostly in solitude, readers will follow in detail how Tutankhamun secured the survival of the 18th Dynasty. This book traces Tutankhamun's involvement in processes which can still be felt in Egypt today. His complex personality is reconstructed based on archaeological evidence, some of which has never been discussed previously, and conclusions drawn from both scientific research and a deep understanding of the context in which he lived. By also considering the lives of those who were close to the teenage king, this book delivers a comprehensive source-based biography of an ancient Egyptian pharaoh. Complete with intensive references to international scholarship, visual sources and maps, and excluding the tomb treasures created after his physical death, this book is a fresh and original approach to understanding the life, not afterlife, of the most popular pharaoh of modern times. *Tutankhamun: A Biography* is suitable for students, scholars and non-specialist readers interested in the life of Tutankhamun as well as those working on ancient Egyptian history and religion, more broadly particularly that of New Kingdom Egypt.

Akhenaten Dominic Montserrat, 2014-05-01 The pharaoh Akhenaten, who ruled Egypt in the mid-fourteenth century BCE, has been the subject of more speculation than any other character in Egyptian history. This provocative new biography examines both the real Akhenaten and the myths that have been created around him. It scrutinises the history of the pharaoh and his reign, which has been continually written in Eurocentric terms inapplicable to ancient Egypt and the archaeology of Akhenaten's capital city, Amarna. It goes on to explore the pharaoh's extraordinary cultural afterlife and the way he has been invoked to validate everything from psychoanalysis to racial equality to Fascism.

Heaven on Earth Richard Landes, 2011-08-04 A comprehensive examination of millennialism, the belief that the grandest events of history and the cosmos will occur soon and suddenly, whether as a religious development with the coming of the Last

Days or as a final social solution to resolve the human predicament forever Through analysis of diverse cases throughout history Richard Landes demonstrates that millennialism has been deliberately downplayed and even ignored by historians and shows that millenarian beliefs have played a role in many supposedly secular events movements and periods including modernity

Communicating the Past in the Digital Age Sebastian Hageneuer, 2020-02-06 Recent developments in the field of archaeology are not only progressing archaeological fieldwork but also changing the way we practise and present archaeology today As these digital technologies are being used more and more every day on excavations or in museums this also means that we must change the way we approach teaching and communicating archaeology as a discipline The communication of archaeology is an often neglected but ever more important part of the profession Instead of traditional lectures and museum displays we can interact with the past in various ways Students of archaeology today need to learn and understand these technologies but can on the other hand also profit from them in creative ways of teaching and learning The same holds true for visitors to a museum This

volume presents the outcome of a two day international symposium on digital methods in teaching and learning in archaeology held at the University of Cologne in October 2018 addressing exactly this topic Specialists from around the world share their views on the newest developments in the field of archaeology and the way we teach these with the help of archaeogaming augmented and virtual reality 3D reconstruction and many more Thirteen chapters cover different approaches to teaching and learning archaeology in universities and museums and offer insights into modern day ways to communicate the past in a digital age *Studien zur Altägyptischen Kultur Band 23* Hartwig Altenmüller, 2025-06-26
