Mills,2017-03-01 Liberalism is the political philosophy of equal persons yet liberalism has refused equality to those it saw as sub persons Liberalism is the creed of fairness yet liberalism has been complicit with European imperialism and African slavery Liberalism is the classic ideology of Enlightenment and political transparency yet liberalism has cast a dark veil over its actual racist past and present In sum liberalism s promise of equal rights has historically been denied to blacks and other people of color In **Black Rights White Wrongs The Critique of Racial Liberalism** political philosopher Charles Mills challenges mainstream accounts that ignore this history and its current legacy in self conceived liberal polities today Mills argues that rather than bracket as an anomaly the role of racism in the development of liberal theory we should see it as shaping that theory in fundamental ways As feminists have urged us to see the dominant form of liberalism as a patriarchal liberalism so too Mills suggests we should see it as a racialized liberalism It is unsurprising then if contemporary liberalism has yet to deliver on the recognition of black rights and the correction of white wrongs These essays look at racial liberalism past and present white ignorance as a guilty ignoring of social reality that facilitates white racial domination Immanuel Kant s role as the most important liberal theorist of both personhood and sub personhood the centrality of racial exploitation in the United States and the evasion of white supremacy in John Rawls s ideal theory framing of social justice and in the work of most other contemporary white political philosophers Nonetheless Mills still believes that a deracialized liberalism is both possible and desirable He concludes by calling on progressives to Occupy liberalism and develop accordingly a radical liberalism aimed at achieving racial justice      **America's Struggle with Chemical-Biological Warfare** Albert J. Mauroni,2000-01-30 Fear and ignorance have colored the perception of chemical and biological CB warfare both in the public and military spheres Media coverage following the alleged gassing of sheep at Dugway Proving Ground in 1968 has led most people to believe that CB warfare is an unstoppable doomsday weapon of mass destruction Yet in 1972 General Creighton Abrams the Army Chief of Staff attempted to disestablish the Chemical Corps because he saw no need for it Had that decision not been reversed in 1976 there would not have been any chemical defense specialists or equipment available for Operation Desert Storm in 1990 This study tracks events relating to the Department of Defense s CB warfare program between 1968 and 1990 as it evolved up to the Gulf War It also details how the military develops and procures CB defense equipment to protect today s soldiers Mauroni draws parallels between the development of binary chemical weapons the chemical demilitarization program and the DoD CB terrorism response efforts as each has very similar issues and solutions He seeks to educate leading officials and the general public about the facts behind CB warfare and the options for coping with it in the future With proper training and equipment the challenge of CB warfare can be met and dealt with on the modern battlefield      *Standard Federal Tax Reporter '80 vol. 1* ,1979      FEDERAL TAX ,1959      **Standard Federal Tax Reporter** Commerce Clearing House,2008

Hutchison, 1978-09-14 This book is about the three major turning points or revolutions in political economy and economics which are associated with the names of Adam Smith Jevons and Keynes The various components of which these major transformations consisted are examined and the different factors mainly responsible for these changes and choices are suggested Also examined are the different versions of the history of the subject including those of Marx Keynes and some of the classicals and neoclassicals in which economics have sought to set out a favourable scenario or pedigree for their systems of ideas whether traditional or revolutionary or would be revolutionary In this book the history of economics and methodological analysis are brought together and its conclusion contains an assessment of how far the ideas of Kuhn and Lakatos on the relationships between the history and methodology of science are applicable to economics and the social sciences The concept of revolutions in economics has recently been increasingly discussed in papers and articles This book offers the first attempt to deal with this subject more fully Its theme though basically historical and methodological has much relevance for the dilemmas surrounding economic policy making at the present time For increasingly severe disappointments may ensue with perhaps increasingly serious political consequences unless a wider and clearer grasp and recognition is achieved of the nature and limits of economic knowledge and of the realistic possibilities of progress therein      Bulletin of the Astronomical Society of India Astronomical Society of India, 1998      The Value Line Investment Survey , 2002      *Problems of Communism* , 1957
