*Standards and Specifications in the Wood-using Industries* United States. National Bureau of Standards,1927

**Specification for Wood Crossarms (solid and Laminated), Transmission Timbers and Pole Keys to be Purchased by REA Borrowers. Electric and Telephone** United States. Rural Electrification Administration,1972

**National Bureau of Standards Miscellaneous Publication** ,1960      **Miscellaneous Publication - National Bureau of Standards** United States. National Bureau of Standards,1934      **NBS Special Publication** ,1945      National Directory of Commodity Specifications United States. National Bureau of Standards,1945      Nondestructive Evaluation of Wood Forest Service (U S ),Forest Products Laboratory (U S ),Robert J. Ross,2015 Nature s engineering of wood through genetics wind and weather creates a wide variability in wood as a material Consequently manufacture and users of wood products are frequently frustrated in dealing with the forest resource Manufacturers sometimes argue that wood is difficult to consistently process into quality products because of the wide range of properties that exist in this raw material Users of wood products can be equally frustrated with the performance variability found in finished products Nondestructive evaluation NDE technologies have contributed significantly toward eliminating the cause of these frustrations NDE technologies have been developed and are currently used in lumber and veneer grading programs that result in engineered materials that have consistent well defined performance characteristics This brief volume explores some of the processes that are used to manufacture wood including green wood technology and provides a bit of history to wood production and its uses too Other products that may interest you from the US Forest Service can be found at this link <https://bookstore.gpo.gov/agency/819>      **An Index of U.S. Voluntary Engineering Standards. Supplement** William J. Slattery,1972
