Globalization Joel Spring, 2012-10-12 In this ground breaking book Joel Spring examines globalization and its worldwide effects on education A central thesis is that industrial consumerism is the dominant paradigm in the integration of education and economic planning in modern economic security states In the twenty first century national school systems have similar grades and promotion plans instructional methods curriculum organization and linkages between secondary and higher education Although there are local variations the most striking feature is the sameness of educational systems How did this happen How was education globalized Spring explains and analyzes this phenomenon and its consequences for human life and the future improvement of social and economic organizations Central themes include the elements of the educational security state and the industrial consumer paradigm in relationship to classical forms of education such as Confucianism Islam and Christianity and their concerns with creating a just and ethical society the role of the other in the globalization of educational structures as international military and economic rivalries spark competition between educational systems the transition from the Confucian village school to Western forms of education as exemplified in the lives of Ho Chi Minh and Mao Zedong the effect of the cultural and economic rivalry between the Soviet Union and the United States and its impact on schooling in both countries the rise of the educational security state in China the Soviet Union and the United States as these countries focus their educational efforts on military and economic development the evolution of progressive education as it appeared in revolutionary movements in South America Cuba Nicaragua and El Salvador the transition from traditional to Westernized forms of Islamic education against the background of European imperialism Arab nationalism and wars of liberation and the uneasy tension between Western educational ideals and Islamic religious values socialist education in the Democratic People's Republic of Korea current developments in educational security states such as China Japan the United States the new Russia and the European Union and the consequences of English as the global language and the global spread of the industrial consumer paradigm Readership for this book includes scholars and students in comparative international and multicultural education educational policy and politics historical social and philosophical foundations of education and

curriculum studies It is a particularly timely informative engaging text for courses in all of these areas **Educational Research, The National Agenda, and Educational Reform** Theresa R. Richardson, Erwin V. Johanningmeier, 2008-01-01

Educational Research The National Agenda and Educational Reform examines the origins history nature purposes and status of educational research by focusing on the relationships among educational research the national agenda educational reform and the social and behavioral sciences Its major claim is that the history of educational research is embedded in the nation s social political intellectual and economic histories Attention is given to three significant periods the Progressive Era when modern educational research began to assume its present form the Post World War II Era when educators and educational researchers were directed to return to or turn to the academic disciplines and the Civil Rights Era after the Supreme Court in Brown ended legal racial segregation and raised questions about equality of educational opportunity that are still with us These were significant periods when there was a clear national agenda shaped by both public and private agencies Educators and educational researchers adopted policies and strategies in response to concerns and interests expressed by the public by government officials and by philanthropies Researchers responses have had long term consequences as seen in the reaction to The Coleman Report debates about the merits of quantitative research as opposed to qualitative research the ongoing discussion about the merits of No Child Left Behind the achievement gap the creation of the Institute of Education Sciences and the emphasis now placed on scientifically based research The origins of the common school the work of the philosopher Johann Friedrich Herbart and his followers and the revolution in scientific method brought about by Charles Darwin s work are included because they serve as the foundation for educational research Educational researchers identification with and interest in individual performance and ability and their measurement is related to the close relationship educational researchers have had with psychology a discipline that typically does not focus on social context The significance of educational researchers borrowing from the behavioral sciences especially psychology is examined through a discussion of the mental hygiene movement as supported by private philanthropy and through consideration of contributors such as G Stanley Hall Arnold Gesell Lewis M Terman Daniel Starch and Stuart A Courtis **Social Context Reform** Paul Thomas, Brad J. Porfilio, Julie Gorlewski, Paul R. Carr, 2014-06-20

Currently both the status quo of public education and the No Excuses Reform policies are identical The reform offers a popular and compelling narrative based on the meritocracy and rugged individualism myths that are supposed to define American idealism This volume will refute this ideology by proposing Social Context Reform a term coined by Paul Thomas which argues for educational change within a larger plan to reform social inequity such as access to health care food higher employment better wages and job security Since the accountability era in the early 1980s policy public discourse media coverage and scholarly works have focused primarily on reforming schools themselves Here the evidence that school only reform does not work is combined with a bold argument to expand the discourse and policy surrounding education reform to include how social school and classroom reform must work in unison to

achieve goals of democracy equity and opportunity both in and through public education This volume will include a wide variety of essays from leading critical scholars addressing the complex elements of social context reform all of which address the need to re conceptualize accountability and to seek equity and opportunity in social and education reform **Reforming Middle Level Education** Sue C. Thompson, Vincent A. Anfara, 2004-06-01 This volume of The Handbook of Research in Middle Level Education is a significant contribution to the literature on middle level schools because it is written specifically with policymakers in mind Middle level scholars have illuminated the most important issues concerning the education of young adolescents of which policymakers must be knowledgeable It is only by having informed policymakers that middle level schools can truly thrive and provide the kind of education that every young adolescent deserves The future of our country depends on it **Volatile Knowing** Kaia Tollefson, 2010-02-01 Volatile Knowing refers to the positive change that can result when parents and teachers talk together about the politics of school reform Based on a study of teachers and parents who researched aspects of the accountability movement typically censored in mainstream media Volatile Knowing reveals the hidden power behind current reform efforts that serve private not public interests It is aimed at provoking a new child centered movement for accountability and creativity in the nation s schools *Urban Education* Kathy L. Susanne Gannon, Robert Hattam, Wayne Sawyer, 2018-06-12 *Resisting Educational Inequality* examines poverty social exclusion and vulnerability in educational contexts at a time of rising inequality and when policy research suggests that such issues are being ignored or distorted within neoliberal logics In this volume leading scholars from Australia and across the UK examine these issues through three main focus areas Mapping the damage what are our explanations for the persistent nature of educational inequality Resources for hope what do we know about how educational engagement and success can be improved in schools serving vulnerable communities Sustaining hope how might we reframe research policy and practice in the future Using a range of theories and methodologies including empirical and theory building work as well as policy critique this book opens innovative areas of thinking about the social issues surrounding educational practice and policy By exploring different explanations and approaches to school change and considering how research policy and practice might be reframed this book moves systematically and insightfully through damage towards hope In combining pedagogy policy and experience *Resisting Educational Inequality* will be a valuable resource for all researchers and students policymakers and education practitioners

Five Miles Away, A World Apart James E. Ryan, 2010-08-06 How is it that half a century after *Brown v Board of Education* educational opportunities remain so unequal for black and white students not to mention poor and wealthy ones In his important new book *Five Miles Away A World Apart* James E Ryan answers this question by tracing the fortunes of two schools in Richmond Virginia one in the city and the other in the suburbs Ryan shows how court rulings in the 1970s limiting

the scope of desegregation laid the groundwork for the sharp disparities between urban and suburban public schools that persist to this day. The Supreme Court in accord with the wishes of the Nixon administration allowed the suburbs to lock nonresidents out of their school systems. City schools whose student bodies were becoming increasingly poor and black simply received more funding, a measure that has proven largely ineffective while the independence and superiority of suburban schools remained sacrosanct. Weaving together court opinions, social science research, and compelling interviews with students, teachers, and principals, Ryan explains why all the major education reforms since the 1970s, including school finance litigation, school choice, and the No Child Left Behind Act, have failed to bridge the gap between urban and suburban schools and have unintentionally entrenched segregation by race and class. As long as that segregation continues, Ryan forcefully argues, so too will educational inequality. Ryan closes by suggesting innovative ways to promote school integration which would take advantage of unprecedented demographic shifts and an embrace of diversity among young adults. Exhaustively researched and elegantly written by one of the nation's leading education law scholars, *Five Miles Away, A World Apart* ties together like no other book a half century's worth of education law and politics into a coherent if disturbing whole. It will be of interest to anyone who has ever wondered why our schools are so unequal and whether there is anything to be done about it.

Diversity's Promise for Higher Education Daryl G. Smith, 2024-08-06. Building sustainable diversity in higher education isn't just the right thing to do; it is an imperative for institutional excellence and for a pluralistic society that works. In *Diversity's Promise for Higher Education*, author Daryl G. Smith proposes clear and realistic practices to help institutions identify diversity as a strategic imperative for excellence and pursue diversity efforts that are inclusive of the varied issues.

on campuses without losing focus on the critical unfinished business of the past To become more relevant while remaining true to their core missions colleges and universities must continue to frame diversity as central to institutional excellence Smith suggests that seeing diversity as an imperative for an institution's mission and not just as a value is the necessary lever for real institutional change Furthermore achieving excellence in a diverse society requires increasing institutional capacity for diversity working to understand how diversity is tied to better leadership positive change research in virtually every field student success accountability and more equitable hiring practices In this edition Smith emphasizes a transdisciplinary approach to the topic of diversity Drawing on fifty years of diversity studies this fourth edition engages with how the environment has transformed for diversity work since the third edition appeared in 2020 It addresses the changed landscape in which DEI work has been politicized both on and off campus provides examples and language to suggest ways to articulate the centrality of diversity to mission and excellence emphasizes the link between healthy democracies and higher education's mission in light of the current global and domestic challenges to democracy highlights the need to focus on the conditions for developing healthy communities where dialogue difference and learning can take place examines the current climate of campus protests and the implications for free speech and academic freedom and reemphasizes the complexity of identity and explains how to attend to the growing kinds of identities relevant to diversity equity and inclusion while not overshadowing the unfinished business of race class and gender

The Educated Person D. G. Mulcahy, 2008-03-27 Liberal education has long been a fascination for scholars in a variety of disciplines and is closely associated with the idea of the educated person Seen at one time as a matter for colleges and universities over the years it has become central to the debate surrounding general education in high school and even the earlier grades Yet so many and varied are the uses of the term liberal education that the question arises of whether and how the idea is any longer a useful or helpful construct In what way might it speak helpfully to educational challenges we face today In what ways does it still speak helpfully to educational challenges we face today In what ways might it be a guide as we search for a better way forward These are the central questions that are addressed in this book In doing so the positions of three theorists John Henry Newman Mortimer J Adler and Jane Roland Martin who have written about liberal education in a compelling way and from different perspectives are selected for close analysis The analysis is built upon to fashion a new ideal of the educated person and a new theory of liberal education **Is**
