Sir Humphry Davy's Published Works June Z. Fullmer, 1961 **The Collected Works of Sir Humphry Davy** Humphry Davy, Sir Humphry Davy, 1839 *Young Humphry Davy* June Z. Fullmer, 2000

Humphry Davy's contemporaries bestowed on him their highest honors. Since Davy's death in 1829, each scholarly generation has accrued info about him, his colleagues, his startling discoveries of the scientifically novel, his isolation/identification of 7 new elements, his association of electrical properties, chemical behavior coupled with his fame as a lecturer made him a popular cultural hero. Others saw him as the man who had made agriculture scientific. Davy's refusal to profit financially from his invention of the miners' safety lamp endeared him to those humanitarians who idealized scientists as members of an altruistic brotherhood. Here is a readable, thoroughly researched biography of Davy's early life.

Humphry Davy: Life Beyond the Lamp Raymond Lamont-Brown, 2004-05-13

Born in Penzance in 1778, Humphry Davy's scientific reputation grew with his pioneering discoveries of nitrous oxide, laughing gas, sodium, calcium, and the invention of the miners' Davy lamp. Yet as Lamont Brown shows, Davy was not just a scientific pioneer but a man with wide-ranging interests at the centre of London life. A founder member of the Geological Society and co-founder with Sir Stamford Raffles of London Zoo, Davy was also a poet of some ability, enjoying the respect and lively friendship of Southey, Coleridge, and Wordsworth among others. Eclectic and brilliant, one of his greatest contributions was however to communicate science to a wider public; he was a man for his own time and ours.

Science in the Romantic Era David Knight,2016-03-31 First published in 1998 The Romantic Era was a time when society religion and other beliefs and science were all in flux The idea that the universe was a great clock and that men were little clocks all built by a divine watchmaker was giving way to a more dynamic and pantheistic way of thinking A new language was invented for chemistry replacing metaphor with algebra and scientific illustration came to play the role of a visual language deeply involved with theory A scientific community came gradually into being as the 19th century wore on The papers which compose this book have appeared in a wide range of books and journals together with the new introduction they illuminate science and its context in the Romantic Era and follow its effects in the 19th century The Collected Works of Sir Humphry Davy Davy,1840 Public Understanding of Science David Knight,2006-10-16 Answering questions such as whether the interesting parts of science be conveyed in sermons poems pictures and journalism Knight explores the history of science to show how the successes and failures of our ancestors can help us understand the position science comes to

occupy now **Scientific and Medical Knowledge Production, 1796-1918** Rob Boddice, 2023-05-31 This volume showcases doubt from within the scientific community itself These sources dwell upon the moments at which ideas became challenged when facts were revealed to be fiction and when knowns reverted to unknowns But the focus is not the ideas and facts themselves but on the ways in which scientists adjusted themselves to new landscapes of uncertainty in their particular cultural and professional practices Science In The Making E.
