on or do something about it Gnawing in the middle of the night where many a bear rambles and ambles by even leaving a mark or two way up on the lodge s long legs holding up the large deck overlooking the lovely lake takes on a different sound A sound that when you wake up to well into the wilderness makes you wonder why you talk to yourself asking and answering questions What the hell is that Is it in the cabin No Is it just outside the cabin I don t think so but it s so hard to tell the way sound carry s out here Maybe I ll check Maybe I ll just pull the bedcovers up more and hope it goes away Then you hear it again and again as if whatever is making the noise has no care or concern that first you re sleeping second you would like to go back to sleep and third you don t want to be woken up again But the sound doesn t stop I can t sleep now what the hell is that what makes that kind of sound Nothing s trying to get in through the window Nothing on the raft like deck I ll have to step outside and take a look He looks at the thirty aught six still sheathed in its scabbard by the door before stepping outside Tim s memories of The Yukon bring him back to his past and pave the way to his future

**Mobility** Michelle L. Lange, Jean L. Minkel, 2024-12-30 Fully updated and expanded in its second edition *Seating and Wheeled Mobility A Clinical Resource Guide* presents clinical assessment considerations when working with a person with a mobility disability. The book provides a wide spectrum of information from foundational information for those practitioners who are new to the field to in depth population specific information for practitioners who perhaps have not worked with a particular population in the past. The book is divided into sections each section addressing a different area of clinical practice in wheelchair seating and mobility. The first section is an in depth presentation of the assessment process and pressure management. The range of available seating supports is presented as part of the product selection process including matching the person's needs with available technology. The second section focuses on 24 hour postural care. Three types of sitters are presented: hands free, hands dependent and prop sitters. Included is the most current method to measure and describe the seated person and related support surfaces needed when recommending a device. The third section lays the foundation for clinical decision making around the selection and fit of the most appropriate wheeled mobility device: manual, power wheelchair or scooter. The fourth section provides in depth clinical applications for each mobility category. On time mobility for the very young, power seating and mobility skills training are addressed. The fifth section provides population specific clinical application of position pressure management and mobility for the pediatric, geriatric and bariatric populations as well as persons with both degenerative and complex neuromuscular impairments. The sixth section presents additional considerations when working with persons who are aging with a disability: considerations of the environment of use, safe transport of a wheelchair and the application of wheelchair standards in the clinic. Finally, measuring outcomes throughout the service provision process and a look at the past, present and future of complex rehab technology is included. Richly illustrated throughout, this book has been carefully designed to support occupational and physical therapists, suppliers, distributors and funders/payers who are interested in wheelchair seating and mobility assessment and applications.
