COMMON SENSE PHYSICS & COSMOLOGY

ALL PHENOMENA HAVE PHYSICAL ORIGINS!

All universal phenomena such as gravity and light are logically explained by the classical (Galilean) physics, taught in high schools!

The universe has both gravity and antigravity matters in 3-dimensional space!

The Hubble Image of a small region of the observable universe.

Since there can be only one consistent and coherent interpretation of the universe and all universal phenomena, Galilean physics is now proven to be the only correct physics!

Rutledge, 2013-04-26 Just as Africa and the West have traditionally fit into binaries of Darkness Enlightenment Savage Modern Ugly Beautiful and Ritual Art among others much of Western cultural production rests upon the archetypal binary of Trickster Epic with trickster aesthetics and commensurate cultural forms characterizing Africa Challenging this binary and the exceptionalism that underlies anti hegemonic efforts even today this book begins with the scholarly foundations that mapped out African trickster continuities in the United States and excavated the aesthetics of traditional African epic performances Rutledge locates trickster like capacities within the epic hero archetype the epic trickster paradigm and constructs an Homeric Diaspora which is to say that the modern Homeric performance foundation lies at an absolute time and distance away from the ancient storytelling performance needed to understand the cautionary aesthetic inseparable from epic potential As traditional epic performances demonstrate unchecked epic trickster dynamism anticipates not only brutal imperialism and creative diversity but the greatest threat to everyone an eco apocalypse Relying upon the preeminent scholarship on African American trickster heroes traditional African heroic performances and cultural studies approaches to Greco Roman epics Rutledge traces the epic trickster aesthetic through three seminal African American novels keenly attuned to the American Homeric Diaspora Charles Chesnutt's *The Marrow of Tradition* Richard Wright's *Native Son* and Toni Morrison's *Beloved* The Cosmic Time of Empire Adam Barrows, 2011 Combining original historical research with literary analysis Adam Barrows takes a provocative look at the creation of world standard time in 1884 and rethinks the significance of this remarkable moment in modernism for both the processes of imperialism and for modern literature As representatives from twenty four nations argued over adopting the Prime Meridian and thereby measuring time in relation to Greenwich England writers began experimenting with new ways of representing human temporality Barrows finds this experimentation in works as varied as Victorian adventure novels high modernist texts and South Asian novels including the work of James Joyce Virginia Woolf H Rider Haggard Bram Stoker Rudyard Kipling and Joseph Conrad Demonstrating the investment of modernist writing in the problems of geopolitics and in the public discourse of time Barrows argues that it is possible and productive to rethink the politics of modernism through the politics of time **The Writings of John Fiske ...: Outlines of cosmic philosophy** John Fiske, 1902 The Cosmic Common Good Daniel P. Scheid, 2016 In this book Daniel Scheid draws on Catholic social thought as a foundation for a new type of interreligious ecological ethics which he calls the cosmic common good By placing this concept in dialogue with tenets from other spiritual traditions such as Hindu dharmic

Cosmology Edward Harrison, 2000-03-16 *Cosmology The Science of the Universe* is an introduction to past and present cosmological theory For much of the world's history cosmological thought was formulated in religious or philosophical language and was thus theological or metaphysical in nature However cosmological speculation and theory has now become a science in which the empirical discoveries of the astronomer theoretical physicist and biologist are woven into intricate models that attempt to account for the universe as a whole Professor Harrison draws on the discoveries and speculations of these scientists to provide a comprehensive survey of man's current understanding of the universe and its history Tracing the rise of the scientific method the major aim of this book is to provide an elementary understanding of the physical universe of modern times Thoroughly revised and updated this second edition extends the much acclaimed first edition taking into account the many developments that have occurred

Outlines of Cosmic Philosophy, Based on the Doctrine of Evolution John Fiske, 1874 **Land of the Cosmic Race** Christina A. Sue, 2013-03-07 *Land of the Cosmic Race* is a richly detailed ethnographic account of the powerful role that race and color play in organizing the lives and thoughts of ordinary Mexicans It presents a previously untold story of how individuals in contemporary urban Mexico construct their identities attitudes and practices in the context of a dominant national belief system The book centers around Mexicans engagement with three racialized pillars of Mexican national ideology the promotion of race mixture the assertion of an absence of racism in the country and the marginalization of blackness in Mexico The subjects of this book are mestizos the mixed race people of Mexico who are of Indigenous African and European ancestry and the intended consumers of this national ideology *Land of the Cosmic Race* illustrates how Mexican mestizos navigate the sea of contradictions that arise when their everyday lived experiences conflict with the national stance and how they manage these paradoxes in a way that upholds protects and reproduces the national ideology Drawing on a year of participant observation over 110 interviews and focus groups from Veracruz Mexico Christina A Sue offers rich insight into the relationship between race based national ideology and the attitudes and behaviors of mixed race Mexicans Most importantly she theorizes as to why elite based ideology not only survives but actually thrives within the popular understandings and discourse of those over whom it is designed to govern

Rosen,2008-10-01 The concept of the ordinary along with such cognates as everyday life ordinary language and ordinary experience has come into special prominence in late modern philosophy Thinkers have employed two opposing yet related responses to the notion of the ordinary scientific and phenomenological approaches on the one hand and on the other more informal or even anti scientific procedures Eminent philosopher Stanley Rosen here presents the first comprehensive study of the main approaches to theoretical mastery of ordinary experience He evaluates the responses of a wide range of modern and contemporary thinkers and grapples with the peculiar problem of the ordinary how to define it in its own terms without transforming it into a technical and so extraordinary artifact Rosen s approach is both historical and philosophical He offers Montesquieu and Husserl as examples of the scientific approach to ordinary experience contrasts Kant and Heidegger with Aristotle to illustrate the transcendental approach and its main alternatives discusses attempts by Wittgenstein and Strauss to return to the pre theoretical domain and analyzes the differences among such thinkers as Moore Austin Grice and Russell with respect to the analytical response to ordinary language Rosen concludes with a theoretical exploration of the central problem of how to capture the elusive ordinary intact

Ellen,Katsuyoshi Fukui,2021-01-07 How can anthropology improve our understanding of the interrelationship between nature and culture What can anthropology contribute to practical debates which depend on particular definitions of nature such as that concerning sustainable development Humankind has evolved over several million years by living in and utilizing nature and by assimilating it into culture Indeed the technological and cultural advancement of the species has been widely acknowledged to rest upon human domination and control of nature Yet by the 1960s the idea of culture in confrontation with nature was being challenged by science philosophy and the environmental movement Anthropology is increasingly concerned with such issues as they become more urgent for humankind as a whole This important book reviews the current

state of the concepts of nature we use both as scientific devices and ideological constructs and is organised around three themes nature as a cultural construction the cultural management of the environment and relations between plants animals and humans
