Cosmic Order and Cultural Astronomy Rana Singh, 2009-10-02 Throughout the Indian subcontinent there are territories and areas wherein culture geography and the archetypal cosmos interact with each other to create a sacredscape that is infused with meaning cultural performances and transcendent power These sacred sites possess extensive mythological associations where believed that spirit can cross between different realms In a broad perspective such studies falls within the realm of cultural astronomy which has two broad areas viz archaeoastronomy concerned with the study of the use of astronomy and its role in ancient cultures and civilizations and ethnoastronomy that studies the use of astronomy and its role in contemporary cultures The seven essays in this volume deals with the critical appraisal of studying cultural astronomy and cosmic order and its implications in India illustrated with case studies like heritagescape of Khajuraho where stone speaks manescape of Gaya where manes come and bless the devotees Deviscape of Vindhyachal where goddess resorts Shivascape of Kashi where Shiva dances in making order Shaktiscape of Kashi that possesses the spatial ordering of goddesses and Naturscape of Chitrakut where mother earth blesses

Advancing Cultural Astronomy Efrosyni Boutsikas, Stephen C. McCluskey, John Steele, 2021-04-08 This collection of essays on cultural astronomy celebrates the life and work of Clive Ruggles Emeritus Professor of Archaeoastronomy at Leicester University Taking their lead from Ruggles work the papers present new research focused on three core themes in cultural astronomy methodology case studies and heritage Through this framework they show how the study of cultural astronomy has evolved over time and share new ideas to continue advancing the field Ruggles work in these areas has had a profound impact on the way that scholars approach evidence of the role of sky in both ancient and modern cultures While the papers span many time periods and regions they are closely connected by these three major themes presenting

methodological investigations of how we can approach archaeological textual and ethnographic evidence describing detailed archaeoastronomical case studies or stressing the importance of global heritage management This work will appeal to researchers and scholars interested in the history and development of cultural astronomy **Assembling Identities** Sam Wiseman,2014-10-21 This collection of sixteen essays drawn from across the arts humanities and social sciences represents a cross disciplinary exploration of some of the ways in which identities whether of individuals communities or nations are constructed maintained and contested It is introduced by the editor Sam Wiseman with a preface by Regenia Gagnier and the essays are subdivided into four sections Performative Identities British Identities Ethnic Bodily and Sexual Identities and Visual *An Encyclopedia of Shamanism Volume 2* Christina Pratt,2007-08-01 Shamanism can be defined as the practice of initiated shamans who are distinguished by their mastery of a range of altered states of consciousness Shamanism arises from the actions the shaman takes in non ordinary reality and the results of those actions in ordinary reality It is not a religion yet it demands spiritual discipline and personal sacrifice from the mature shaman who seeks the highest stages of mystical development **Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures** Helaine Selin,2008-03-12 Here at last is the massively updated and augmented second edition of this landmark encyclopedia It contains approximately 1000 entries dealing in depth with the history of the scientific technological and medical accomplishments of cultures outside of the United States and Europe The entries consist of fully updated articles together with hundreds of entirely new topics This unique reference work includes intercultural articles on broad topics such as mathematics and astronomy as well as thoughtful philosophical articles on concepts and ideas related to the study of non Western Science such as rationality objectivity and method You ll also find material on religion and science East and West and magic and science An Archaeology of the Cosmos Timothy R. Pauketat,2013 An Archaeology of the Cosmos seeks answers to two fundamental questions of humanity and human history The first question concerns that which some use as a defining element of humanity religious beliefs Why do so many people believe in supreme beings and holy spirits The second question concerns changes in those beliefs What causes beliefs to change Using archaeological evidence gathered from ancient America especially case material from the Great Plains and the pre Columbian American Indian city of Cahokia Timothy Pauketat explores the logical consequences of these two fundamental questions Religious beliefs are not more resilient than other aspects of culture and society and people are not the only causes of historical change An Archaeology of the Cosmos examines the intimate association of agency and religion by studying how relationships between people places and things were bundled together and positioned in ways that constituted the fields of human experience This rethinking theories of agency and religion provides readers with challenging and thought provoking conclusions that will lead them to reassess the way they approach the past New Materialisms Ancient Urbanisms Susan M. Alt,Timothy R. Pauketat,2019-08-05 The future of humanity is urban and knowledge of urbanism s deep past is critical for us all to navigate

that future The time has come for archaeologists to rethink this global phenomenon by asking what urbanism is and more to the point was Can we truly understand ancient urbanism by only asking after the human element or are the properties and qualities of landscapes materials and atmospheres equally causal The nine authors of New Materialisms Ancient Urbanisms seek less anthropocentric answers to questions about the historical relationships between urbanism and humanity in Africa Asia and the Americas They analyze the movements and flows of materials things phenomena and beings human and otherwise as these were assembled to produce the kinds of complex dense and stratified relationships that we today label urban In so doing the book emerges as a work of both theory and historical anthropology It breaks new ground in the archaeology of urbanism building on the latest New Materialist relational ontological and realist trends in social theory This book challenges a new generation of students to think outside the box and provides scholars of urbanism archaeology and anthropology with a fresh perspective on the development of urban society

Inside the Neolithic Mind: Consciousness, Cosmos, and the Realm of the Gods David Lewis-Williams, David Pearce, 2005-10-01 An exploration of how brain structure and cultural content interacted in the Neolithic period 10 000 years ago to produce unique life patterns and belief systems What do the headless figures found in the famous paintings at Catalhoyuk in Turkey have in common with the monumental tombs at Newgrange and Knowth in Ireland How can the concepts of birth death and wild cast light on the archaeological enigma of the domestication of cattle What generated the revolutionary social change that ended the Upper Palaeolithic David Lewis Williams s previous book *The Mind in the Cave* dealt with the remarkable Upper Palaeolithic paintings carvings and engravings of western Europe Here Dr Lewis Williams and David Pearce examine the intricate web of belief myth and society in the succeeding Neolithic period arguably the most significant turning point in all human history when agriculture became a way of life and the fractious society that we know today was born The authors focus on two contrasting times and places the beginnings in the Near East with its mud brick and stone houses each piled on top of the ruins of another and western Europe with its massive stone monuments more ancient than the Egyptian pyramids They argue that neurological patterns hardwired into the brain help explain the art and society that Neolithic people produced Drawing on the latest research the authors skillfully link material on human consciousness imagery and religious concepts to propose provocative new theories about the causes of an ancient revolution in cosmology and the origins of social complexity In doing so they create a fascinating neurological bridge to the mysterious thought lives of the past and reveal the essence of a momentous period in human history 100 illustrations 20 in color

Visualising Skyscapes Liz Henty, Daniel Brown, 2019-08-19 Above the land and its horizon lies the celestial sphere that great dome of the sky which governs light and darkness critical to life itself yet its influence is often neglected in the archaeological narrative *Visualising Skyscapes* captures a growing interest in the emerging field of skyline archaeology This powerful and innovative book returns the sky to its rightful place as a central consideration in archaeological thought and can be regarded as a handbook for further research Bookended by a foreword by archaeologist Gabriel Cooney and an afterword by astronomer Andrew Newsam its contents have a wide reaching relevance for the fields of archaeology anthropology ethnography archaeoastronomy astronomy heritage and cultural studies The volume balances six chapters on theory and methodology which elaborate on the history and practice of the field with six other chapters focused on case studies from around the world *Visualising Skyscapes* captures the growing interest in the multidisciplinary study of skylines and will be of interest to academics students and the general public as well as having international appeal It is topical timely and relevant to current debates and will hopefully stimulate further interest in this exciting and relatively new

area of investigation The contributions showcase the work of distinguished academics in the field and the chapters are all enhanced by numerous photographs and images

Astronomy Across Cultures Helaine Selin, 2012-12-06 Astronomy Across Cultures A History of Non Western Astronomy consists of essays dealing with the astronomical knowledge and beliefs of cultures outside the United States and Europe In addition to articles surveying Islamic Chinese Native American Aboriginal Australian Polynesian Egyptian and Tibetan astronomy among others the book includes essays on Sky Tales and Why We Tell Them and Astronomy and Prehistory and Astronomy and Astrology The essays address the connections between science and culture and relate astronomical practices to the cultures which produced them Each essay is well illustrated and contains an extensive bibliography Because the geographic range is global the book fills a gap in both the history of science and in cultural studies It should find a place on the bookshelves of advanced undergraduate students graduate students and scholars as well as in libraries serving those groups

The Chaco Meridian Stephen H. Lekson, 1999-03-24 Southwestern archaeologists have long pondered the meaning and importance of the monumental 11th century structures in Chaco Canyon Now Stephen H Lekson offers a lively provocative thesis which attempts to reconceptualize the meaning of Chaco and its importance to the understanding of the entire Southwest Chaco was not alone according to Lekson but only one of three capitals of a vast politically and economically integrated region a network that incorporated most of the Pueblo world and that had contact as far away as Central America A sophisticated astronomical tradition allowed for astrally aligned monumental structures great

ceremonial roads and upon the abandonment of Chaco Canyon in the 12th century the shift of the regional capital first to the Aztec site then Paquime all located on precisely the same longitudinal meridian Lekson's ground breaking synthesis of 500 years of Southwestern prehistory with its explanation of phenomena as diverse as the Great North Road macaw feathers Pueblo mythology and the rise of kachina ceremonies will be of great interest to all those concerned with the prehistory and history of the American Southwest

Origins of the Sphinx Robert M. Schoch, Robert Bauval, 2017-03-16 New research and evidence that the Sphinx is thousands of years older than previously thought Contrasts what Egyptologists claim about the Sphinx with historical accounts and new research including reanalysis of seismic studies and updates to Schoch's water weathering research and Bauval's Orion Correlation Theory Examines how the Sphinx is contemporaneous with Gbekli Tepe aligned with the constellation Leo and was recarved during the Old Kingdom era of Egypt Reveals that the Sphinx was built during the actual historical Golden Age of ancient Egypt the period known in legend as Zep Tepi No other monument in the world evokes mystery like the Great Sphinx of Giza It has survived the harsh climate of Egypt for thousands of years and will remain long after our own civilization is gone According to orthodox Egyptology the Sphinx was built around 2500 BCE as a memorial to the pharaoh Khafre Yet this fact has scant to no supportive evidence When was the Sphinx really built and most importantly why In this provocative collaboration from two Egyptology outsiders Robert M Schoch Ph D and Robert Bauval combine their decades of research to show how the Sphinx is thousands of years older than the conventional Egyptological timeline and was built by a long forgotten pre Pharaonic civilization They examine the known history of the Sphinx contrasting what Egyptologists claim with prominent historical accounts and new research including updates to Schoch's geological water weathering research and reanalysis of seismic studies Building on Bauval's Orion Correlation Theory they investigate the archaeoastronomical alignments of the monuments of the Giza Plateau and reveal how the pyramids and Sphinx were built to align with the constellations of Orion and Leo Analyzing the evidence for a significantly older construction phase at Giza and the restoration and recarving of the Sphinx during the Old Kingdom era they assert that the Sphinx was first built by an advanced pre Pharaonic civilization that existed circa 12 000 years ago on the Giza Plateau contemporaneous with the sophisticated Gbekli Tepe complex The authors examine how the monuments at Giza memorialize Zep Tepi the Golden Age of legend shown here to be an actual historical time period from roughly 10 500 BCE through 9700 BCE Moving us closer to an understanding of the true age and purpose of the Great Sphinx Schoch and Bauval provide evidence of an early high civilization witnessed by the Great Sphinx before the end of the last ice age

The Seven Sisters of the Pleiades Munya Andrews, 2004 The history legend and mythology of a star cluster associated with women for aeons of human history Munya captures the richness of the mysterious constellation Pleiades and explains the recurring significance of these celestial sisters who animate the myths of cultures as diverse as Classical Greece and Aboriginal Australia
